# FiberGuide® Fiber Management Systems

## Introduction

### The Industry's Most Comprehensive Optical Raceway System

The FiberGuide® fiber management systems offer the greatest breadth of optical raceway products in the industry. FiberGuide systems add greater flexibility and drive down installation time to ensure a smooth deployment.

FiberGuide is a raceway system designed to protect and route fiber optic patch cords, multi-fiber cable assemblies and intrafacility fiber cable (IFC) to and from fiber splice enclosures, fiber distribution frames and fiber optic terminal devices. FiberGuide ensures a two-inch minimum bend radius is maintained throughout the system. Tool-less, Snap-Fit™ junctions, cover options significantly reduce the amount of time required for installation.

The FiberGuide system is a complete set of products designed and manufactured to ensure total off-frame protection and ease of use. Basic components include horizontal and vertical straight sections, horizontal and vertical elbows, downspouts, junctions and numerous support hardware and flex-tube kits.

Available in a variety of sizes:

**2x2** - Ideal for smaller installations or for vertical routing of a maximum of four hundred 2 mm fiber optic patch cords. All 2x2 FiberGuide products are shipped with covers.

**2x6** - Designed for height restricted environments, this robust system provides the same support and system flexibility of the traditional 4-inch-high system while saving 2 inches of overhead space. It features a maximum capacity of 1,200, 2 mm patch cords.

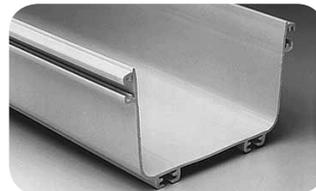

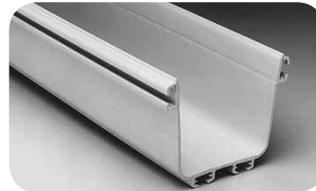

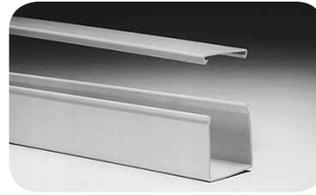

**4x4** - Features the maximum capacity to support 1,600, 2 mm patch cords. It has been engineered to allow straight sections to be self-supporting over a span of up to 1.83 m (6 feet).

**4x6** - Features the same benefits of the 4-inch system and a maximum trough capacity of 2,400, 2 mm patch cords.

**4x12** - The 12-inch-wide trough has a maximum capacity to support nearly 5,000, 2 mm patch cords. Perfect for runs over fiber frame lineups and perimeter routes.

**4x24** - The 4x24-inch system is the ultimate raceway solution to securely route and protect patch cords over high-density optical distribution frames including ADC's Next Generation Frame (NGF) and Next Generation 3 Frame (NG3®). Designed for maximum capacity, this robust system provides the same support and flexibility as the traditional 4x12-inch system while doubling capacity.

See page 16 for patch cord density tables.

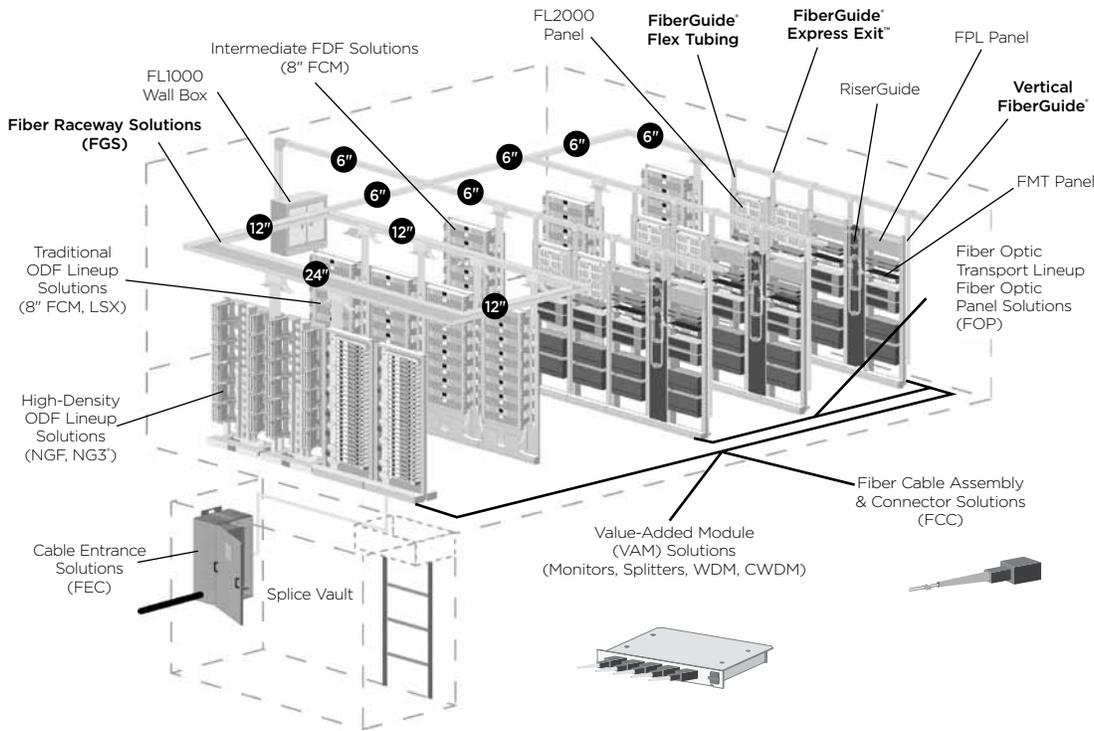

# FiberGuide® Fiber Management Systems

Introduction - A Variety of Solutions

Introduction

## Examples of FiberGuide® Integration

## FiberGuide® Materials Product Statement

The FiberGuide fiber management system is a UL-listed (E151158) general purpose fiber optic raceway system. All FiberGuide products are manufactured from flame-retardant materials. No FiberGuide system parts contain PVC. The table summarizes the fire-resistant properties of FiberGuide straight sections, molded parts and flex tube.

	Raw Material Meets UL Requirement	Finished Product Meets UL Requirement
<b>FiberGuide Straight Sections (All FiberGuide Systems)</b>	Flame rated: UL94V-0	UL94V-0 and UL2024
<b>FiberGuide Molded Fittings (All FiberGuide Systems)</b>	Flame rated: UL94V-0	UL94V-0 and UL2024
<b>FiberGuide Flex Tube (2")</b>	Flame rated: UL94V-0	UL2024
<b>FiberGuide Flex Tube (1")</b>	Flame rated: UL94V-0	UL2024
<b>FiberGuide Flex Tube (7/8")</b>	Flame rated: UL94V-2	UL2024

Note: FiberGuide flex tube complies with the National Electrical Code (NEC) Article 770-51 and Underwriters Laboratory UL2024 requirements for General Purpose Fiber Optic Raceways.

