

Current Limiting Diode

1N5283 Thru 1N5314 JEDEC DO-35 Case

FEATURES

- LOW COST
- HIGH RELIABILITY
- SMALLER CASE SIZE THAN COMPETITION
- SPECIAL SELECTIONS AVAILABLE
- SUPERIOR LOT-TO-LOT CONSISTENCY
- SURFACE MOUNT DEVICES AVAILABLE

DESCRIPTION

The CENTRAL SEMICONDUCTOR 1N5283 series types are silicon field effect current regulator diodes designed for applications requiring a constant current over a wide voltage range. These devices are manufactured in the cost-effective DO-35 double plug case which provides many benefits to the user, including space savings and improved thermal characteristics. Special selections of I_p (regulator current) are available for critical applications. Lower cost units are available in the CCL0035 series.
