Card Edge Connectors
Catalog 1654080 Issued 7-03

AMP

Introduction

This catalog contains product descriptions of AMP Card Edge Connectors. These connectors are presented in three groups: Solder Type Board-to-Board, Press-fit Board-to-Board, and Wire-to-Board connectors.

To assist you in the selection of the appropriate connector for your application, a selection guide is provided at the beginning of each section. See the Table of Contents on the following page for the exact location.

A comprehensive description and features of a partic-

ular printed circuit board connector family are provided at the beginning of that section. Various technical documents are referenced in the connector family sections and are listed and described at the rear of this catalog.

The Tyco Electronics products presented in this catalog are designed and manufactured according to the highest possible standards of quality and craftsmanship. They offer optimum reliability at the lowest possible cost.

Need more information?

Call Technical Support at the numbers listed at the bottom of the catalog pages.

Technical Support is staffed with specialists well versed in Tyco Electronics products. They can provide you with:

- Technical Support
- Catalogs
- Technical Documents
- Product Samples
- Tyco Electronics Authorized Distributor Locations

Dimensioning:

Dimensions are in inches and millimeters unless specified otherwise. Values in brackets are metric equivalents.

Metric symbols used are:

- m (meter)
- mm (millimeter)
- mm² (square millimeter)
- kg (kilogram)
- C (Celsius)
- N (newton)

Note: Dimensions in this catalog are for reference purposes only. Customer drawings are available upon request.

Selection Guide, Board-to-Board Connectors

Introduction

Board-to-board (mother/daughter board) connectors are ideally suited to back-plane wiring or any other application requiring the circuit connection of one printed circuit board to another. Designed to shorten manufacturing time and reduce applied costs, these one-step, pre-assembled connectors are ready for mounting and mass insertion.

Many of the connectors are available with the proven and reliable ACTION PIN contact. This unique contact has superior electrical and physical characteristics that are top of the line in the industry.

Board-to-board connectors come in a range of contact centerline spacings of .050 [1.27] to .156 [3.96]. A wide range of dual position sizes and post styles are available. One family of connectors features zero insertion force of the daughter board, along with a choice of actuating devices. A variety of housing and contact materials further expands the choice of connectors available to meet many application requirements.

To help in choosing a connector for your application, a Selection Guide is provided on pages 4 through 6.

Product Facts

- High density .050 [1.27] centerline contact spacing
- Easy mating of high circuit count daughter boards
- Polarizing web for positive board-to-connector registration
- Choice of plastic pylons or metal holdowns

Connectors that support PCI expansion cards are derived from those on the MicroChannel Architecture (MCA) bus. The MCA connectors are well defined and have proven value and reliability.

There are four connectors that can be used depending upon the PCI implementation. The differences between these connectors are 32 bit and 64 bit, and the 5 volt and 3.3 volt signaling environments. PCI-X is a version of PCI at 133 MHz which is under development and employs standard PCI connectors. PCI-X is limited to 1 slot versus 4 slots of PCI.

A key differentiates the signaling environment voltages. The same physical connector is used for the 32 bit signaling environments. In one orientation, the key accepts 5 volt boards. When rotated 180°, the connector accepts 3.3 volt signaling boards. The pin numbering of the connector changes for the different signaling environments to maintain the same relative position of signals on the connector.

Performance Specifications:

Durability—Tested to 100 mating cycles

Mating Force—8 oz [2.22 N] max. per contact pair

Unmating Force—.5 oz [0.14 N] min. per contact pair

Contact Resistance—20 milliohms max. (initial) 30 milliohms max. (final)

Insulation Resistance—1000 megohms min.

Dielectric Withstanding Voltage—500 VAC (at sea level)

Capacitance—2 picofarads max.

Current Rating—1 ampere max.

Voltage Rating—203 VAC

Thermal Shock—-55°C to +85°C for 5 cycles

Mixed Flowing Gas—Class II with mated board for 20 days

Product Facts

- High density .050 [1.27] centerline spacing of contacts
- Easy mating of high-circuit count daughter boards
- Compatible with infrared reflow (IR) soldering techniques
- Polarizing web for positive board-to-connector registration
- Choice of plastic pylons or metal holddowns
- Recognized under the Component Program of Underwriter Laboratories Inc.  File No. E28476
- Certified by Canadian Standards Association,  File No. LR 7189

Performance Specifications:

Contact Current Rating* — 1 ampere

Termination Resistance —

20 milliohms max. (initial)

30 milliohms max. (final)

Dielectric Withstanding Voltage — 500 VAC min.

