Panasonic ideas for life

COMPACT FLAT SIZE FOR AUTOMOTIVE

CP RELAYS

RoHS compliant

FEATURES

Compact flat type

Flat size enables it to be built-in switch units

<Height>

PC board terminal type:

9.5 mm .374 inch

Surface-mount terminal type:

10.5mm .413inch

High capacity

CP Relay provides low profile spacesaving advantages while offering high continuous current of 25A (1 hour).

 Simple footprint pattern enables ease of PC board layout

Arrangement of coil and contact terminals designed to withstand large capacity which ensures leeway and facilitates PC board design.

Sealed construction

Sealed construction suitable for harsh environments

• "PC board terminal" and "Surface mount terminal" types available

SMD automatic mounting is possible for surface mount terminal types because tape and reel packaging is used.

• Model available for wiper load.

TYPICAL APPLICATIONS

For automotive system

Power windows, Auto door lock, Power sunroof, Memory seat, Wiper, Defogger, etc.

ORDERING INFORMATION

	СР					
Contact arrangement 1: 1 Form C 1a: 1 Form A 1W: 1 Form C for wiper load						
Mounting classification Nil: PC board terminal/wiper load SA: Surface-mount terminal*1		_				
Coil voltage (DC) 12 V						
Packing style*2 Nil: Tube packing X: Tape and reel packing (picked f	rom the N	NC te	rmin	nal side)	-)	

Tape and reel packing (picked from the coil terminal side)

TYPES

1. PC board terminal type

Contact arrangement	Coil voltage	Part No.
1 Form A		CP1a-12V
1 Form C	12V DC	CP1-12V
1 Form C for wiper load		CP1W-12V

Standard packing; Carton (tube): 40 pcs.; Case: 1,000 pcs.

2. Surface mount terminal type

Contact arrangement	Coil voltage	Part No.
1 Form C	12V DC	CP1SA-12V-X
	12V DC	CP1SA-12V-Z

Standard packing; Carton (tape and reel): 300 pcs.; Case: 900 pcs.

Notes: *1. Surface-mount terminal type is available only for 1 form C contact arrangement.

Surface mount terminal type is only supplied in tape and reel packaging. Tube packaging is only available for PC board type.
 Tape and reel packing symbol "-z" or "-x" are not marked on the relay.

RATING

1. Coil data

Nominal coil voltage	Pick-up voltage (at 20°C 68°F)	Drop-out voltage (at 20°C 68°F)	Nominal operating current [±10%] (at 20°C 68°F)	Coil resistance [±10%] (at 20°C 68°F)	Nominal operating power (at 20°C 68°F)	Usable voltage range (at 85°C 185°F)
12V DC	Max. 7.2V DC (Initial)	Min. 1.0V DC (Initial)	53.3 mA	225Ω	640 mW	10 to 16V DC

Note: Other pick-up voltage types are also available. Please contact us for details.

2. Specifications

1) Standard CP relay

	Mass			Approx.	4g .14 oz	

Notes: *1. This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.

- Please inquire if you will be using the relay in a high temperature atmosphere (110°C 230°F).

 *3. Depends on connection conditions. Also, this does not guarantee repeated switching. We recommend that you confirm operation under actual conditions.
- *4. Motor load does not apply to wiper load applications.

2) For wiper load (CP1W-12V)

Anything outside of that given below complies with standard CP relays.

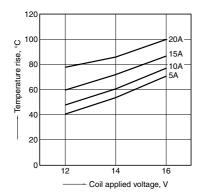

Characteristics	Item	Specifications	
Rating	Max. carrying current (12V DC initial)*1	N.O.: 25A for 1 minutes, 15A for 1 hour (at 20°C 68°F)	
Expected life	Electrical	<wiper (l="Approx." 1mh)="" load="" motor=""> N.O. side: Min. 5×10⁵ (Inrush 25A, steady 6A at 14V DC) N.C. side: Min. 5×10⁵ (12A 14V DC at brake current) (Operating frequency: 1s ON, 9s OFF)</wiper>	

Note: *1. Depends on connection conditions. Also, this does not guarantee repeated switching. We recommend that you confirm operation under actual conditions.

