Features

Support Materials

Heat Activated Materials

The Master PortaPro® Glue Gun Model GG-200 is a lightweight, cordless, butane powered glue gun. It features a unique temperature control thermostat which automatically controls the glue gun chamber temperature by regulating the gas flow for optimal efficiency in butane consumption. As a result, this compact, lightweight glue gun has a greatly increased run time with a much lower butane consumption rate. Continuous run time up to 2 hours.

Perfect for many gluing applications:

- Automotive
- Industrial
- Furniture
- Models
- DIY
- Hobby
- Laminates
- Woodwork
- Electronics
- Floor Covering