Insulation Resistance — 1000 megohms min.

Mating Force — .5 oz. [0.14 N] per contact pair

Unmating Force — 1 oz. [0.3 N] per contact pair

Durability (Tested to) — 100 mating cycles

Application Temperature — +215°C for 120 seconds max.

Temperature Range — -55°C to +85°C

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

Standard Edge .050 Series Connectors

The need to conserve space and pack more function into a given area has demanded that .050 [1.27] centerline spacing become a reality. AMP Standard Edge .050 Series connectors are the ideal vehicle for mother/daughter board applications requiring this real estate.

These rugged connectors have two rows of contacts on .050 [1.27] centerlines. Polarizing webs provide positive board-to-connector registration, while insertion force allows even high circuit-count daughter boards to mate easily. The connectors accept .054 to .070 [1.37 to 1.78] thick daughter boards and feature an overstress protected contact design.

AMP Standard Edge .050 Series connectors are ideal for fast automated robotic assembly with registration features and dimensional tolerancing for more accurate pickup and placement, and are packaged in robotics-compatible trays.

Plastic guide posts or metal holddowns align the connector with the mother board and retain it for soldering. To make circuit routing easy, connector solder posts are arranged in a four-row .100 [2.54] staggered grid. High-temperature tolerant materials promote that these connectors withstand infrared reflow (IR) soldering, while standoffs ease flux cleaning.

High Density for DataBus Applications

Insulation Resistance: 5000 megohms min., after exposure to humidity

Vibration Tolerance: 10 to 500 hertz

Contact Engagement Force: 12 oz [3.3 N] average per pair with .062 [1.57] PC board

Contact Separation Force: 2 oz [0.6 N] average per pair with .062 [1.57] PC board

Humidity Tolerance: 90%-95% for 96 hours

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

AMP Standard Edge II Connectors provide high reliability and economy in packages compatible with industry standards for double sided printed circuit boards.

Tyco Electronics offers Standard Edge II Connectors with or without mounting ears, for rack mounting and soldering. Contacts are arranged on .100 [2.54] centers, .125 [3.18] centers, .150 [3.81] centers, .200 [5.08] row-to-row; and .250 [6.35] row-to-row.

Right-angle connectors are also available with contacts arranged on .100 [2.54] centers, .150 [3.81] row-to-row or .200 [5.08] row-to-row.

Card extenders with contacts on .100 [2.54] and .125 [3.18] centers also are available.

Precision formed phosphor bronze contacts are selectively gold plated. Phosphor bronze has excellent strength characteristics which help the connector absorb load deflection movement of a PC board while maintaining sufficient contact force for good electrical connection. Bifurcated cantilever beam contacts provide redundant contact.

*Metric equivalent for post length is .125 = [3.18].

**C dimension is card slot length.

Notes: 1. Other connector sizes can be made available, consult Tyco Electronics.

2. High temperature IR reflow compatible connectors can be made available, consult Tyco Electronics.

**.100 [2.54] Centerline,
Special 18/31 Dual
Combination Connector,
Vertical Solder Posts,
Without Mounting Ears**

Material and Finish:

Housing—Black glass-filled polyester, 94V-0 rated, except where noted

Contacts—Phosphor bronze, plated with .000030 [0.00076] gold in contact area (except where noted), tin on posts, with entire contact nickel underplated

Product Facts

- Double readout Card Edge connectors use dip solder contacts
- Large lead-in chamfers allow easy PC board installation
- Insulator standoffs prevent solder from wicking
- Various lengths for custom applications
- Contact option, single or dual row

Cantilever Series Card Edge Connectors

Description

The Cantilever Beam Series products from Tyco Electronics are double readout cardedge connectors, using dip solder contacts. Tooled for flexible manufacturing, these Card Edge connectors are readily available in a broad assortment of sizes and mounting styles. Our connectors meet industry standards.

Design Advantages

- **Circuit Integrity:** Robust cantilever contacts are designed to promote optimal normal forces at the lowest possible cost. Our uniquely contoured contact mating surface gives you constant engagement, even when subjected to continuous vibration.
- **Ease of Assembly:** Generous lead-in chamfers let your P.C. board slide easily into the connector. Insulator standoffs are provided to facilitate cleaning and prevent solder from wicking.

