

## FL25X25LG-A

- *PANDUIT* Flexible Duct is a one piece slotted sidewall, open finger design wiring duct intended to route and protect wires installed in control panel applications that require flexibility. *PANDUIT* Flexible Wiring Duct has offset fingers which extend from the sides and come together at the top of the duct to completely enclose any wire or cable. Due to its flexibility, Flexible Wiring Duct is useful in routing wires from control panel back planes and sidewalls, over hinges, to components mounted on control panel doors.