# FiberGuide® Fiber Management Systems

## Introduction - Innovative Products

### Snap-Fit™ and Hinged Cover Options

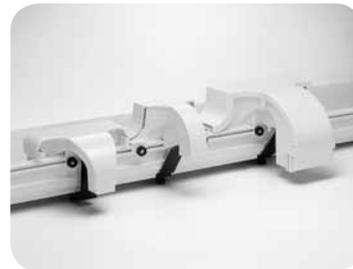

To drive down valuable installation time, FiberGuide systems include tool-less Snap-Fit™ and hinged cover options. Featuring simple, durable molded hardware, these covers install in minutes and require no tools. The hinged cover option provides easy access, enabling installers and technicians to deploy the product quickly and easily. In addition, the covers do not need to be fully opened for maintenance.

Hinged Cover System

### Snap-Fit Junction

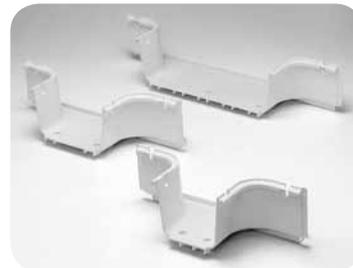

The Snap-Fit Junction is the industry's first and only completely tool-less junction. No additional tools are needed for installation or removal. Quick and easy to install, the FiberGuide Snap-Fit Junction saves valuable time and money.

Express Exit™ Family

### Express Exits™

The FiberGuide system features a number of innovative Express Exit™ options: Low profile, 2-inch and 4-inch options round out this innovative product line, designed to meet your most demanding network requirements. By simply securing an Express Exit to the sidewall of a FiberGuide straight section, jumpers can be permanently or temporarily routed to the fiber optic terminal (FOT) equipment or fiber frames. No cutting is required. Positioning a drop with a member of the Express Exit family greatly simplifies installation, protects the integrity of existing fibers and increases the overall flexibility of the raceway system.

Cut-in T

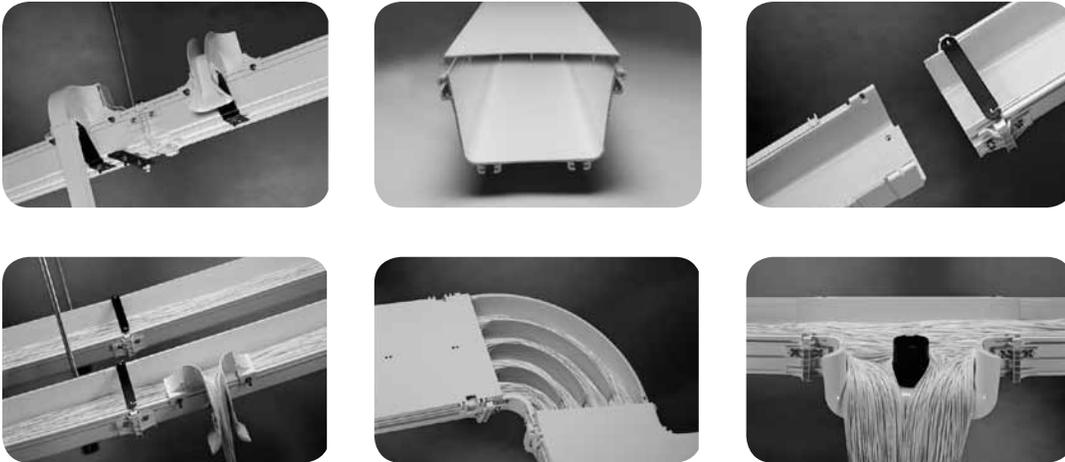

### Raceway Reconfiguration Solutions

Two FiberGuide products to facilitate easy on-site raceway reconfigurations. Available for the 4x4, 4x6, 4x12 and 4x24\* systems, the cut-in "T" and the expandable straight section offer the required flexibility to optimize raceway systems in retrofit applications without jeopardizing the integrity of existing cables.

\*Expandable straight section not available for 4x24 system.

# FiberGuide® Fiber Management Systems

## Introduction - Features and Benefits

### FEATURES & BENEFITS

#### Speed of Installation

FiberGuide® systems feature a variety of products that allow for quick and easy installation. Express Exit™ drops as well as tool-less products including Snap-Fit™ junctions, snap-on covers and new hinged cover options save valuable time for installers.

#### Speed of Deployment

The Express Exit system enables new drops to be added or removed quickly and easily. A drop can be added into a fully loaded raceway in seconds—without cutting.

#### Raceway Flexibility

FiberGuide features 38 support structures, over 75 fittings, multiple drop options and several other components to suit any application you create.

#### Fiber Protection

TE Connectivity's expertise translates into maximum protection for your network. Two-inch minimum bend radius is maintained throughout the system regardless of the raceway size.

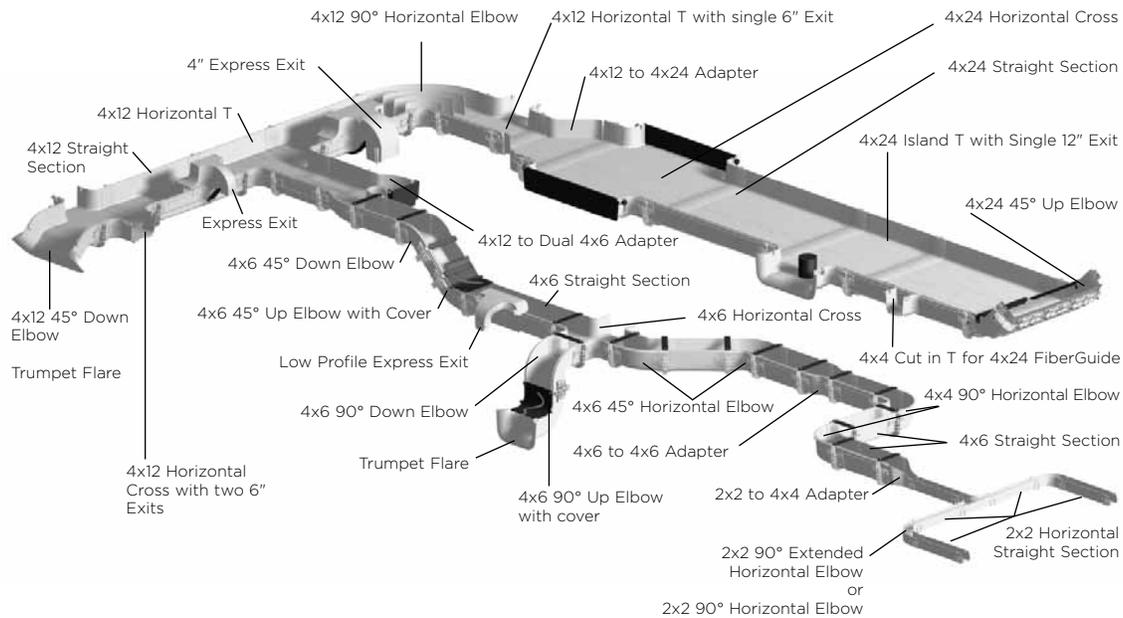

#### Strength and Durability

100% raceway reliability—stands up to any challenge.