Availability, flexibility, performance and very low cost make the Cantilever Series from Tyco Electronics the clear choice in Card Edge connectors.

Cantilever Beam

The Cantilever Beam Card Edge connector comes with standard high temperature plastic insulators. Contacts are available in a variety of lengths to accommodate various custom applications. Standoffs allow for cleaning and draining and are available as an option on most insulator bodies.

Cantilever Beam Card Edge offers a variety of card slot depths. A full scoop option is available for ease of installation in applications where visibility is limited.

Contact options vary in this series from dual row standard contacts, single row options and press-fit.

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980
- Certified by Canadian Standards Association, File No. LR49571

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—600 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Ordering Information

Acquired Part Number

C8D52DS29C1M191 — Insulator with molded-in polarizing key with card guide chamber. The card slot lengths are 1.900 [48.26] and 3.200 [81.28]. Includes retention tails for .062 [1.57] PCB to hold connectors securely during handling.

C8D52DS29C1M195 — Same as above. No retention tails.

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—600 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Cantilever Series .156 x .200 [3.96 x 5.08] Centerline, Dip Solder Tails, .300 [7.62] Card Slot Depth

Physical Properties:

Insulation Resistance—5000 megohms minimum.
Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.
Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black
Contacts—High strength copper alloy.
Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—1500 VDC (sea level)
Current Rating—3 Amperes
Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C
Temperature Cycling—MIL-STD-202 method 107
Vibration—MIL-STD-202 method 204

Related Product Data:

Daughter Card Edge Pattern—page 57

Mounting Styles

Centered Mounting Ear
.125 [3.18] Thru Hole

Centered Mounting Ear
4-40 Threaded Insert

No Mounting Ears

Flush Mounting Ear
.125 [3.18] Thru Hole

Flush Mounting Ear
4-40 Threaded Insert

Product Facts

- Sizes from 6 to 65 dual positions.
- Contact mating surface optimizes reliability by concentrating the normal force in the actual contact area.
- Mounting ear options accommodate both Panel and PC Board attachment.
- Solder stand-offs facilitate cleaning.
- Bifurcated contact design provides redundant points of contact to maximize reliability.
- Tail lengths available to accommodate .062" [1.57] through .125" [3.18] thick PCB Boards and Wire Wrap termination.
- Straight or Right Angle contact configurations.

Bifurcated contact design provides maximum reliability

Description/Application

The modified bellows card edge connectors are dual readout and are designed for reliable termination to double sided PCB boards.

Modified Bellows

The modified bellows card edge connector offers a variety of tail lengths for solder and wire wrap applications. Contacts are available in straight tail or right angle configurations to meet your individual purpose. The modified bellows line of connectors offers a variety of card slot depths and has optional high temperature plastic insulators.

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—600 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—600 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Electronics

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—600 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Related Product Data:

Polarization Key—page 57

Daughter Card Edge Pattern—page 57

Modified Bellows Connectors .125 x .250 [3.18 x 6.35], Centerline Straight Dip Solder and Wire Wrap Tails

P=.040 [1.02] Dip Solder Applications
P=.042 [1.07] For Wire Wrap Applications

Mounting Styles

Centered Mounting Ear
4-40 Threaded Insert

No Mounting Ears

Electronics

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—1000 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature—-55°C to +125°C

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Product Facts

- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E60980 
- Certified by Canadian Standards Association, File No. LR49571 

Physical Properties:

Insulation Resistance—5000 megohms minimum.

Insertion/Withdrawal Force (Daughter Card)—8 oz./2 oz. [35.6 N/ 8.9 N] average contact pair using .0620 [1.57] steel blade.

Insulator Body—Glass filled thermoplastic, UL rating 94V-0. High temp. plastic option is available; add suffix M399 to part number.

Color—Black

Contacts—High strength copper alloy.

Contact Plating—.000050 [0.00127] nickel underplate with .000030 [0.00076] gold in the mating area, tin/lead on tails, .000100 [0.00254] minimum

Electrical Properties:

Operation Voltage—1500 VDC (sea level)

Current Rating—3 Amperes

Initial Contact Resistance—10 milliohms

Environmental Properties:

Operating Temperature— -55°C to $+125^{\circ}\text{C}$

Temperature Cycling—MIL-STD-202 method 107

Vibration—MIL-STD-202 method 204

Description/Application

Tyco Electronics can provide polarization keys in the basic configuration shown on this page. Our Modified Bellows and Cantilever Beam Series Card Edge Connectors use these keys. The part number and the connector series for which it was designed are listed in the table below.

