

Cam-Stay

Easy to use telescopic multi-positional stay

With fixed holding positions the Cam-Stay provides quick and steady positioning. Ideally suited for a wide range of applications where a weight must be held or supported at various angles.

Benefits

- Easy installation
- Maintenance free
- User friendly
- Up to 10 adjustment positions
- Stops at any holding position

The Cam-Stay telescopic positioning stay

The Cam-Stay telescopic positioning stay comes in three versions; Basic with 5 locking positions - Part Code: 00-5520-05; Basic with 10 locking positions - Part Code: 00-5520-10 and Reversible with 6 locking positions - Part Code: 00-5520-06.

Basic - To operate the Basic stay all you need to do is slightly extend the arm from its closed state until it locates into the desired holding position. To close the unit, fully extend the stay before returning it to the closed position. The Basic type is available with 5 or 10 holding positions.

Reversible - To operate the Reversible type stay, extend the arm from its closed position until it locates into the desired holding position. The Reversible version can be closed between any holding positions, it does not need to be fully extended before closing. To close the stay simply extend it slightly out of its current holding position and close. The Reversible type is available with 6 holding positions.

All Cam-Stay telescopic positioning stays are universal and can be mounted with the holding slots mounted up or down. Mounting of the stays can either be directly to your application through the holes or by mounting brackets.
