# 74LCX245 Low Voltage Bidirectional Transceiver with 5V Tolerant Inputs and Outputs

#### **Features**

- 5V tolerant inputs and outputs
- 2.3V to 3.6V V<sub>CC</sub> specifications provided
- 7.0ns  $t_{PD}$  max.  $(V_{CC} = 3.3V)$ ,  $10\mu A I_{CC}$  max.
- Power down high impedance inputs and outputs
- Supports live insertion/withdrawal<sup>(1)</sup>
- $\pm 24$ mA output drive ( $V_{CC} = 3.0$ V)
- Implements proprietary noise/EMI reduction circuitry
- Latch-up performance exceeds 500mA
- ESD performance:
  - Human body model > 2000V
  - Machine model > 200V
- Leadless DQFN package

#### Note:

 To ensure the high-impedance state during power up or down, OE should be tied to V<sub>CC</sub> through a pull-up resistor: the minimum value or the resistor is determined by the current-sourcing capability of the driver.

# **General Description**

The LCX245 contains eight non-inverting bidirectional buffers with 3-STATE outputs and is intended for bus oriented applications. The device is designed for low voltage (2.5V and 3.3V)  $V_{CC}$  applications with capability of interfacing to a 5V signal environment. The  $T/\overline{R}$  input determines the direction of data flow through the device. The  $\overline{OE}$  input disables both the A and B ports by placing them in a high impedance state.

The LCX245 is fabricated with an advanced CMOS technology to achieve high speed operation while maintaining CMOS low power dissipation.

# **Ordering Information**

| Order Number               | Package<br>Number | Package Description   |
|----------------------------|-------------------|---|
| 74LCX245WM                 | M20B              | 20-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-013, 0.300" Wide                  |
| 74LCX245SJ                 | M20D              | 20-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide                               |
| 74LCX245BQX <sup>(2)</sup> | MLP20B            | 20-Terminal Depopulated Quad Very-Thin Flat Pack No Leads (DQFN), JEDEC MO-241, 2.5 x 4.5mm |
| 74LCX245MSA                | MSA20             | 20-Lead Shrink Small Outline Package (SSOP), JEDEC MO-150, 5.3mm Wide                       |
| 74LCX245MTC                | MTC20             | 20-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 4.4mm Wide                 |

#### Note:

2. DQFN package available in Tape and Reel only.

Device also available in Tape and Reel. Specify by appending suffix letter "X" to the ordering number.

All packages are lead free per JEDEC: J-STD-020B standard.

Pin Assignments for SOIC, SOP, SSOP, and TSSOP

Pin Assignment for DQFN

# **Pin Description**

| Pin<br>Names                   | Description                      |  |  |
|--------------------------------|----------------------------------|--|--|
| ŌĒ                             | Output Enable Input              |  |  |
| T/R                            | Transmit/Receive Input           |  |  |
| A <sub>0</sub> -A <sub>7</sub> | Side A Inputs or 3-STATE Outputs |  |  |
| B <sub>0</sub> –B <sub>7</sub> | Side B Inputs or 3-STATE Outputs |  |  |
| DAP                            | No Connect                       |  |  |

Note: DAP (Die Attach Pad)

# **Logic Symbol**

#### **Truth Table**

| Inputs |     |  |  |
|--------|-----|--|--|
| OE     | T/R | Outputs  |  |
| L      | L   | Bus B <sub>0</sub> – B <sub>7</sub> Data to Bus A <sub>0</sub> – A <sub>7</sub>                  |  |
| L      | Н   | Bus $A_0 - A_7$ Data to Bus $B_0 - B_7$  |  |
| Н      | Х   | HIGH Z State on A <sub>0</sub> – A <sub>7</sub> , B <sub>0</sub> – B <sub>7</sub> <sup>(3)</sup> |  |