# FiberGuide® Fiber Management Systems

## Applications - Combining System Parts

A combination of components from the various sized raceway systems typically comprise overhead FiberGuide® systems. Adapters are used to make the transition between sizes. An example of an overhead system that combines many of ADC's FiberGuide systems can be seen below.

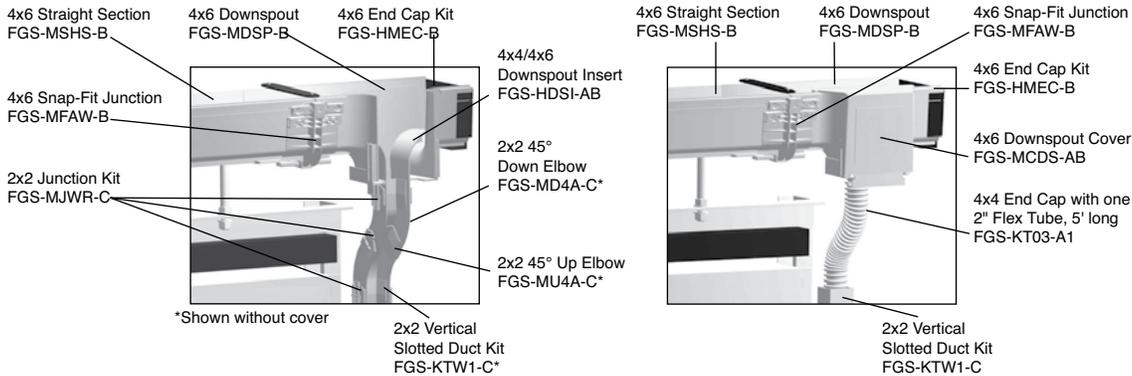

# FiberGuide® Fiber Management Systems

## Applications - Downspout Drop Options

Applications

A downspout drop is recommended over optical distribution frame lineups. The rigid 2-inch drop option and 2-inch flex tube option are two methods for directing fibers out of overhead FiberGuide® downspouts and into optical equipment bays. The rigid system is recommended because it offers excellent bend radius control and ensures a quality fiber backbone installation.

**2x2 Rigid Drop Option**

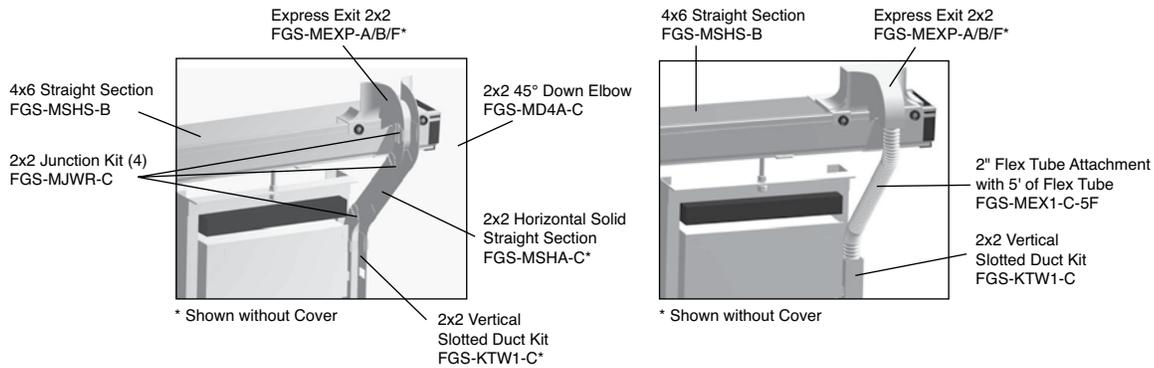

**2\"/>**

# FiberGuide® Fiber Management Systems

## Applications - Express Exit™ Drop Options

An Express Exit is recommended over active equipment racks or cabinets. The rigid 2-inch drop option and 2-inch flex tube option are two methods for directing fibers out of overhead FiberGuide® downspouts and into optical equipment bays. The rigid system is recommended because it offers excellent bend radius control and ensures a quality fiber backbone installation.

**2x2 Rigid Drop Option**

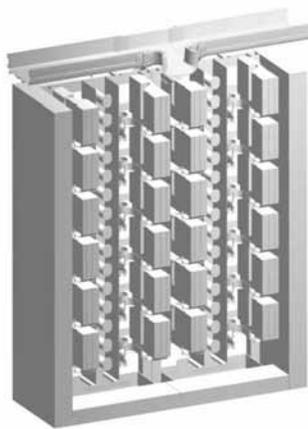

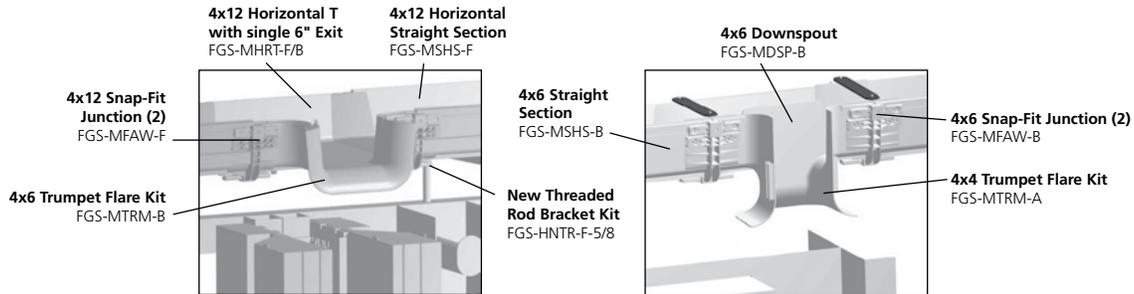

**2\"/>**

# FiberGuide® Fiber Management Systems

## Applications - Trumpet Flare Options

Applications

The trumpet flare is recommended at the bottom of a downspout when directing fibers into a fiber distribution bay. Trumpet flares provide bend radius protection and allow for a large number of fiber patch cords to transition into a fiber bay. A 4x4 trumpet flare is used for the 4x4 and 4x6 downspouts and a 4x6 trumpet flare is used for the 4x12 downspout.

