# crydom®

**C**rydom has a distinguished record of providing advanced, high quality products with timely delivery and competitive pricing. Your success in today's fastpaced global markets hinges on working with suppliers who respond quickly and appropriately to your every need.

In addition to an extensive selection of catalog off-the-shelf items, Crydom offers custom-designed solid state relays. Fact is we specialize in satisfying the most demanding environmental and performance requirements our customers can devise. Give us your specs, and watch us exceed your expectations!

At Crydom's custom-built **100,000 square foot manufacturing facility**, virtually everything is accomplished in-house to assure complete control over delivery, production, and above all quality. With design, development, manufacturing and management personnel

under one roof, we're geared for fast response to your requirements.

In **Design Engineering**, we focus on pushing performance, reliability and quality standards ever higher. Working under a conservative design and rating philosophy, Crydom's seasoned engineering team makes extensive use of CAD to optimize design of mechanical parts.

As a result of these efforts, Crydom has acquired an impressive list of patents in solid state relay technology, while continuing to create new circuit and technology-related inventions as part of our ongoing R & D programs.

Once the design is solidified, **Production Engineering** is responsible for the engineering

control of the techniques used throughout manufacturing. This department works closely with our design engineering group, establishes assembly processes, and oversees a comprehensive on-premises machine shop which fabricates our assembly fixtures.

As the work progresses, **Material and Production Control** employ our advanced computer system, upgraded with our customized software to keep manufacturing operations humming. The computer system employs integral MRP and MSP capabilities to generate detailed scheduling and planning information.

**Ceramic Hybrid Manufacturing** also is performed in-house. Crydom manufactures all metallized ceramic substrates used in our relays — a major factor in product performance and reliability, including direct bond copper substrates.

[www.crydom.com](http://www.crydom.com)

**Quality Assurance** conducts ongoing product reliability verification tests, gathering precise data on the quality of our power semiconductor vendors and the silicon chips they provide. Additional tests are performed to meet specific customer burn-in requirements.

Crydom tests are exhaustive, including **100% verification** at final test. After units are completely assembled, they must pass a complete set of electrical tests, which are performed twice, once prior to encapsulation and then again afterward.

Because of our dedication to quality, Crydom was one of the first American companies to achieve full certification to the demanding standards of ISO 9001. In addition, most Crydom products are approved by UL, CSA, VDE, TUV and carry the CE Mark signifying conformance with the latest European directives. Certain panel mount and din rail mount relays carry UL 508A SCCR ratings.

Learn how an alliance with the world leader in solid state relays can pay off for you. For details, call your authorized Crydom distributor today.

SDI2415	12-280	.025-1.5	10-35	10	1.0	30	UL, CSA, TUV
SDI2415R*	12-280	.025-1.5	10-35	10	1.0	30	UL, CSA, TUV

\* R suffix denotes random turn-on.  
 Operating Temperature Range: -30°C to 80°C Isolation Voltage: 3,750Vrms

**ASO**  
**1.5-2Amp**  
 120/240 Vac  
 AC Mini-SIP  
 DC Control, SCR AC Switch Output  
 US Patent No. 5,134,094

Crydom's ASO solid state relays are SPST-NO miniature SIP packages rated at 1.5A/2.0A. They are designed for switching highly inductive, low current loads such as solenoids. Typical applications include: pumps, gaming, vending machines, security systems, medical equipment and appliances.

<b>dc input</b>	Line Voltage Range Vrms	Load Current Range Arms	Control Voltage Range Vdc	Control Current @ 5Vdc mA	Must Release Voltage Vdc	Surge Current 1-Cycle Apk	
<b>ASO241</b>	12-280	.025-1.5	4-10	15	1.0	40	UL, CSA
<b>ASO241R*</b>	12-280	.025-1.5	4-10	15	1.0	40	UL, CSA
<b>ASO242</b>	12-280	.06-2.0	4-10	15	1.0	120	UL, CSA
<b>ASO242R*</b>	12-280	.06-2.0	4-10	15	1.0	120	UL, CSA

\*R suffix denotes random turn-on.

