PRODUCT DESCRIPTION

When it comes to magnifiers, Big Eye™ has been one of the most popular models since its inception. Industrial quality construction, superb optical characteristics, and new energy efficient slim bulb technology... the Big Eye™ is head and shoulders above the rest. Made in the USA.

Our famous Big Eye™ is one of our largest Magnilites®! The crystal clear 7.5" diameter lens is made of optical quality glass. Configured standard with a 4 Diopter (2X) lens, but also available with a 5 Diopter (2.25X) optical quality lens. The Big Eye™ has all metal construction, which affords ESD safety by design. The slim, spun aluminum shade provides low profile viewing, with superb weight savings.

The new slim T5 bulb allows the Big Eye™ to provide more light to the work surface, with less power consumed than ever before! Like all O.C. White models, the Big Eye™ is easily positioned on our specialized Ultraflex® armatures, for precision placement, and superb holding power over time. See why the Big Eye™ leads the world in quality and viewing area compared to other smaller round magnifiers.

- Made in the USA
- ESD safe and RoHS compliant
- Crown white optical grade, 7.5" Round Lens for highest resolution images
- Shadowless 10", T5 bulb for uniform lighting at any level
- 4 Diopter (2X) lens standard, 5 Diopter (2.25x) optional
- Rugged all metal construction
- Table edge clamp and other mounting choices
- Also available in 230v

SPECIFICATIONS

Name	Magnilite® - 7.5" Big Eye™ Round Magnifier - 43" Reach - Screw Down Base
SKU	52300-4
Product Line	Magnilite®
Magnification	2x (4 Diop) 2.25x (5 Diop) Optional
Reach	43"
Mounting Style	Screw Down Base
Voltage	120 Volt
ESD Safe	Yes
