

### “PGS” Graphite Sheets

Type: **EYG**

“PGS (Pyrolytic Graphite Sheet)” is a thermal interface material which is very thin, synthetically made, has high thermal conductivity, and is made from a highly oriented graphite polymer film. It is ideal for providing thermal management/heat-sinking in limited spaces or to provide supplemental heat-sinking in addition to conventional means. This material is flexible and can be cut into customizable shapes.

“SSM(Semi-Sealing Material)” is the product which is copounding PGS Graphite sheet and High thermal conductive Elastomer resin. It has a function to absorb heat by resin and release the heat by utilizing high thermal conductivity of PGS Graphite sheet. It also enables taking better attachment to the component which has different height on the electronic board, reducing stress to the electronic board.

#### Features

- Excellent thermal conductivity : 700 to 1950 W/(m·K)  
(2 to 5 times as high as copper, 3 to 8 times as high as aluminum)
- Lightweight: Specific gravity : 0.85 to 2.13 g/cm<sup>3</sup>  
(1/4 to 1/10 of copper, 1/1.3 to 1/3 of aluminum in density)
- Flexible and easy to be cut or trimmed. (withstands repeated bending)
- Low thermal resistance
- Low heat resistance with flexible Graphite sheet (SSM)
- Low elasticity and easy to keep the product's shape after attaching (SSM)
- Siloxane Free(SSM)
- High dielectric voltage : 17 kVac/mm (SSM)
- RoHS compliant

#### Recommended applications

- Smart phones, Mobile phones, DSC, DVC, Tablet PCs, PCs and peripherals, LED Devices
- Semiconductor manufacturing equipment (Sputtering, Dry etching, Steppers)
- Optical communications equipment

## Explanation of Part Numbers

\* Only S type supports 180×230 mm size.

(PGS thickness of 17 μm, 10μm does not support as single item)

\*\* PGS of 10 μm, 40 μm, 50 μm type is also possible to be made as lamination type.

\*\*\* The above-listed part number is sample part number for testing.

\*\*\*\* Please contact us about your request of custom part number which will be arranged separately.

\*\*\*\*\* Please contact us if quantity is below Minimum Order Quantity.

\* Only S type supports 180×230 mm size.

(PGS thickness of 17  $\mu$ m, 10 $\mu$ m does not support as single item)

\*\* PGS of 10  $\mu$ m, 40  $\mu$ m, 50  $\mu$ m type is also possible to be made as lamination type.

\*\*\* The above-listed part number is sample part number for testing.

\*\*\*\* Please contact us about your request of custom part number which will be arranged separately.

\*\*\*\*\* Please contact us if quantity is below Minimum Order Quantity.

## “PGS” (Pyrolytic Graphite Sheet) Heat sink sheet

### Handling Precautions

#### ⚠ Safety Precautions

- When using our products, no matter what sort of equipment they might be used for, be sure to make a written agreement on the specifications with us in advance. The design and specifications in this catalog are subject to change without prior notice.
- Do not use the products beyond the specifications described in this catalog.
- This catalog explains the quality and performance of the products as individual components. Before use, check and evaluate their operations when installed in your products.
- Install the following systems for a failsafe design to ensure safety if these products are to be used in equipment where a defect in these products may cause the loss of human life or other significant damage, such as damage to vehicles (automobile, train, vessel), traffic lights, medical equipment, aerospace equipment, electric heating appliances, combustion/gas equipment, rotating equipment, and disaster/crime prevention equipment.
  - \* Systems equipped with a protection circuit and a protection device
  - \* Systems equipped with a redundant circuit or other system to prevent an unsafe status in the event of a single fault

PGS (Pyrolytic Graphite Sheet) Heat sink sheet (hereafter referred to as PGS) may result in accidents or trouble when subjected to severe conditions of electrical, environmental and /or mechanical stress beyond the specified “Rating” and specified “Conditions” found in the Specifications. Please follow the recommendations in “Safety Precautions” and “Application Notes”. Contact our engineering staff or the factory with any questions.

#### 1. ⚠ Safety Precautions

- 1.1 The PGS shall be used within the specified operating temperature range.
- 1.2 The PGS is soft, do not rub or touch it with rough materials to avoid scratching it.
- 1.3 Lines or folds in the PGS may affect thermal conductivity.
- 1.4 The PGS shall not be used with acid.

The PGS shall not be used in contact with a soldering iron at 400 °C or more
- 1.5 The PGS shall not be exposed to salt water or direct sunlight during use. The PGS shall not be used in corrosive gases (hydrogen sulfide, sulfurous acid, chlorine, ammonia etc.).
- 1.6 Our PGS has been developed for general industry applications. Prior to using the PGS for special applications such as medical, work please contact our engineering staff or the factory.
- 1.7 Never touch a PGS during use because it may be extremely hot.
- 1.8 Since SSM Elastomer resin is soft, please do not preserve the parts adding weight.
- 1.9 Please do not use the parts at the status of hard foreign materials stuck such as metals in SSM Elastomer side.

#### 2. Application notes

- 2.1 Use protective materials when handling and/or applying the PGS, do not use items with sharp edges as they might tear or puncture the PGS.
- 2.2 The PGS does not work properly if overheated.
- 2.3 Thermal conductivity is dependant on the way it is used.

Test the adaptability of PGS to your application before use.
- 2.4 The PGS has conductivity.

If required, the PGS should be provided insulation.
- 2.5 Long term storage
  - The PGS shall not be stored under severe conditions of salt water, direct sunlight or corrosive gases (hydrogen sulfide, sulfurous acid, chlorine, ammonia etc.).
  - The PGS shall not be stored near acid.
  - Please preserve SSM packed under normal temperature and humidity while not in use.
- 2.6 Once applying to the adherent which has dents, SSM Elastomer resin keeps its shape so it cannot be re-applied to different portion.

#### <Package markings>

Package markings include the product number, quantity, and country of origin.  
In principle, the country of origin should be indicated in English.