Operating Temperature Range: -30°C to 80°C Isolation Voltage: 2500 Vrms

**LC241, LC242**  
**1.5 - 2.0 A**  
 120/240 Vac  
 AC Mini-SIP  
 DC Control

The LC241/LC242 offer the popular ASO circuit in cost effective package. Crydom's proprietary Triac circuitry makes snubless operation possible in most applications.

<b>dc input</b>	Line Voltage Range Vrms	Load Current Range Arms	Control Voltage Range Vdc	Control Current @ 5Vdc mA	Must Release Voltage Vdc	Surge Current 1-Cycle Apk	
<b>LC241</b>	12-280	.025-1.5	4-10	15	1.0	80	UL, CSA
<b>LC241R*</b>	12-280	.025-1.5	4-10	15	1.0	80	UL, CSA
<b>LC242</b>	12-280	.025-2.0	4-10	15	1.0	100	UL
<b>LC242R*</b>	12-280	.025-2.0	4-10	15	1.0	100	UL

\*R Suffix denotes random turn-on.

Operating Temperature Range: -40°C to 80°C Isolation Voltage: 2500 Vrms

**CX241**  
**1.5Amp**  
 120/240 Vac  
 AC SIP, SCR AC Switch Output  
 Zero Cross or Random Turn-On  
 US Patent No. 5,134,094

The CX241/R AC relays are SPST-NO solid state relays. Both models offer the ASO circuit with the popular CX pinout.

<b>dc input</b>	Line Voltage Range Vrms	Load Current Range Arms	Control Voltage Range Vdc	Control Current @ 5Vdc mA	Must Release Voltage Vdc	Surge Current 1-Cycle Apk	
<b>CX241</b>	12-280	.025-1.5	4-10	15	1.0	40	UL, CSA, VDE
<b>CX241R*</b>	12-280	.025-1.5	4-10	15	1.0	40	UL, CSA, VDE

\*R Suffix denotes random turn-on.

Operating Temperature Range: -30°C to 80°C Isolation Voltage: 4000 Vrms

**MCX241**  
 The MCX241/MCX241R offer the same specifications and performance as the CX241, the only difference is the MP style package. Add a "M" prefix to the above part numbers for this option. Pinouts are compatible with Series 6 and OAC type I/O modules. MCX241 models are UL, CSA and VDE approved.

**D2W**  
**2-3.5Amp**  
 120/240 Vac  
 AC SIP  
 Triac Output

The D2W Series features an epoxy-coated package that provides exceptional environmental protection. Pinouts are compatible with Series 6 and OAC type I/O modules.

<b>dc input</b>	Line Voltage Range Vrms	Load Current Range Arms	Control Voltage Range Vdc	Control Current @ 5Vdc mA	Must Release Voltage Vdc	Surge Current 1-Cycle Apk	
<b>D2W202F</b>	24-280	.06-2.0	3-32	3	1.0	28	UL, CSA
<b>D2W203F</b>	24-280	.06-3.0	3-32	3	1.0	70	UL, CSA
<b>D2W203F-11</b>	24-280	.06-3.5	3-32	3	1.0	80	UL, CSA

Operating Temperature Range: -30°C to 80°C Isolation Voltage: 4000 Vrms

**UPD**  
**15-25 Amp**  
 120/240Vac  
 Metal Baseplate  
 High Surge Rating  
 Zero Cross or Random Turn-On

Crydom's UPD series solid-state relays are an ideal solution for high-power switching applications with limited panel space. Single phase, dual output, or three phase versions are available with either PCB or quick-connect\* terminals, making the UPD series the perfect long-life alternative to many electromechanical relays.