Card Edge Polarization Keys

Ordering Information

Acquired Part Number	Used on Connector Series	Shown on Pages
98014-01	Modified Bellows	41-56
98014-01	Cantilever Beam	28-40

Card Edge Connectors Recommended Daughter Card Edge Pattern

Per MIL-C-21097E

Daughter Card

Contact Spacing Non-Accum.	Dim A ±.005 (.13)	Dim B
.100 [2.54]	.093 [2.36]	.052 [1.32]
.125 [3.18]	.093 [2.36]	.052 [1.32]
.156 [3.96]	.105* [2.67]	.094 [2.39]

* Except MIL-C-21097E 8-4 which is .070 [1.78]

NOTES:

1. Dimensions are in inches
2. Unless otherwise specified, tolerance is ±.005 [0.13 mm] for three place decimals.
3. Number of contact fingers shall be the same as the corresponding printed wiring connector.

Product Facts

- Low profile housing is .460 [11.68] deep
- 6 through 43 dual positions on .156 [3.96] centerline; 6 through 50 dual positions on .125 [3.18] centerline
- Solder eyelet for wire-to-board or solder post for mother-daughter board application
- Selective gold plating of contact area for high performance at low cost
- Alternate platings are available on request
- Contacts bifurcated for redundancy
- Tin plate for high solderability of solder eyelets and posts
- Accepts .055-.070 [1.40-1.78] thick printed circuit boards
- Housings available with or without mounting ears
- Intercontact keying available
- UL 94V-0 rated, glass-filled polyester housings
- Variety of solder post lengths
- 5 ampere current rating per contact*
- Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476

Low Profile Connectors

For printed circuit board packaging, AMP Low Profile Edge Connectors provide high performance, low cost connections on .125 [3.18] and .156 [3.96] centerline spacings. .100 [2.54] centerline connectors can be made available, consult Tyco Electronics.

Mounted connector housings extend only .460 [11.68] from the mother board to allow efficient use of available space.

These low profile connectors are available in 6 through 43 dual position sizes on .156 [3.96] centerline spacing and with 6 through 50 dual positions on .125 [3.18] centers. Connectors are supplied

with either solder posts for mother-daughter board applications or solder eyelet contacts for wire-to-board use.

Low Profile Edge Connectors feature clear slot entry and accept .055-.070 [1.40-1.78] thick double-sided printed circuit boards. Solder posts are available with .150 [3.18] and .180 [4.57] long tails on .140 [3.56] or .200 [5.08] row-to-row spacing.

Impact-resistant thermoplastic housing, UL rated 94V-0, have molded-in cavity identification and are available with or without mounting ears. Additional features of the housings include intercontact keying

provisions, probe slots and identification of number one position.

The precision formed contacts made of phosphor bronze are gold plated on the contact mating surface only. This selective plating provides high reliability while maintaining low cost. Solder eyelets and posts are tin plated for excellent solderability. The contact is bifurcated for redundancy. Shorting contacts are available.

All connector configurations are furnished preloaded. Selectively loaded connectors can be made available for added economy.

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

Low Profile Connectors, .125 [3.18] Centerline

Material and Finish:

Housing—Green, glass-filled polyester

Contacts—Phosphor bronze, duplex plated .000030 [0.00076] gold in contact area; .000100 [0.00254] bright tin on posts, with entire contact under-plated .000030 [0.00076] nickel

.125 [3.18] Centerline Boards

.156 [3.96] Centerline Boards

Product Facts

- Wide variety of sizes available from 3 dual positions and up—no initial tooling investment required for new versions
- Connectors can be selectively loaded with contacts in custom patterns
- Connectors tooled on all standard centerlines—.100 [2.54], .125 [3.18], .150 [3.81], .156 [3.96], and .200 [5.08]

Note: .200 [5.08] centerline capabilities provided by loading every-other dual position of .100 [2.54] centerline housings.

