RS Code	Description	Weight g	W mm	H mm	L mm
8771750	Micro Burr Set	73	70	20	120

### Instructions

Do not use heavy pressure when deburring as this will cause the blade to dig into the material and give an uneven finish

Use light and even pressure which will allow the blade and handle to work together to remove the burr and leave a smooth finish on the component

Blades should be handled carefully as they are sharp and can cut

Blades can break causing flying objects

Sharp edges and flying objects can cause injury

Users and bystanders should wear protective safety glasses

Do not pry or bend blades

Keep blades and sharp tools away from children

Do not regrind blades as this will weaken the blade and cause breakage and possible injury

All Noga products meet the strict requirements of ISO 9001 and ISO 14001

## Small Hole Deburring Tool

S150 Blade  
For holes 1.5mm and larger  
Blade material: HSS M2  
Blade hardness: 62-64 HRC

## Mini Scraper

Mini Scraper Blade