<b>dc input</b>	Line Voltage Range Vrms	Load Current Range Arms	Control Voltage Range V DC	Control Current** @12Vdc mA	Must Release Voltage V DC	Surge Current 1-Cycle Apk

PCB Mount

**MPF**  
**4Amp**  
 120/240 Vac  
 SCR AC Switch Output  
 Integral Heat sink  
 US Patent No. 5,134,094

The MPF delivers high ratings in a single in-line package (SIP). Crydom's patented PowerFIN™ integral heat sink design makes for a cool compact package for PCB mounting. With natural convection in free air, it rates 4Arms at 50°C ambient.

	Line Voltage Range		Load Current Range		Control Voltage Range		Control Current @5Vdc		Must Release Voltage		Surge Current 1-Cycle

Operating Temperature Range: -30°C to 80°C Isolation Voltage: 3750 Vrms

**CX, CXE**  
**5Amp**  
 120/240/380/480 Vac  
 AC SIP, SCR AC Switch Output  
 Ultra High Surge Rating  
 US Patent No. 5,134,094

Crydom's family of SPST-NO relays provide a high power switching capability in a PC-mounted air-cooled package. Advanced features include exceptional steady state current, plus ultra-high surge ratings. Models are available to switch up to 660 Vrms with AC or DC control, and either zero-cross or random turn-on ("R") switching versions. Pinout is compatible with Series 6 and OAC type I/O modules.

**MCX, MCXE**  
**5Amp**  
 120/240/380/480 Vac  
 AC SIP  
 SCR AC Switch Output  
 Ultra High Surge Rating

The MCX and MCXE offer the same specifications and performance as the CX and CXE products, the only difference is the MP style package. Add a "M" prefix.

**LS**  
**8-12Amp**  
 120/240 Vac  
 Metal Baseplate  
 High Surge Rating  
 Zero Cross or Random Turn-On

Metal baseplate design for direct attachment of external heat sink to achieve maximum current ratings. Applications include; motor, heater, lamp and solenoid switching.

	Line Voltage Range		Load Current Range		Control Voltage Range		Control Current @ 5Vdc		Must Release Voltage		Surge Current 1-Cycle		
	Vrms	Arms	Vdc	mA	Vdc	mA	Vdc	Apk	UL, cUL, TUV

Operating Temperature Range: -30°C to 80°C Isolation Voltage: 2500 Vrms AC input versions available

**CTX**  
**4 x 2.5Amp**  
 120/240 Vac  
 TRIAC Output  
 4 AC Relays in One  
 Compact Package

The CTX240D3Q offers four independently controlled solid state relays in one compact PCB mount package. Based on the proven Series CX product line, featuring ultra high surge rating, extra low leakage and 4-10 Vdc logic compatible input. The CTX exhibits exceptional steady-state ratings utilizing highly efficient thermal management for increased cycle life.

	Line Voltage Range		Load Current Range		Control Voltage Range		Control Current @ 5Vdc		Must Release Voltage		Surge Current 1-Cycle

 120/240/380/480/600 Vac  
 SCR AC Switch Output  
 Ultra High Steady State Current Rating  
 US Patent No. 5,134,094

Crydom's PowerFin Series delivers the highest ratings of any single in-line package (SIP). With Crydom's integral heat sink design you can run 25 amps RMS in forced air at 85°C case temp. With natural convection in free air, it rates 10 amps RMS at 25°C ambient. Built-in advantages include Surface Mount Technology, low off-state leakage and SCR AC switch output.

**SPF**  
**Up to 25Amp**  
 120/240/380/480/600 Vac  
 SCR AC Switch Output  
 Ultra High Steady State Current Rating  
 Works in both the vertical or horizontal orientation. US Patent No. 5,134,094

The SPF is identical to the PF products in specifications and performance, the only difference is the package configuration. The SPF utilizes a low profile integral heat sink that provides decreased package width for higher density applications. To order the SPF configuration simply add the "S" prefix to any of the above PF model numbers. All SPF and SPFE models are UL and cUL approved.

