

VGA to DVI and HDMI

VGA to VGA cables

VDC's comprehensive range of male to male and male to female VGA cables are competitively priced without any compromise on quality. All cables are manufactured exclusively for VDC from a tough yet flexible blue VGA cable, which uses true 75 Ohm coaxial elements for red, green and blue (RGB). Horizontal and vertical syncs and ID bit data functions are connected with paired and single tracer wires. In common with VGA conventions, pin 9 is unconnected. New for this catalogue is a range of assemblies that use right angled male connectors- ideal for use with floor dip box systems, wall mounted panels

and in situations where monitors need to be mounted flush to a wall.

Order code	Description
104-048-102	VGA male ~ female 2 m
104-222-103	VGA male ~ female 3 m
104-224-106	VGA male ~ female 6 m
104-226-110	VGA male ~ female 10 m
104-227-115	VGA male ~ female 15 m
104-228-120	VGA male ~ female 20 m
104-230-130	VGA male ~ female 30 m
104-232-150	VGA male ~ female 50 m

104-233-005	VGA male ~ male 0.5m
104-234-202	VGA male ~ male 2 m
104-236-203	VGA male ~ male 3 m
104-238-206	VGA male ~ male 6 m
104-240-210	VGA male ~ male 10 m
104-241-215	VGA male to male 15 m
104-242-220	VGA male ~ male 20 m
104-244-230	VGA male ~ male 30 m
104-246-250	VGA male ~ male 50 m
104-300-301	1M R/angle VGA male to female
104-300-303	3M R/angle VGA male to female
104-300-305	5M R/angle VGA male to female
104-400-401	1M R/angle VGA male to male
104-400-403	3M R/angle VGA male to male
104-400-405	5M R/angle VGA male to male
