---------------------------------------	---------------------------------------	---	---

Reason for Change

Label

Forecasted Key Milestones:

Milestone	Date
Date Customer Must be Ready to Receive Post-Conversion Material	04 May 2015

Description of Change

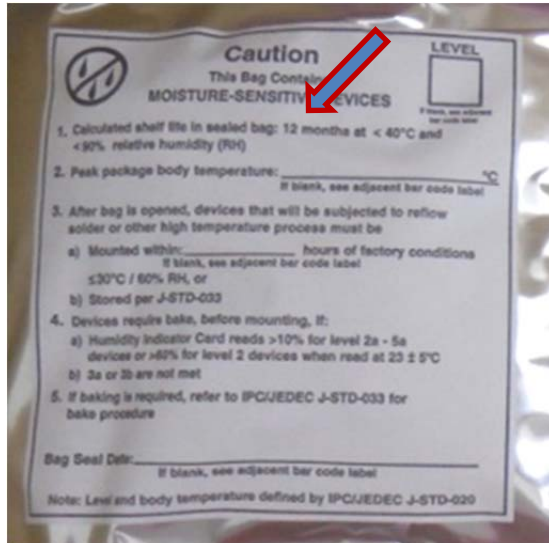

Inphi Corporation is announcing a change to the Moisture-Sensitive Caution Label. Inphi is extending the shelf life seal date from 12 to 24 months. No change is needed to the MBB or desiccant pack. Please see below for examples.

The "Date Customer Must be Ready to Receive New Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand; therefore, customers should be prepared to receive the Post-converted materials on this date. Inphi will continue to ship and customers may continue to receive the pre-converted material until inventory has been depleted. Please see below for listing of affected products.

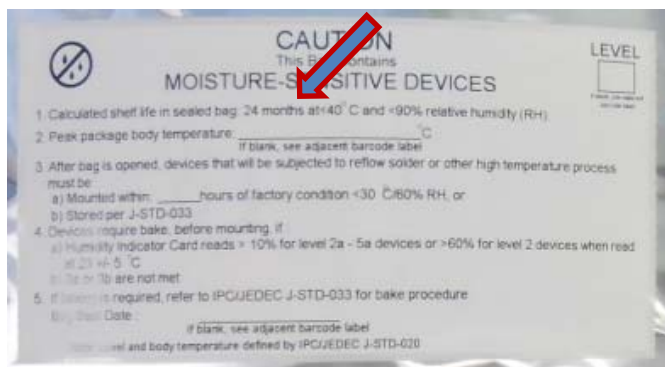

Customer Impact of Change and Recommended Action:

There is no change to form, fit, function, quality, reliability or performance of products. Please contact your local Inphi Sales Representative for further information.

Current MBB label:

New MBB label:
