

Fiber Optic Indoor/Outdoor Cables (4 - 144 Fibers)

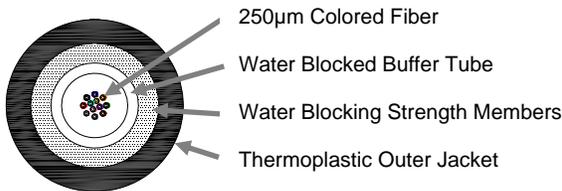

**Central Tube Gel Filled
4-12 Fiber**

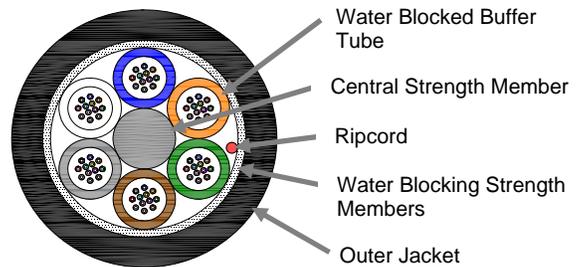

**Multi-Tube Gel Filled
24-144 Fiber**

The number of tubes changes depending on fiber count.

**Central Tube Dry (Gel Free)
6-12 Fiber**

**Multi-Tube Dry (Gel Free)
24-144 Fiber**

The number of tubes changes depending on fiber count.

Description:

AMP NETCONNECT indoor/outdoor cables are designed to save space and time and simplify fiber storage and management by bypassing the need for a transition point and splicing when entering buildings. Indoor/Outdoor cables can be used in properly installed conduit between buildings and go directly into the building riser spaces (or plenum spaces if a plenum version is used). The cables consist of 250µm inked fibers encased in color coded buffer tubes with either water-barrier gel filling compound or dry (gel free) water blocking technology. Central tube designs (4 to 12 fibers) include a single tube surrounded by water blocking strength members and a flexible thermoplastic outer jacket. Stranded tube designs (24 to 144 fibers) include multiple tubes stranded around a central strength member, then covered by water blocking strength members and a flexible thermoplastic outer jacket. The cables are available in Riser and Plenum constructions with single-mode OS2, 62.5/125 µm OM1, 50/125 µm OM2, 50/125 µm OM3, or 50/125 µm OM4 fiber. Black is the standard jacket color, and is necessary for sunlight resistance. All of the other colors should be installed in conduit.

Standards Compliance:

AMP NETCONNECT Indoor/Outdoor cables are designed and tested to conform to the fiber and cable performance requirements of TIA 568, ISO 11801, Telcordia GR-409-CORE and ICEA-696 Standards. All cables have UL or ETL fire safety listings to either OFNR (UL-1666/CSA FT-4) or OFNP (NFPA-262/UL 910/CSA FT-6).

Cable Print:

Cables will be marked every two feet with:

AMP NETCONNECT OPTICAL CABLE I/O <fiber count> <fiber type> <flame rating> MM/YY <shop order number> XXXXX FEET

Fiber Optic Indoor/Outdoor Cables (4 - 144 Fibers)

Performance Specifications:

AMP NETCONNECT indoor/outdoor cables are designed and tested in accordance with TIA 568, ISO 11801, ICEA 696, Telcordia GR-409-CORE and UL 1666/901. Performance specifications are measured in accordance with the Fiber Optic Test Procedures (EIA/TIA-455 documents) and the test procedures of IEC 60793 and IEC 60794.
