

Datasheet

IEC Twist Melt Bolt Thermocouple with Standard Thermocouple Plug

Type J or K with 20mm blade tip

- Type 'J' or 'K' twist melt bolt thermocouple
- Rotational blade style tip allowing correct positioning for reduced resistance in the melt flow
- Widely used in plastics extruders and injection moulders
- Designed to withstand high pressure applications experienced with molten plastics & polymers
- Stainless steel bolt with 1/2" UNF-20 2A thread
- 152mm stem length
- 20mm long blade tip immersion length
- Temperature range to 400°C
- Grounded hot junction
- Standard plug termination (round pin)
- Tolerance & colour code in accordance with IEC-584 specification

T/C Type	Thread	Stem Length	Tip Immersion Length	RS order code
J	1/2"UNF-20	152mm (6" inch)	20.0mm	872-2783
K	1/2"UNF-20	152mm (6" inch)	20.0mm	872-2792

Optional mating socket:

RS order code:

Type J 455-9950

Type K 455-9972

RS206/0816