H = HIGH Voltage Level

L = LOW Voltage Level

X = Immaterial

Z = High Impedance

#### Note:

3. Unused bus terminals during HIGH Z State must be held HIGH or LOW.

# **Logic Diagram**

# **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol           | Parameter                                    | Rating                          |
|------------------|--|---------------------------------|
| V <sub>CC</sub>  | Supply Voltage                               | -0.5V to +7.0V                  |
| V <sub>I</sub>   | DC Input Voltage                             | -0.5V to +7.0V                  |
| Vo               | DC Output Voltage                            |                                 |
|                  | Output in 3-STATE                            | -0.5V to +7.0V                  |
|                  | Output in HIGH or LOW State <sup>(4)</sup>   | -0.5V to V <sub>CC</sub> + 0.5V |
| I <sub>IK</sub>  | DC Input Diode Current, V <sub>I</sub> < GND | _50mA                           |
| I <sub>OK</sub>  | DC Output Diode Current                      |                                 |
|                  | V <sub>O</sub> < GND                         | _50mA                           |
|                  | $V_O > V_{CC}$                               | +50mA                           |
| Io               | DC Output Source/Sink Current                | ±50mA                           |
| I <sub>CC</sub>  | DC Supply Current per Supply Pin             | ±100mA                          |
| I <sub>GND</sub> | DC Ground Current per Ground Pin             | ±100mA                          |
| T <sub>STG</sub> | Storage Temperature                          | −65°C to +150°C                 |

#### Note:

4. IO Absolute Maximum Rating must be observed.

# Recommended Operating Conditions<sup>(5)</sup>

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to absolute maximum ratings.

| Symbol                            | Parameter  | Min. | Max.            | Units |
|-----------------------------------|--|------|-----------------|-------|
| V <sub>CC</sub>                   | Supply Voltage   |      |                 |       |
|                                   | Operating  | 2.0  | 3.6             | V     |
|                                   | Data Retention   | 1.5  | 3.6             |       |
| VI                                | Input Voltage  | 0    | 5.5             | V     |
| Vo                                | Output Voltage   |      |                 |       |
|                                   | 3-STATE  |      | 5.5             | V     |
|                                   | HIGH or LOW State  | 0    | V <sub>CC</sub> |       |

| t <sub>PLZ</sub> , t <sub>PHZ</sub> | Output Disable Time  | 1.5   | 7.5  | 1.5                           | 8.5  | 1.5   | 9.0  | ns    |
| toshl, toslh                        | Output to Output Skew <sup>(7)</sup>   |   | 1.0  |                               |      |   |      | ns    |

## Note:

7. Skew is defined as the absolute value of the difference between the actual propagation delay for any two separate outputs of the same device. The specification applies to any outputs switching in the same direction, either HIGH-to-LOW (t<sub>OSHL</sub>) or LOW-to-HIGH (t<sub>OSLH</sub>).

# **Dynamic Switching Characteristics**

|                  |   |                     |   | $T_A = 25^{\circ}C$ |      |
|------------------|---|---------------------|---|---------------------|------|

#### DISCLAIMER

**FPS™** 

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
- 2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

#### **ANTI-COUNTERFEITING POLICY**

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com,

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to process and substituted in the proliferation of counterfeit parts. Fairchild strongly encourages customers by purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

#### PRODUCT STATUS DEFINITIONS

#### Definition of Terms

| Definition of Terms             |                       |  |  |  |  |  |
|---------------------------------|-----------------------|--|--|--|--|--|
| <b>Datasheet Identification</b> | Product Status        | Definition   |  |  |  |  |
| Advance Information             | Formative / In Design | Datasheet contains the design specifications for product development. Specifications may chan in any manner without notice.  |  |  |  |  |
| Preliminary                     | First Production      | Datasheet contains preliminary data; supplementary data will be published at a later date. Fairch Semiconductor reserves the right to make changes at any time without notice to improve design. |  |  |  |  |
| No Identification Needed        | Full Production       | Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.  |  |  |  |  |
| Obsolete                        | Not In Production     | Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. The datasheet is for reference information only.   |  |  |  |  |
