

Fluke 10kV Test Clamps with Integral Heavy Duty Leads

Fluke is now offering the TLK1550-RTLCL as a standalone accessory. This is the large alligator clip and lead set that ships with the 1550C/Kit, 1555 and the 1555/Kit. This test lead set can be used to upgrade a 1550C capability or as a replacement set.

The cable is integral with the 10 kV clamp to ensure that the measurement connection is solid and the lead won't pull out.