**ASPF**  
**3Amp**  
 120/240 Vac  
 AC Mini-SIP, Integral Heat Sink  
 SCR AC Switch Output  
 US Patent No. 5,134,094

The ASPF Series delivers high ratings in a single in-line package (SIP). Crydom's patented PowerFIN™ integral heat sink design makes for a cool package with high ratings. With natural convection in free air, it rates 3 Arms at 45°C ambient.

dc input	Line Voltage Range	Load Current Range	Control Voltage Range	Control Current @5Vdc	Must Release Voltage	Surge Current 1-Cycle

 SCR AC Switch Output  
 Versatile System Monitoring SSR  
 LED Status Indicators, Alarm Output

The SMR system monitoring SSR's offer a wide range of built-in fault condition alarms to the end-user. Loss of voltage, open circuit load, relay damage and loss of DC supply are constantly monitored. LED status indicators complete the package for early detection of equipment problems. SMR-6 models offer the user the capability to configure the relay with either inverting or non-inverting control and alarm. The alarm circuit can sink or source up to 100mA.

\*Current and Surge Ratings are per phase.  
 \*\* DP is two controlled phases with the third connected straight through (A1 - A2).  
 Operating Temperature Range: 40°C to 80°C, Isolation Voltage: 4000 Vrms

**PSD**  
**10-90Amp**  
 120/240/480 Vac  
 Peak Switching  
 Internal Snubber

Output consists of an SCR AC switch turning on at the next peak of sinusoidal AC wave form after the input has been activated. Continuing to conduct normally until the input is deactivated and then turning off at the next current zero cross. Suitable for switching transformers and other highly inductive loads where significant inrush current may otherwise cause problems.

## Panel Mount - Accessories

### Crydom Heat Sinks

Meet or Exceed Crydom's Heat Dissipation Requirements  
 Pre-Drilled and Tapped

Thermal management is a important consideration in the use of panel solid state relays due to the contact dissipation (typically 1W per Amp). Crydom heat sinks are engineered to match the heat dissipation requirements of Crydom solid state relays. Pre-drilled and tapped for quick, seamless installations.

	K/W	SSR	Mounting
<b>HS-1</b>	2.1	Single Phase	Panel Mount
<b>HS-2</b>	1.5	Single Phase	Panel Mount
<b>HE-54</b>	0.7	Single Phase	Panel Mount
<b>HE-90</b>	0.4	(3) Single Phase or (1) Three Phase	Panel Mount
<b>HS8.1</b>	2.0	Single Phase	DIN Mount
<b>HS8.3</b>	3.5	Single Phase	DIN Mount

### Heat Transfer Pads

**TP01, TP03, TPEZ, TPCM**

Maximize Thermal Conductivity, 100% Grease-Free

Crydom Heat Transfer Pads offer a clean, easy-to-use and grease-free alternative to conventional mica or grease while maximizing the thermal conductivity. Installation is simple, pads are die cut to fit perfectly with Crydom SSRs. To order heat transfer pad attached to panel mount relays, add suffix "H" to part number.

<b>TP01</b>	All Single Phase Panel Mount SSRs and Auxiliary Function Modules and M50 Power Modules, non-adhesive	<b>TP03</b>	Three Phase (53TP)
		<b>TPEZ</b>	EZ
		<b>TPCM</b>	CMD, CMA

### Protective Covers

**KS100, KS300, KS100-SMR**

Protects Terminals for Safety  
 Custom Fit for Most Crydom SSRs

Made of durable, clear polycarbonate, these removable covers provide additional protection from electrical shock by covering the SSR terminals.