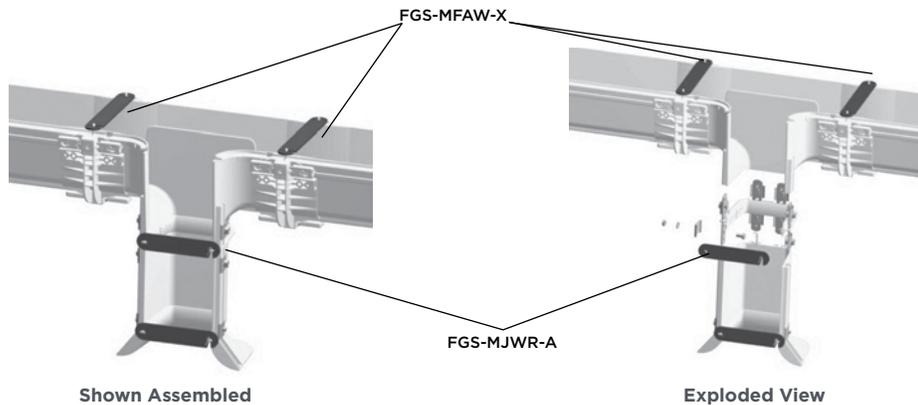

Horizontal T and Trumpet Flare

Downspout with Trumpet Flare

When attaching a straight section or fitting to the exit of a 4x4 or 4x6 downspout, the FGS-MJWR-A junction must be used. This junction is only required to connect the vertical part, the FGS-MFAW-X junction can be used to connect the horizontal parts.

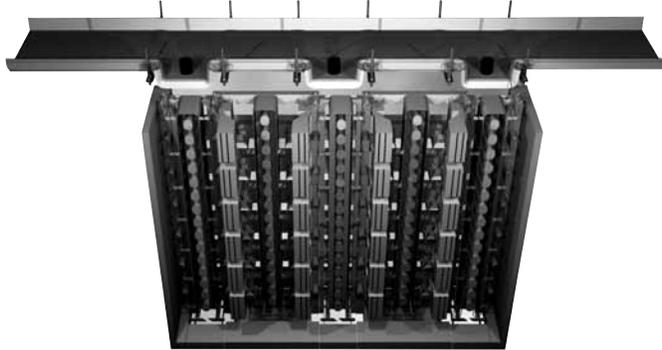

# FiberGuide® Fiber Management Systems

## Applications - 4x24-Inch Island T

---

The 4x24 Island T with 12-inch exit is designed to be used over the NGF, NG3® or any high-density fiber frame. The 4x24 Island T, a horizontal T with spool and factory-installed trumpet flare, channels fiber directly into the vertical cableways below.

**4x24 Island T**

(Shown with support brackets over an NGF frame.)

# FiberGuide® Fiber Management Systems

## Applications - Raceway Reconfigurations

Applications

### Cut-in T, Fitting and Fixture

The innovative cut-in T fitting and fixture enable on-site raceway modifications without jeopardizing the integrity of installed fibers. Available in 4-, 6-, and 12-inch widths, the cut-in T fitting can be retrofitted to any installed 4-, 6-, 12-, and 24-inch straight section using the cut-in T fixture and the hardware supplied with the fitting. No special tools are required.

Fixture attached to sidewall of raceway

Fixture protects cables during cutting of sidewall

Fitting fills gap left by removed sidewall

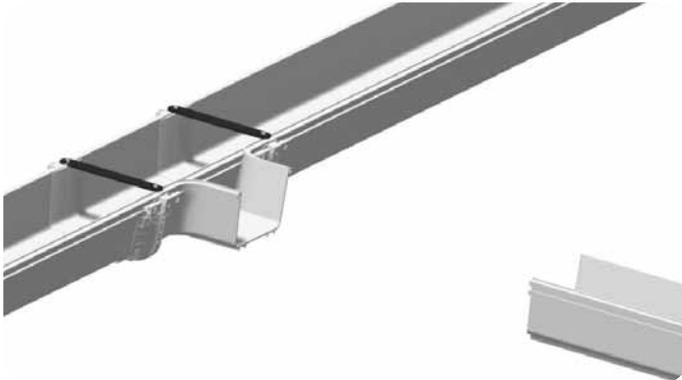

Supplied hardware secures fitting to raceway and completes installation

# FiberGuide® Fiber Management Systems

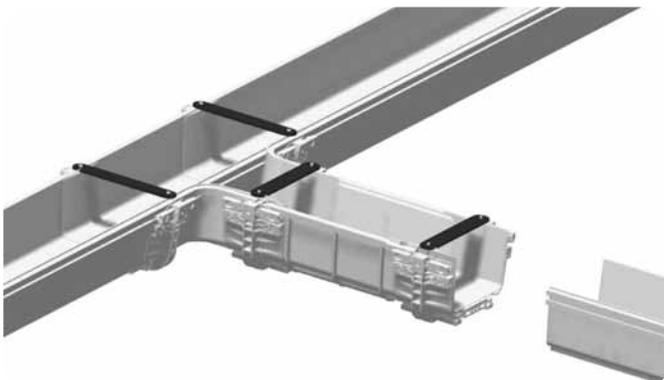

## Applications - Raceway Reconfigurations

### Expandable Straight Sections

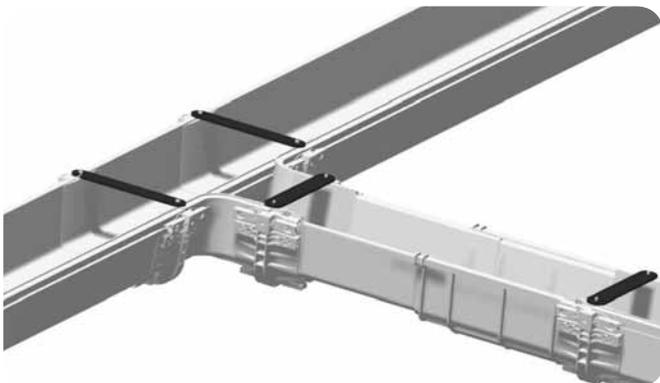

The expandable straight section simplifies installation and enhances the overall flexibility of the raceway system. The innovative straight section also provides an access point for future reconfigurations. Available in 4-, 6-, and 12-inch widths, the expandable straight section reduces the installation time necessary to connect opposing runs and provides continuous support for patch cords.

