Hi3559 V100 Professional 2K/4K Mobile Camera SoC

Introduction

Hi3559 V100 is a new-generation MobileCam™ intelligent video processor provided by HiSilicon, a leading supplier in the global ultra-HD video technologies. The Hi3559 V100 processor is launched for the professional camera, high-end drone camera, extreme sports motion DV, 3D/VR camera, and high-end EDR product fields.

Hi3559 V100 uses the HiSilicon fifth-generation Hi-Lark high-performance video encoder, which supports simultaneous 4K@30 fps encoding and 1-channel 1080p@30 fps small-stream encoding. Besides, it can also record high-frame-rate videos such as 2K@60 fps, 1080p@120 fps, and 720p@240 fps.

Hi3559 V100 uses the HiSilicon fourth-generation Hi-ISP high-performance graphics processor and adopts the latest 3A, 3DNR, and HDR technologies to achieve professional picture effect. Hi3559 V100 supports dual sensor inputs and maximum 16-megapixel and 8-megapixel video processing to flexibly support the service scenarios that required dual-channel recording, such as the 3D/VR camera. Hi3559 V100 integrates high-speed transfer and storage USB 3.0 and PCIe 2.0 interfaces that transfer and store 1080P30 RAW data to achieve the effect of a professional camera.

Hi3559 V100 integrates the high-performance dual-core CPU (A17+A7). Apart from the video encoding and ISP processing functions, Hi3559 V100 also supports intelligent functions, such as EIS and optical flow hovering. Hi3559 V100 adopts the 28 nm HPC+ advanced manufacturing process and the 10 mm x 10 mm (0.39 in. x 0.39 in.) FC-CSP package. These features enable Hi3559 V100 to continuously lead the industry in high picture quality, low power consumption, and miniaturization.