<b>KS100</b>	Standard Package, Single Phase SSRs
<b>KS300</b>	Three Phase (53TP)
<b>KS100-SMR</b>	SMR, SMR-6 Series and MC Series

### SSR Filters

**Single and Three Phase**

Suppresses EMI Noise  
 Simple Installation

All AC Solid State Relays generate low frequency thyristor noise which may exceed some industrial standards (e.g. EN50061) at the lower end of the frequency spectrum (150-250kHz). Crydom's patented filter design connects easily and offer up to 50% reduction in thyristor noise

<b>1F25</b>	SSR Filter - Single Phase
<b>3F20</b>	SSR Filter - Three Phase (53TP)
<b>3F20-4</b>	SSR Filter - Three Phase (with neutral)

**MS11**

LED Status Indicator (Input)  
DIN rail Mount for PCB products

Designed specifically for a variety of Crydom's PCB mount solid state relays, the MS11 provides a secure and convenient DIN rail mount with an input status LED.

DIN Rail Mount

## Solid State Control Relays

Crydom's recognized global leadership in solid-state relays (SSRs) is taken a step further with our extensive line of solid state control relays. They can incorporate control circuitry, intelligence, indication and feedback to an SSR function, further enhancing the cost-performance benefits for the end user. Housed in familiar electrically isolated-base packages, many commonly used power switching/control functions are incorporated into a single relay. Crydom's renowned advanced thermal management techniques are utilized to ensure ease of mounting and cooling for long life and reliable operation. Significant cost savings are realized from reductions in design, volume, cooling, field maintenance, parts count, acquisition and inventory costs.

### Typical Applications

Appliances	Motor controls, Universal
Blow Molding Equipment	Motor-starter
Centrifuges	Ovens
Closed Loop Control	Polishing Equipment
Conveyors	Power supplies
DC-choppers	Printing Equipment
Elevator controls	Pump Controls
Furnaces	Reflow Soldering
Gaming Equipment	Slow-start controls
Heater controls	Steamers
HVAC controls	Sterilizers
Incubators	Temperature Controls
Inverters	Three-phase switching
Lamp controls	Traction
Light Dimmers	Transformer Switching
Marine Equipment	Transportation
Medical electronics	UPS systems
Motor controls, AC	Welding
Motor controls, Induction	

### Custom Designs

Crydom's Sales and Technical Support teams will work closely with you to define and develop customized solutions for your unique requirements. We can help you get that competitive edge necessary to be a leader in your industry. In-house capabilities include ceramic substrate production, SMT (surface mount technology) placement/insertion robotics assembly and elevated/low temperature monitored testing. All this interprets into fast-track design, prepare prototypes, test, evaluate, adjust and finalize as necessary to achieve the stated performance criteria. Upon final customer approval we can quickly gear up to meet your production schedules in our ISO9001 certified manufacturing environment.

**SST**  
**Solid State Soft-Start**  
**Control Module/Relay**  
 10-90Amp  
 SCR AC Switch Output  
 120/240 Vac

Models SST120 and SST240 control modules gradually apply power to the load when energized by the control voltage. They must be used with Crydom Series 1 random turn-on solid state relays. Consult factory for SST wiring diagrams and about use with 480 Vac loads. For a complete set (control module and solid state relay) order 10SST120, 25SST120, etc.

**LPCV**  
**Solid State Linear Proportional Control Relay**  
 15-110Amp  
 120/240 Vac  
 SCR AC Switch Output  
 Precise Proportional Load Control

The LPCV solid state linear proportional control relays control loads up to 110 amps. Changes in the input signal linearly vary the firing angle of the thyristor load control device.

Control circuitry and power switch are in a single package.

**PS-120 (120V), PS-240 (240V)** These power supplies are designed for use with the Series LPCV control relays to provide the 20Vac required in addition to the control voltage.

**CPV**  
**Solid State Phase Control Module/Relay**  
 10-90Amp  
 120/240 Vac  
 0-5Vdc Phase Control

Models CPV120 and CPV240 solid state control modules provide control of the phased turn-on of a solid state relay, in response to the application of a 0-5 Vdc control signal. They must be used with Crydom Series 1 random turn-on solid state relays. Consult factory for wiring diagrams and about use with 480 Vac loads. For a complete set (control relay and solid state relay) order 10CPV120, 25CPV120, etc.