Raceway system with gap between opposing runs

Expandable straight section extends to connect runs

Completed installation

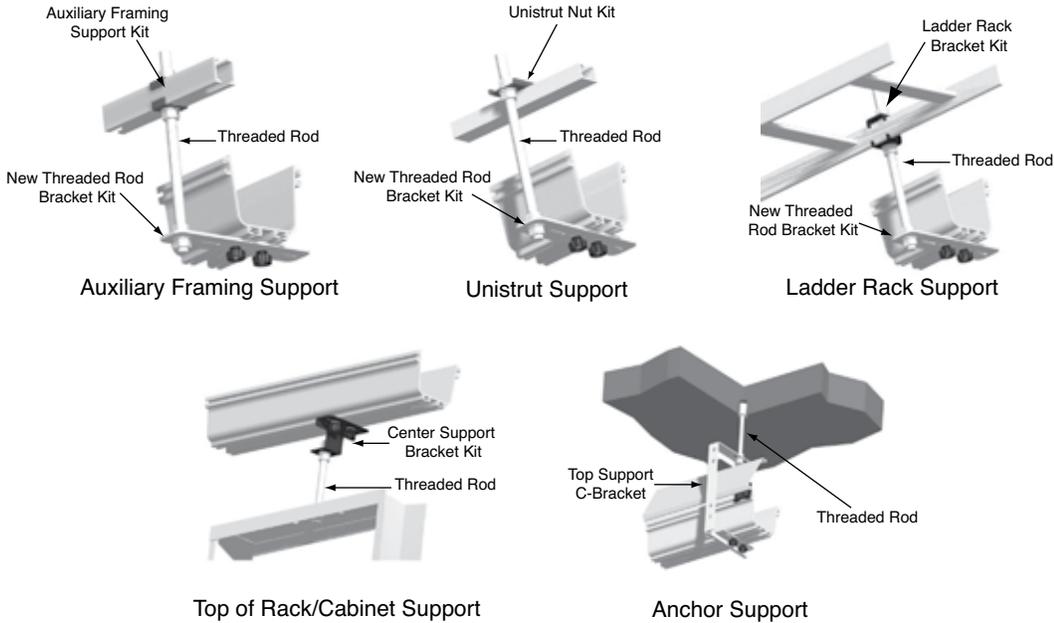

# FiberGuide® Fiber Management Systems

## Applications - Supporting Overhead Systems

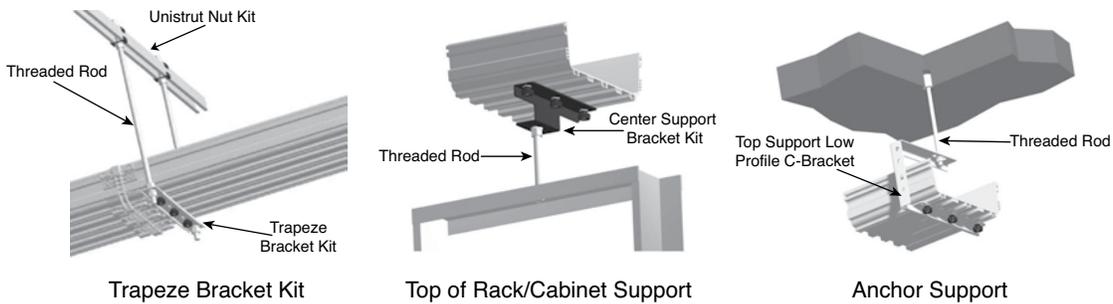

A variety of support kits are available for each FiberGuide® system. Whenever possible, FiberGuide support kits should be attached to existing hardware (cable racks, digital cableways, existing threaded rods or equipment racks).

### 2x6, 4x4, 4x6 Systems

Applications

### 4x12 System

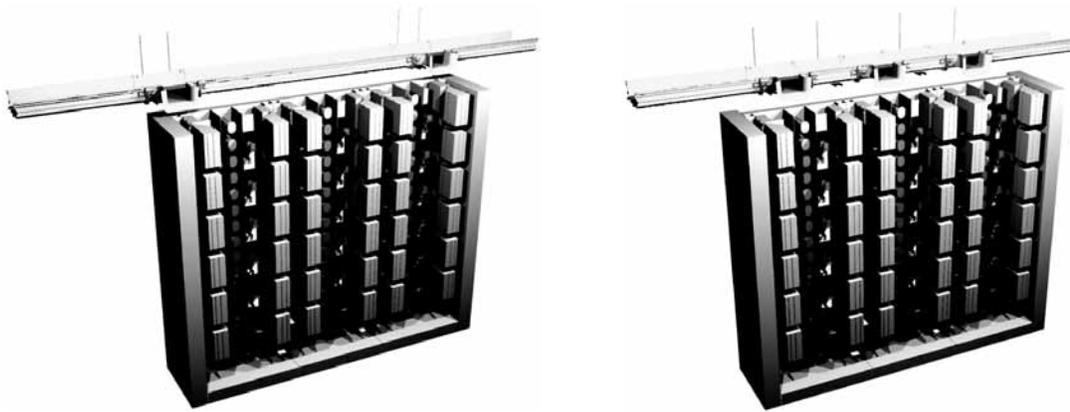

# FiberGuide® Fiber Management Systems

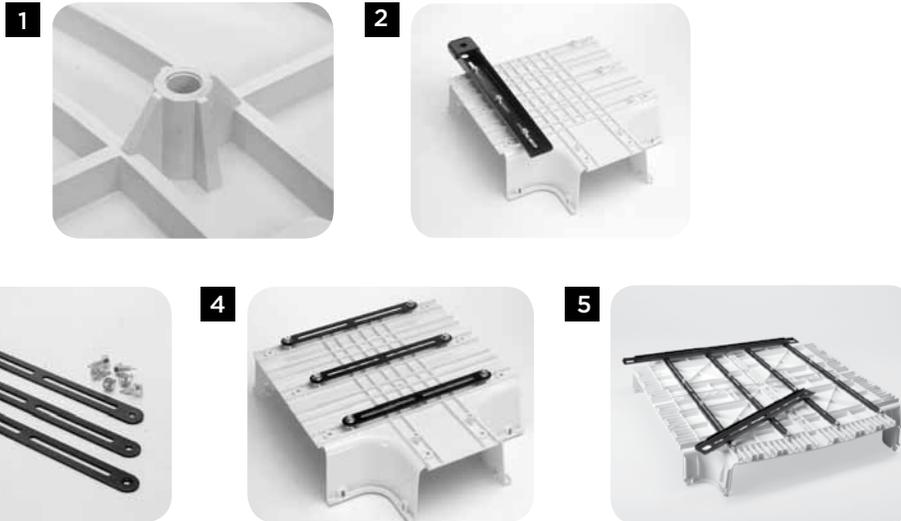

## Applications - Supporting Overhead Systems

### 4x12 and 4x24 Systems

The straight sections on the 4x12 and 4x24 FiberGuide® system are exceptionally strong, making frequent placement of supports beneath them unnecessary. Whenever possible the supports should be placed under the fittings using the mounting bosses as shown (photos 1 and 2). This placement provides the strongest system and requires the least amount of support hardware to be used. Occasionally it is not possible to attach the support bracket to the mounting bosses on the fittings; in those instances the variable fitting support locator can be installed on the bottom of the fitting, allowing the support to be attached anywhere along the fitting bottom (photos 3, 4 and 5). When combining several straight sections, it is recommended that support brackets are installed on both sides of each junction.

