Perforated versions

Dimensions: mm (in.)

Material

Steel, zinc plated and chromated or Electrolytic copper

Description

WECO offers an assortment of mounting rails in accordance with DIN standards. All versions are available perforated or unperforated, and can be supplied in steel or copper depending on the type chosen.

The rails are manufactured in standard lengths of 2 meters, but can be cut to specified lengths if required. Please see the "How to Order" box for details.

For customers who wish to cut mounting rails in their own facility, WECO offers a DIN rail cutter. Please contact our customer service department for price and ordering information.

- For use with MRPA, MRKA, MAS, MTB, MTBL, MTD, MTDA, MTE, MTK, MHSA, MDD, MBC, MSG.
- As per DIN EN 50022, deep version