**MCTC**  
**Solid State Temperature Control Relay**

25-90Amp  
120/480 Vac  
AC Output

- Temperature Control/SSR in One Package
- Direct J or K Internally Compensated Thermocouple Input
- Four Heating Ranges Available with Burst Fire Control
- Setpoint is Adjustable by Voltage or 4-20mA Control
- Separate Output Enable/Disable Control
- SCR Based Output Load Switching
- Open Thermocouple Protection Feature
- One Refrigeration Range Available with Built-In 2 Minute Short-Cycle Protection

The Crydom MCTC is a unique self-contained state of the art basic Temperature Control Relay that combines all the necessary functions into one easy to set up and use standard size package. The MCTC is ideal for temperature control users that do not need multiple built-in options, displays, and functions that they will never use.

The MCTC requires only a single, non-regulated low current DC source, (10-32Vdc at 32mA max.), and a type J or K thermocouple, to be able to accurately control heater and cooling compressor loads up to 530Vac at 90A. The unit incorporates an internally compensated thermocouple input, 5 available temperature ranges including an inverse function refrigeration version, with adjustable setpoint using analog low voltage or 4-20mA inputs, separate output enable/disable control, and built in Crydom Solid State Relay technology for load control. With integrated zerocross burst firing, and proportional derivative control to avoid set-point overshoot, the unit also includes 2 LED status indicators for visual reference of operation and setpoint conditions.

**Part Number Nomenclature**

**MCS**  
**Solid State Soft-Start / Soft-Stop Control Relay**

25-90Amp  
120/480 Vac  
AC Output

- Soft-Start/Stop Control and SSR in One Package
- Microcontroller Based Technology
- Adjustable Ramp Rates
- Low Voltage, 4-20mA, or Potentiometer Control
- LED Status Indicator
- SCR Based Output Load Switching
- Built-In Internal Snubber

The MCST, MCSP and MCSS series of controls is designed to provide adjustable surge reducing soft-start and soft-stop control for any load which would benefit from a gradual application or shutdown of power, and provide Crydom SSR switching within one package.

The MCS Control Relays are available with either soft-start, or soft-stop functions separately, or as a combined soft-start/soft-stop control. With adjustable ramp times from 100ms to 10 seconds in two ranges, these controls are ideal for reducing starting current surges in motors, in preventing saturation when switching transformers, or in reducing reverse EMF surges when de-energizing large inductive loads. Incorporating 4000 volt isolation from input to output, the MCS series allows real time adjustment of the ramp rates from a remote source using analog voltage or current control. Once the desired ramp rate is set using the analog input, a simple digital signal applied to the ON/OFF control input will operate the control. The MCS is also available with a built-in potentiometer for use where remote or continuous adjustment is not needed.

**MCBC**  
**Solid State Burst Fire Control Relay**

25-90Amp  
120/480 Vac  
AC Output

- Burst Fire Control/SSR in One Package
- Low Voltage, Current, or Potentiometer Control
- Output Status Indicator (Load Open, No Voltage)
- 0-100% Control Range
- 2 Time Base Periods Available
- Separate Output Enable / Disable Control
- SCR Based Output Load Switching
- Internal Snubber Network Included

The Crydom MCBC series of Burst fire Controls, incorporate a complete burst Fire logic system and Solid State Relay in one small industry standard package. The MCBC uses microprocessor control relay logic, accepts a wide range input logic power supply, provides an output load status indicator, and five modes of analog input control along with an Enable / Disable control.

With 2 time base periods available, (10 and 20 AC cycles), the MCBC provides a smooth proportional control that minimizes electrical noise by utilizing zero-cross detection and switching, firing only complete AC cycles.

The MCBC does not require any calibration adjustment, is optically isolated up to 4000 Vrms, and is available in load rating up to 90 A and 530 Vac. In addition, specialized AC Phase Detection Circuitry allows the MCBC to be connected to only one side of the load, minimizing installation wiring.