Typical 4x12 system installation over a Next Generation Frame Line-up

Variable Fitting Support Locator

Note: See pages 54 and 64 for 4x12 and 4x24 system fittings.

## Patch Cord Densities

Recommended and Maximum Patch Cord Densities .....16  
Things to Consider when Ordering.....17-18

# Patch Cord Densities

## Recommended and Maximum Patch Cord Densities

Recommended capacity takes into consideration random jumper placement into the FiberGuide® system. Maximum density refers to the maximum number of fiber jumpers in a given cross-section of a FiberGuide installation. The TracerLight® Connector Identification System features slightly different dimensions than standard patch cords.

### Recommended/Maximum Density

1.7 mm Patch Cords (per in <sup>2</sup> )	2.0 mm Patch Cords (per in <sup>2</sup> )	3.0 mm Patch Cords (per in <sup>2</sup> )
120/142	90/102	40/44

### Trough Pileup

## Things to Consider When Ordering

For main aisle runs and/or installations above high density fiber frame equipment, consider the 12" and 24" FiberGuide product found on page 49 and 59 respectively.

For tributary runs and/or installations above fiber optic terminals (FOTs), consider the 4" and 6" FiberGuide product found on page 31 and 41 respectively.

For height restricted environments, consider the 2x6" FiberGuide system found on page 25.

Consider the use of variable support locators for the 4x12" and 4x24" FiberGuide systems. The variable support locators provide additional mounting options for support brackets underneath larger fittings such as horizontal T's or elbows.

Consider the use of Express Exits™ rather than the traditional downspouts for bringing fiber out of a straight section run and into a fiber optic terminal (FOT) bay. The Express Exit installs without tools and does not require any cutting for installation.

Calculate the maximum potential amount of fiber in a given line-up to determine the proper sized FiberGuide over that line-up. Considerations should be given to pile-up densities (see page 16 for recommended pile-up densities) and redundant routing paths which will have an effect on proper FiberGuide sizing.

See pages 65-68 for ordering information on Express Exits and pages 69-73 vertical slotted duct systems.

See pages 81-94 for ordering information on system and support kit accessories. Consider the use of the retrofit fin kit for potentially high traffic areas on the 4x4" or 4x6" FiberGuide systems (fins come molded into certain fittings on the 2x6", 4x12" and 4x24" systems). The fin helps to spread the pile-up of jumpers efficiently across the width of a given FiberGuide system especially at horizontal turns and intersections.

## 2x2 System

Straight Section and Junction – 2" H x 2" W

### Straight Section

The 2x2 straight section is a U-shaped trough that provides a protective raceway for optical fibers. Available in 6-foot lengths, the straight section carries fibers horizontally throughout the system. It can also be installed vertically when routing around obstructions. A warning label indicating caution around fiber optic cable is included with each junction kit.

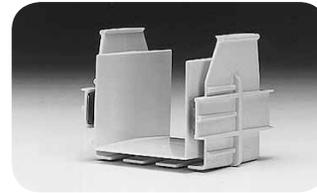

**Horizontal Straight Section**

## Low-Profile Express Exit™

Designed for low-ceiling or height restricted environments, the Express Exit™ for the 2x6 FiberGuide® system extends only two inches above the straight section sidewall. The Express Exit accommodates up to 150 (3 mm) patch cords, includes removable rear cable guides for additional cable management, and features a 2x2 exit opening. It is designed specifically for the 2x6 FiberGuide system and should not be used on any other FiberGuide system.

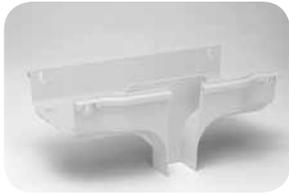

**Express Exit**  
(FGS-MEXP-LP-G)

## 2x6 System

Straight Section and Junction – 2" H x 6" W

### Straight Section

The unique four-channel design of the 2x6 FiberGuide® straight section allows the standard system to be attached to the support structure without the need to cut or drill any holes within the trough. This ensures that the patch cords will not come in contact with any screw heads or bolts.

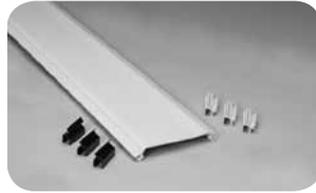

#### ORDERING INFORMATION

## Straight Section and Snap-Fit™ Junction – 4" H x 4" W

### Straight Section

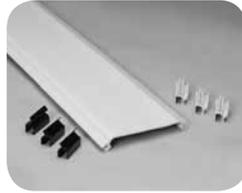

The unique four-channel design of the 4x4 FiberGuide® straight section allows the standard system to be attached to the support structure without the need to cut or drill any holes within the trough. This ensures that the patch cords will not come in contact with any screw heads or bolts, an important consideration in 4x4 systems where higher cable counts apply increased pressure on patch cords at the bottom of the trough.

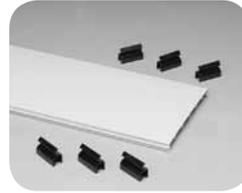

**Horizontal Straight Section**  
(FGS-MSHS-A)

**Expandable Straight Section**  
(FGS-MVAR-A)

**Hinged Cover for Horizontal Straight Section**  
(FGS-MSNC-A)

**Snap-On Cover for Horizontal Straight Section**

\*See drawings on page 40 for more detail on how capture clips and hinges are used. Other nonstandard colors available by request.

### Snap-Fit™ Junction

The Snap-Fit™ junction assembly is available for the 4-inch FiberGuide® system. The Snap-Fit junction is a completely tool-less junction. No additional tools are required for installation or removal. The junction exhibits superior holding force and accommodates support brackets. A warning label indicating caution around fiber optic cable is included with each junction kit.

**Snap-Fit Junction**  
(FGS-MFAW-A)

## Straight Section and Snap-Fit™ Junction – 4" H x 6" W

### Straight Section

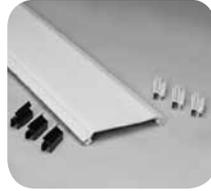

The unique four-channel design of the 4x6 FiberGuide® straight section allows the standard system to be attached to the support structure without the need to cut or drill any holes within the trough. This ensures that the patch cords will not come in contact with any screw heads or bolts, an important consideration in 4x6 systems where higher cable counts apply increased pressure on patch cords at the bottom of the trough.

