**The counter that we use increments 10 times per revolution.
Therefore, if the lead screw pitch is 0.100 inch, the resolution is 0.01".**

**You can purchase the counter from Danaher Controls

Small Square Case Counters . . . compact, lightweight, highly-reliable mechanical totalizers, available in rotary and ratchet drives

A very popular family of flange mount case, 5-figure nonreset totalizers. All models feature a scratch resistant front crystal, smooth low torque operation, and dust resistant construction.

- Precision design provides smooth operation and long service life
- Easy to see display – High contrast white-on-black figures
- Scratch resistant front crystal
- Stainless steel drive shaft; Tough molded case and internal parts
- Lubrication never required
- Compact and lightweight
- Wide temperature range, -40° to +160°F (-40° to +57°C)

Models are available with input shaft drives which count from a ratcheting motion, or rotary drives with count per revolution ratios of 1:1, 10:1, or 1:10.

Where order quantities permit, many special variations are possible, such as: 6 or 7 figures, mounting options, double-ended shaft, and reverse display colors.