- Closed card entry protects contacts and daughter board pads
- Adapts to a wide range of mother board thicknesses to .104 [2.64] maximum
- Phosphor bronze contacts selectively plated for top performance and maximum economy
- Protective channel helps prevent overstress of contacts
- Daughter board keying available in intercontact or on-contact styles
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476

Twin Leaf Mother Board Connectors

The AMP Twin Leaf Connector is a highly reliable, low-cost mother/daughter board connector designed for solid-state circuitry. The one-piece, multi-contact connector requires no front-end tooling. This versatile connector for double-sided printed circuit boards uses preloaded contacts and selective plating to give lowest applied cost. Critical contact areas are gold-over-nickel plated to provide positive electrical connection between contacts and daughter board pads. Contact posts are tin plated for efficient dip soldering to mother boards up to .104 [2.64] thick. The Twin Leaf Connector delivers high reliability because the contacts possess superior tolerance of environmental stresses including shock, vibration and variations of temperature and humidity. Other characteristics such as high insulation resistance, low

termination resistance, long life and moderate contact separation force meet industry requirements for reliability. Connectors are tooled in sizes from 3 through 80 dual-contact positions with contacts on .100 [2.54], .125 [3.18], .150 [3.81], .156 [3.96] or .200 [5.08] centers. Other sizes and custom-loaded contact patterns are available on request. The connector housing, made of glass-filled polyester with a UL 94V-0 rating, features a standoff which facilitates the use of a probe for electrical continuity checks without risk of damage to the contacts. A closed card-entry design of the housing protects the contacts and daughter board pads. Housings accept daughter boards ranging from .055 [1.40] to .070 [1.78] in thickness. Intercontact and on-contact keys are available for polarization of the housings.

Card guides or end caps make alignment of daughter board pads with Twin Leaf Connector contacts quick and easy.

Performance Specifications

Contact Rating*:

3 amperes continuous

Temperature Rating:

-55°C to +105°C

Insulation Resistance:

5,000 megohms

Dielectric Withstanding Voltage:

Altitude	Test Voltage (AC, RMS)	
	Contact Spacing	
	.100 [2.54]	.150 [3.81]
Sea Level	1,000	1,500
50,000 ft 15 240 m	400	600
70,000 ft 21 336 m	280	400

Termination Resistance:

10 milliohms, max.

Durability: Tested to 100 cycles (engage/withdraw)

Contact Plating: .000015 [0.00038] selective gold plating on contact area; bright tin on solder tie

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

Rotary Cam ZIF Connectors

Product Facts

- Zero insertion force; little or no effort required to insert and withdraw PC boards
- Reduced pad wear for extended board life
- Allows all four sides of board to be used for input/output functions
- Accepts double-sided boards
- Three contact styles to choose from: vertical solder post, right-angle solder post and wrap-type post (2 and 3 high)
- Available in .100 [2.54], .125 [3.18] and .156 [3.96] centerlines
- Three configurations available: open one end, open both ends and closed both ends
- Products indicated are recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476

Performance Specifications

Current vs. Temperature Rise*:
3 amperes at 30°C

Operating Temperature:
-55°C to +105°C

Contact Resistance:
20 milliohms max.

Durability: Tested to 5000 cycles

AMP Rotary Cam Zero Insertion Force (ZIF) Card Edge Connectors are available in sizes to fit most industry-standard printed circuit boards. A clockwise rotation of the cam handle opens contacts to allow zero-force insertion or removal of PC boards—even boards with a large number of contacts. Turning the cam handle to close the connector locks the board securely in place. Rotary Cam ZIF Connectors accept double-sided PC boards .054-.070 [1.37-

1.78] thick, with contact centerline intervals of .100 [2.54], .125 [3.18] and .156 [3.96]. Row-to-row spacing of connector posts is .200 [5.08] for .100 [2.54] and .156 [3.96] connectors and .250 [6.35] for .125 [3.18] connectors.

Contacts are nickel under-plated phosphor bronze with gold plate in the contact area and tin-lead plated posts. Contact configurations include vertical and right-angle solder posts and wrap-type posts. Preassembled connectors

feature housings made from 94V-0 rated glass-filled polyester and mounting ears for easy mounting to the mother board. Housings are available with one end open, both ends open and both ends closed for side and top daughter board insertion. Integral board locks secure boards in the connectors. Accessories include dust covers, cam rods (with and without boots) and cam keys for nut-driver actuation and for tandem operation of connectors.

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

Vertical Connector, Solder Post Terminals

Material and Finish:

Housing—Glass-filled polyester,
94V-0 rated

Contacts—Phosphor bronze, plated
.000030 [0.00076] gold per MIL-G-
45204 in contact area; .000100

Special Application

Tandem Application

Note: Contact Tyco Electronics for information concerning special tandem connectors.