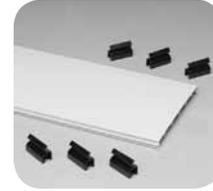

**Horizontal Straight Section**  
(FGS-MSHS-B)

**Expandable Straight Section**  
(FGS-MVAR-B)

**Hinged Cover Kit for Horizontal Straight Section**

# 4x12 System

## Straight Section – 4" H x 12" W

The unique nine-channel design of the 4x12 FiberGuide® straight section provides unmatched strength and allows the attachment of support structure without the need to cut or drill holes within the raceway. This ensures that the patch cords will not come in contact with any screw heads or bolts, an important consideration in 4x4, 4x6, and 4x12 systems where higher cable counts apply increased pressure on the patch cords at the bottom of the raceway.

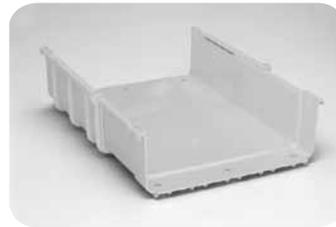

The 4x12 system covers feature a snap-on design. This allows the cover to be used in environments with limited headroom. Two 3-foot cover sections come with each order, making it easy for one person to remove the covers. Each cover kit includes a tether kit. The straight section covers are designed to be placed over the 4x12 downspouts, speeding installation time by reducing the number of measurements and cuts that need to be made.

**Horizontal Straight Section**  
(FGS-MSHS-F)

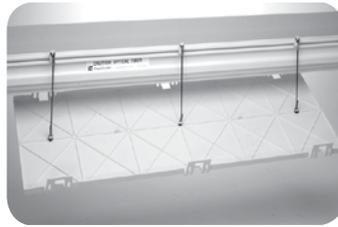

**Horizontal Straight Section Cover**

# 4x24 System

Straight Section, Snap-Fit™ Junctions and covers – 4" H x 24" W

## Straight Section

The unique double wall channel design of the 4x24 straight section provides exceptional strength and durability for high fiber count applications and allows the standard system to be attached to the support structure without the need to cut or drill any holes within the trough. The six channel design ensures that the patch cords will not come in contact with any screw heads or bolts, an important consideration in 4x24 systems where higher cable counts apply increased pressure on patch cords at the bottom of the trough.

# Express Exit™ Family

For 4x4, 4x6, 4x12, and 4x24 Systems

The patented\* Express Exit™ family accommodates various raceway environments and applications. By simply securing an Express Exit to the sidewall of any 4x4, 4x6, 4x12, or 4x24 FiberGuide® straight section, jumpers can be permanently or temporarily routed to fiber optic terminal (FOT) equipment below. No cutting of the FiberGuide system is required. Positioning a drop with a member of the Express Exit family greatly simplifies installation, protects the integrity of fibers already present in the raceway, and increases overall flexibility of the raceway system. All Express Exits guarantee 2-inch bend radius protection.

Express Exit Family

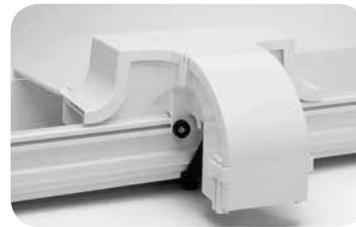

Express Exit Style	Height Above Sidewall	Exit Opening	3 mm Patch Cord Capacity	2 mm Patch Cord Capacity	Hinged Rear Cover	Exit Fin Inserts
2-Inch Express Exit	4"	2" x 2"1	150	350	No	No
Low-Profile Express Exit	2"	2" x 2"1	150	350	No	No
4-Inch Express Exit	4"	4" x 4"2	300	700	Yes	Yes

<sup>1</sup>Accepts all standard 2x2" attachments.

<sup>2</sup>Accepts all standard 4x4" attachments.

## 4-Inch Express Exit™

The 4-Inch Express Exit is designed to distribute and manage medium cable counts to FOT or ODF equipment. It features a 4-inch by 4-inch exit opening to accept all standard 4x4 downspout attachments and includes insertable exit fins and removable rear cable guides for additional cable management.

4-Inch Express Exit

See page 90 for 4-Inch Express Exit downspout attachments.

## ORDERING INFORMATION

Description	Part Number	
	Yellow System	Black System

## RiserGuide On-Demand Cable Management

Introduction.....	76
Installation and Removal.....	77
Specifications.....	78

# RiserGuide On-Demand Cable Management

## Introduction

Because cable management requirements change with network requirements, the FiberGuide® product family includes a riser guidance system, designed to provide cable management where you need it, when you need it.

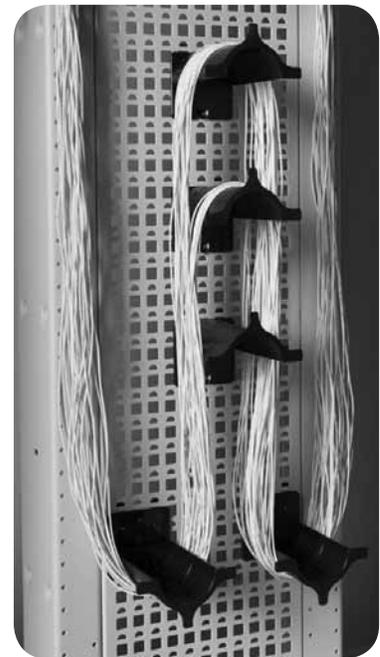

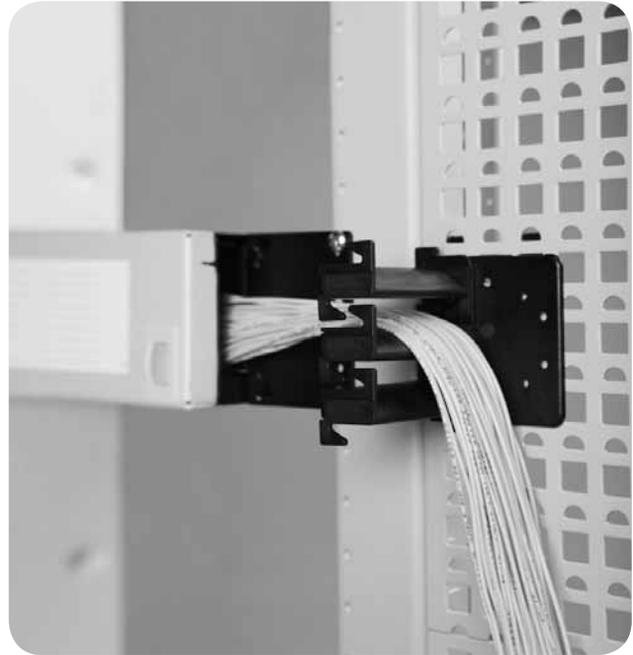

RiserGuide is modular and easy to both install and remove, allowing for flexible cable management and full network optimization.

