

# LED LENSER® P17.2

Professional users seeking the hand-held reassurance of a heavy, longer-bodied torch will thrill to the P17.2, a superb quality torch from German world leader LED Lenser. Made from uncompromisingly tough, aircraft-grade aluminium for protection against knocks and shocks, it weighs 773g and measures 306mm in length. As you would expect from such a large torch it boasts big performance figures too: it has a sensational CREE LED light chip delivering up to 450 lumens brightness, a maximum beam distance of 420 metres and as long as 300 hours burn time. The calibrated reflector lens incorporates the highly-regarded, patented Advanced Focus System to generate homogenous bright white light from spot through to flood beam, without the dark spots or light rings that often make viewing perplexing and uncomfortable in lower-spec torches. A Dynamic Switch on the end of the housing allows the user to select and regulate between Boost, Power and Low Power light options in milliseconds with just one hand. In response to suggestions from first responders like emergency services personnel, rescue teams, military and police officers, this switch has been made extra-large to make it easier to switch on when wearing gloves, while the barrel has been given an understated anodised matt finish for improved all-round grip. Like most LED Lenser torches the P17.2 has internal gold-plated battery contacts for improved energy conductivity and resistance to corrosion. Supplied with 3 x D batteries and a 360° rotating belt-clip for hands-free directional lighting.

As a leading international brand of hand-held torches and head lamps, LED Lenser is renowned for superior German engineering, outstanding performance, and state-of-the art technologies, such as the patented Advanced Focus System and Smart Light Technology. Constantly driving innovation to provide class- leading lighting instruments, LED Lenser is the brand of choice for professional tradesmen, emergency services personnel, search & rescue teams and serious outdoor enthusiasts. LED Lenser hand torches and head lamps deliver breath-taking, bright homogenous white light, that turns night into day and simply has to be seen to be believed. Using only the finest materials, such as energy-efficient CREE LED light chips, aircraft-grade aluminium and gold-plated contacts, they are renowned for quality and have a reputation for reliability that is second to none.

- Brilliant heavy, longer-bodied torch offering Professionals superb performances and ultimate reassurance
- Energy efficient CREE Power+ LED Light Chip
- State-of-the-art, reliable German engineering
- Advanced Focus System™ Optics. Patented reflector and lens combination for intense spot (distance ) or flawless flood (near ) illumination
- Dynamic Switch™ - Reactive, large single switch controls light options (Power, Low Power, Boost) and is easier to use with gloves on.
- Speed Focus™ enables smooth single-handed beam focusing
- Recalibrated lens for wider light beam angle
- Robust, yet lightweight aircraft-grade aluminium housing
- Smart, anti-slip matt black finish
- User-friendly modular design
- Corrosion resistant gold plated contacts for better conductivity
- Water and dust resistant. IPX4

## Technical Information

Size: 306 x 53mm Ø

Power: 450 lumens max

Run Time: up to 300 hours

Beam Distance: up to 420m

Weight: 773grams

Supplied with : Belt Pouch, Wrist-Strap and Duracell® Batteries (3 x D Alkaline)
