

Blackhawk™ RES Pro Remote Emulation Server for XDS560-class Emulators

Compatible Operating Systems: Windows® 2000, XP

Description

The Blackhawk Remote Emulation Server Pro allows an XDS560-class emulator installed in a PC with Ethernet interface to be accessed over a local area network (LAN) from another PC running Code Composer Studio™. Users can share the latest high performance emulation technology from TI, reducing the need and cost for multiple units. This package contains all of the software necessary to setup a remote server for multiple machines. All other files are included with CCS and the emulator product.

Remote Emulation Server Pro supports any XDS560-class emulator supporting officially licensed TI XDS560 interfaces. This includes emulators from Texas Instruments, Blackhawk and other 3rd parties.

Blackhawk JTAG Emulators and Remote Emulation Server Pro are available from a world wide network of industry resellers.

Server Requirements

- PC running Windows® 2000 or XP
- Does not require Code Composer Studio Installed
- Ethernet or Wireless Networking under TCP/IP
- XDS560-class Emulator and Device Drivers
- CD-ROM drive for Server side software installation

Client Requirements

- PC running Windows® 2000 or XP
- Code Composer Studio v2.2 and later
- Ethernet or Wireless Networking under TCP/IP
- CD-ROM drive for Client side Software Installation

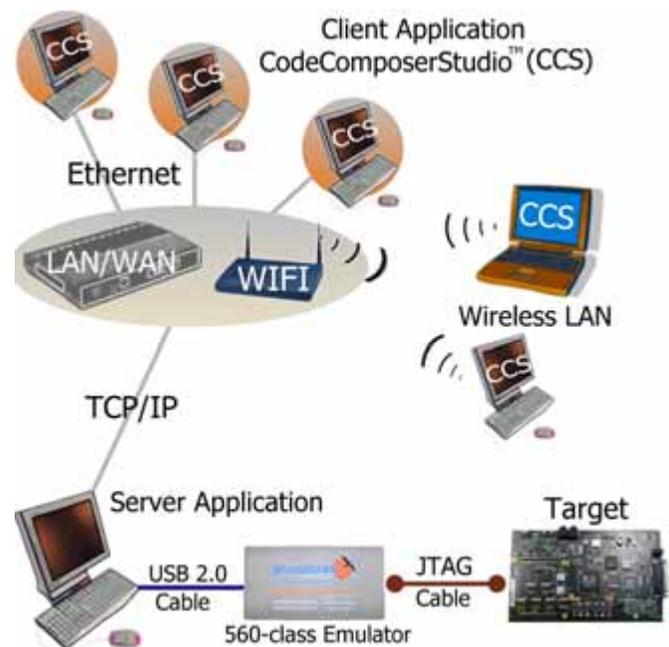

Part Number BH-RES-PRO

Features

- Client-Server Implementation
- High Performance
- Supports 10/100-Mbit Ethernet
- Uses TCP/IP protocols
- Quick Setup
- Compatible with Wireless Networks (802.11b, 802.11g)
- Seamless integration to Code Composer Studio

Benefits

- Flexible and Cost Effective
- Enables Remote Debugging
- Permits sharing emulation resources
- Extends XDS560-class Emulation
- Software-only solution to remote debugging

ABOUT BLACKHAWK

Blackhawk™ is the first to introduce a USB JTAG Emulator for Texas Instruments DSP's and is a member of the Texas Instruments Third Party Developers Network. Blackhawk™ is a business unit of EWA/EWA Technologies, Inc. with headquarters in Herndon, Virginia. Founded in 1977, EWA employs more than 1,000 people in eight operating units and associated activities around the world providing a wide range of IT applications to a broad constellation of government and commercial customers, including the US Department of Defense and all military services, national intelligence and law enforcement agencies, NASA, and international defense, security and banking organizations.