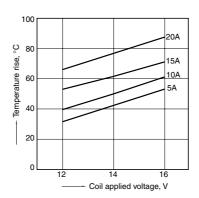

^{*2.} The upper operation ambient temperature limit is the maximum temperature that can satisfy the coil temperature rise value. Please refer to "Usage ambient condition" in CAUTIONS FOR USE OF AUTOMOTIVE RELAYS.

REFERENCE DATA

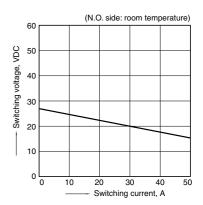

1.-(1) Coil temperature rise (at room temperature)
Sample: CP1-12V, 3pcs
Point measured: Inside the coil
Contact carrying current, 5A, 10A, 15A, 20A
Resistance method, ambient temperature 26°C 79°F

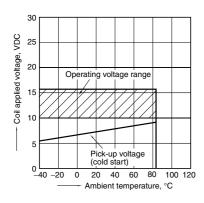

1.-(2) Coil temperature rise (85°C 185°F) Sample: CP1-12V, 6pcs Point measured: Inside the coil Contact carrying current, 5A, 10A, 15A, 20A Resistance method, ambient temperature 85°C 185°F

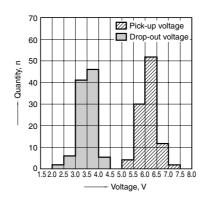

2. Max. switching capability (Resistive load, Initial)

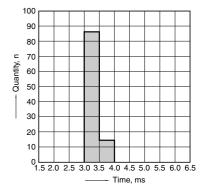

3. Ambient temperature and operating voltage range

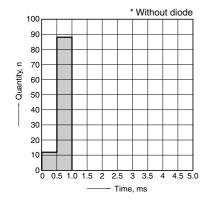

4. Distribution of pick-up and drop-out voltage Sample: CP1-12V, 100pcs Ambient temperature: 20°C 68°F

5. Distribution of operate time Sample: CP1-12V, 100pcs Ambient temperature: 20°C 68°F

6. Distribution of release time Sample: CP1-12V, 100pcs Ambient temperature: 20°C 68°F

7.-(1) Electrical life test (at resistive load) Sample: CP1-12V Quantity: n = 4 (N.C. = 2, N.O. = 2) Load: Resistive load (N.C. side: 10A 14V DC, N.O. side: 20A 14V DC)

Operating frequency: ON 1s, OFF 9s Ambient temperature: Room temperature

^{*} Dimensions (thickness and width) of terminal specified in this catalog is measured before pre-soldering. Intervals between terminals is measured at A surface level.

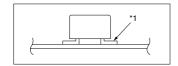

NOTES

1. Mounting and cleaning conditions for SMT type relays

- 1) Recommended reflow condition is:
- Reflow-soldering temperature profile condition (IRS method)

$$\begin{split} T_1 &= 150 \text{ to } 180^{\circ}\text{C } 302 \text{ to } 356^{\circ}\text{F} \\ T_2 &= 230^{\circ}\text{C } 446^{\circ}\text{F or more} \\ T_3 &= \text{Less than } 260^{\circ}\text{C } 500^{\circ}\text{F} \\ t_1 &= 60 \text{ to } 120 \text{ sec.} \\ t_2 &= \text{Less than } 40 \text{ sec.} \end{split}$$

- Cautions for mounting operations
 Temperature profile indicates the
 temperature of the soldered part (*1) of
 terminals on the surface of a circuit
 board. The exterior temperature of a relay
 may be extremely high depending on the
 component density on the board or the
 heating method of the reflow oven or
 circuit board type. Sufficient verification
 under actual processing conditions is
 required.
- 2) Avoid cleaning (ultrasonic cleaning, boiling cleaning, etc.) and coating in order to prevent negative impacts on relay characteristics.

2. Storage condition after opening a moisture-prevention package

- 1) After opening a moisture-prevention package, use the item as soon as possible (within 3 days under an environment of Max. 30°C 86°F, Max. 70% RH).
- 2) If products are not used within 4 days after opening a moisture-prevention package, store them in a humidity-controlled desiccator or in a storage bag with silica gel.

For general cautions for use, please refer to the "CAUTIONS FOR USE OF AUTOMOTIVE RELAYS"