Linear ZIF Connectors

Product Facts

- Minimizes force needed to install and remove printed circuit boards
- Available in lever and bell crank styles
- Lever styles allow side and top card entry
- Wiping action contacts enhance electrical properties
- Contacts on .100 x .100 [2.54 x 2.54] or .125 x .125 [3.18 x 3.18] centers
- .025 [0.64] square posts
- Accepts PC boards from .054 to .070 [1.37 to 1.78] in thickness
- Normally closed design leaves springs in relaxed position
- 50 to 175 dual positions available on .100 [2.54] centerline connectors and 40 to 140 dual positions available on .125 [3.18] centerline connectors

Performance Specifications

Current vs. Temperature Rise*:
3 amperes at 30°C

Operating Temperature:
-65°C to +85°C

Contact Resistance:
16 milliohms max.

Durability: Tested to 250 cycles
(board-to-contact actuation)

*Consult Tyco Electronics engineering when paralleling contacts for power applications.

AMP Linear Zero Insertion Force (ZIF) PC Board Edge Connectors are available in both lever and bell crank actuated styles and can be provided as panel assemblies, separate housings and contacts or as pre-assembled with solder post terminals.

Panel assemblies include a housing with ACTION PIN press-fit solderless contacts mounted on an epoxy board for rack application. Separate housing assemblies and ACTION PIN contacts allow customer assembly. These can be mounted as close as .625 [15.88]. More design latitude for high density application is provided by the side entry lever-type connector, permitting use of all sides of the PC board for edge-type I/O connections (see page 133). Where solder applications are

required, Tyco Electronics has a line of preassembled connectors with tin-plated solder terminals. All these configurations are available in a broad range of sizes.

With ZIF style connectors, intermittencies can occur if a contact comes to rest on a piece of foreign matter (dust and dirt particles) found on PC boards. To decrease the probability of this happening, all connectors have been designed to include a wiping contact which produces a wiping action. This action, produced by the geometry and bending movements of the beam, pushes aside debris and allows for good electrical connection by cleaning the actual point of contact.

In addition, all connectors have removable wings which make it possible to repair or replace damaged cam rails, handles, contacts

and housing modules without removing the entire housing assembly from the board.

Linear ZIF Connectors (Continued)

**AMP ACTION PIN
Press-Fit Contacts**

ACTION PIN contacts provide a reliable press-fit connection. Localized pressure in the interface area entails oxide break-through and helps prevent corrosion in the harshest environments to provide a reliable connection virtually every time. Also, radial and axial distortion are controlled to meet today's standards for multilayer board applications.

PC Board Thickness

ACTION PIN contacts are designed for use in a variety of PC board thicknesses. However, certain ACTION PIN contacts are to be used in specific ranges of board thicknesses. To promote optimum performance, the recommended board thicknesses provided with the connector being used must be followed.

- ① Annular Ring (See Note)
- ② Drilled Hole
- ③ Copper Thickness
- ④ Tin-Lead Thickness
- ⑤ Plated Through-Hole

ACTION PIN Contact/PC Board Applications

Connector Type	ACTION PIN Contact Material Thickness	Drilled Hole Diameter ^②	Plating Thicknesses		Plated Through-Hole Diameter ^⑤	Radial Hole Distortion	
			Copper ^{③*}	Tin-Lead ^④		Average	Maximum
Linear ZIF	.025 0.64	.0453±.001 1.151±0.03	.001-.003 0.03-0.08	.0003 0.008 Min.	.037-.043 0.94-1.09	Not Specified	Not Specified

*Maximum hardness of copper layer is 150 Knoop.

Note: Recommended annular ring diameter is hole diameter plus .020 [0.51].

Linear ZIF Connectors (Continued)

Tooling

Assembly tooling is not required except when using connectors with ACTION PIN contacts. ACTION PIN contact assembly requires an arbor-style bench tool with a capacity of 40 lb [178 N] per contact, a support fixture, contact applicator, carrier removal tool and housing assembly tool.

Typical procedure is to place a PC board on the support fixture, insert contact combs into the printed circuit board with the contact applicator and seat with the arbor tool. Next, remove the carrier strip from the contact combs with the carrier break-off tool. Place the housing over the contacts with the housing assembly tool, and repeat the entire process until the board is complete.