### FEATURES

- Multiple standard width risers
- Multiple standard width risers
- Various components that can be installed anywhere on the riser including storage spools, radius limiters and cable guides
- Mountable within and between racks and in cabinets
- Half and full slack storage spools available
- Breakout cable slack storage
- Half and full slack storage spools available
- Breakout cable slack storage

### BENEFITS:

- Provides flexible, "on demand" cable management
- Manages patch cords off active equipment up to FiberGuide®
- Protects proper bend radius
- Easy to configure with simple, Snap-Fit™, tool-free installation
- Designed to meet GR-63 requirements
- Provides a cable management solution that extends beyond the "out of the box" solutions that are currently available

Threaded rod trapeze bracket kit for;	
Existing; 5/8"	FGS-HETP-H-5/8
New; 5/8"	FGS-HNTP-H-5/8

## Accessories

Support Kit Accessories.....	96
System Accessories.....	97

# Support Kit Accessories

2x2, 2x6, 4x4, 4x6, 4x12, 4x24 Support Kit Accessories

**Threaded Rod**  
(FGS-HTHR)

**Auxiliary Framing Kit**  
(FGS-HFCK)

**Adjustable Angle Support Brackets**  
(FGS-HASB)

**Ladder Rack Bracket Kit**  
FGS-HLDR shown alone and attached to ladder rack

**Unistrut Nut Kit**  
(FGS-HDGR)

## ORDERING INFORMATION

Description	Part Number
<b>Threaded rod</b>	
5/8" - 11 x 12"	FGS-HTHR-5/8-12
5/8" - 11 x 30"	FGS-HTHR-5/8-30
5/8" - 11 x 72"	FGS-HTHR-5/8-72
1/2" - 13 x 12"	FGS-HTHR-1/2-12
1/2" - 13 x 30"	FGS-HTHR-1/2-30
1/2" - 13 x 72"	FGS-HTHR-1/2-72
<b>Threaded rod;</b> (XX = size: 12 mm, 14 mm, 16 mm) (NN = length: 30 cm, 75 cm, 180 cm)	FGS-HTHR-XX-NN
<b>Auxiliary framing kit</b>	
2x 9/16" x 3/16" for 5/8" rod	FGS-HFCK-5/8
2x 9/16" x 3/16" for 1/2" rod	FGS-HFCK-1/2
<b>Adjustable angle support brackets with 5/8" threaded rod</b>	
11 x 36" rod	FGS-HASB-5/8-36
11 x 48" rod	FGS-HASB-5/8-48
<b>Adjustable angle support brackets with 1/2" threaded rod</b>	
13 x 36" rod	FGS-HASB-1/2-36
13 x 48" rod	FGS-HASB-1/2-48
<b>Ladder rack bracket kit for radiused ladder racking</b>	FGS-HLDR-A
<b>Ladder rack bracket kit;</b> (XX = size: 1/2", 5/8", 12 mm, 14 mm, 16 mm)	FGS-HLDR-XX
<b>Unistrut nut kit;</b> 5/8"	FGS-HDGR
<b>Frame mounting hardware kit;</b> (XX = size: 1/2", 5/8", 12 mm, 14 mm, 16 mm)	FGS-HKFM-XX

## System Accessories

**2" Outer Diameter  
Slotted Flex Tube**  
(FGS-MIDY)

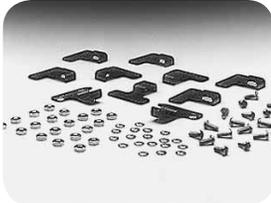

**7/8" Outer Diameter  
Slotted Flex Tube**  
(FGS-MFTY)

**Single Hinges for  
4" and 6" Covers**  
(FGS-HHGK)

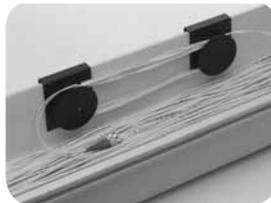

**Retainer Rings**  
(FGS-HFRR-10)

**Flex Tube Clamp**  
(FGS-HHEC-10)

**Storage Spools**  
(FGS-MSTOR-A/B/F)

**Shown Installed**  
(FGS-MSTOR-A/B/F)

**Mitre Box and Saw**  
(FGS-MKIT-ABF)

**Retrofit Fin - Kit of 10**  
(FGS-MFIN-10)

**Quick Knobs - Kit of 10**  
(FGS-KQKB)

# System Accessories

## ORDERING INFORMATION

Description	Part Number	
	Yellow System	Black System
<b>Trough cover clip kit</b>	FGS-KT09	FGS-KT09
<b>Slotted and solid flex tubes</b>		
(X = length: 5, 10, 15, 20, 25, 50, 75, 100, 125, 150, 200, 250)	FGS-MIDY-XF	FGSB-MIDY-XF
(X = length: 5, 10, 15, 20, 25, 50, 75, 100, 125, 150, 200, 250)	FGS-MLDY-XF	FGSB-MLDY-XF
(X = length: 5, 10, 15, 20, 25, 50, 75, 100, 125, 150, 200, 250)	FGS-MFTY-XF	FGSB-MFTY-XF
(X = length: 5, 10, 15, 20, 25, 50, 75, 100, 125, 150, 200, 250)	FGS-MISY-XF	FGSB-MISY-XF
<b>Hinges; single hinges for 4x4 and 4x6 covers</b>	FGS-HHGK	FGS-HHGK
<b>Retainer rings; kit of 10 - used to retain fibers in 2" flex tube</b>	FGS-HFRR-10	FGS-HFRR-10
<b>Flex tube clamp; kit of 10 - used to secure 2" flex tube to 2" vertical ducts</b>	FGS-HHEC-10	FGS-HHEC-10
<b>Storage spools for dark fiber jumpers; kit of 2</b>	FGS-MSTOR-A/B/F	FGS-MSTOR-A/B/F
<b>Mitre box with saw</b>		
Used to cut 2x2, 4x4, 4x6, and 4x12 FiberGuide® straight sections to size	FGS-MKIT-ABF	FGS-MKIT-ABF
Used to cut 2x2, 4x4, and 4x6 FiberGuide straight sections to size	FGS-MKIT	FGS-MKIT
<b>IFC tie down for;</b>		
4x4 system	FGS-HIFC-A	FGS-HIFC-A
4x6 system	FGS-HIFC-B	FGS-HIFC-B
4x12 system	FGS-HIFC-F	FGS-HIFC-F
<b>Quick knobs with T-bolt and cover slip; kit of 10</b>	FGS-KQKB	FGS-KQKB
<b>Reverse junction adapter kit for 4x4, 4x6, and 4x12 systems; used to connect two parts rotated 180°</b>	FGS-HRJA-A/B/F	FGS-HRJA-A/B/F
<b>Retrofit fin; kit of 10</b>	FGS-MFIN-10	FGS-MFIN-10