The MCBC series is particularly suited to electrical heating applications where the electrical noise generated by typical phase angle controller can not be tolerated.

## I/O Modules

Industry Standard Packaging  
UL Recognized, CSA Certified,  
CE Compliant

Crydom offers a broad line of digital I/O modules and mounting boards. Designed for long, reliable service in demanding industrial environments, these modules provide optical isolation between logic-level control systems and external loads, such as motors, valves, solenoids, resistive heating elements, etc.. Output modules within the offer can switch loads up to 5 Amps at 24-280 VAC (Form A, SPST-NO, zero-crossing output), or up to 5A/3A at 100/200 VDC (Form A SPST-NO). Input modules provide digital feedback to the control system when the load is energized and are available with inputs up to 280Vac / 48 VDC, with either a 5 VDC or 24 VDC logic-level output.

## Mounting boards available

	Number of Modules					
	4	6	8	16	24	32
<b>0.6" Modules</b>	■		■	■	■	■
<b>M Series</b>			■	■	■	■
<b>SM Series</b>			■	■	■	■

<b>Quads</b>	■	■	■			

### 0.6" Modules

- AC Inputs for 24 V, 120 V, 240 V
- DC Inputs for 3.3 to 32 V, 10 to 48 V
- 4 kV Optical Isolation
- Plugs into 0.6" Mounting boards

### M Series

- AC Inputs for 24 V, 120 V, 240 V
- DC Inputs for 3.3 to 32 V, 10 to 48 V
- 4 kV Optical Isolation
- Plugs into M Series Mounting boards

### SM Series

- AC Inputs for 24 V, 120 V, 240 V
- DC Inputs for 3.3 to 32 V, 10 to 48 V
- 4 kV Optical Isolation
- Plugs into SM Series Mounting boards

### C4 Series

- Built-in LED Status Indicator
- Regulated Supply Voltage
- 4 kV Optical Isolation
- Replaceable 2 AG Type Fuse (output modules)
- Plugs into C4 Series Mounting boards

### Quads

- 4 Input Circuits per module
- AC Inputs for 24 V, 120 V, and 240 V
- DC Inputs for 4 to 32 V, 10 to 60 V
- 4kV Optical Isolation
- Plugs into mounting boards for quad-pack modules

## Terminology

**Control Voltage Range** - The range of voltage when applied across the SSR Input terminals, will maintain an ON condition across the Output terminals.

**Control Current** - Current drain on the control source at specified SSR input voltages and On/Off conditions.

**dv/dt** - Maximum rate of rise of voltage applied across the output terminals that the SSR can withstand without turning ON. A characteristic of thyristors used in AC SSRs.

**dv/dt Off State (Static)** - Specified as a minimum dv/dt withstand capability of SSRs in the off or blocking state.

**Form, Contact** - Contact or output configuration, as in Form A for Single Pole, Single Throw, Normally Open (SPST-NO)

**Holding Current** - The minimum load current required to maintain a thyristor in its conducting state.

**Input Current (Maximum)** - Current drain on the control source at specified SSR input voltages and On/Off conditions.

**Isolation Voltage** - The value of dielectric strength measured between the input and output, input to base, or output to base.

**LED** - Light Emitting Diode, commonly used for status indication on some models of SSRs and as the light source in a photocoupler .

**Line Voltage Range** - The range of voltages applied to the output, over which the SSR will continuously block or switch and otherwise perform as specified.

**Load Current Range** - The range of current applied to the output, over which the SSR will continuously block or switch and otherwise perform as specified.

**MOSFET** - Metal Oxide Semiconductor Field-Effect Transistor. The control electrode (gate) is generally isolated from the source electrode by a layer of silicon oxide. A voltage applied between the gate and the source will provide a current flow between the drain and the source.

**Normally Open (NO)** - A contact or SSR output that is open when no control power is present at the input (coil). This is a Form A device.

**Normally Closed (NC)** - A contact or SSR output that is closed when no control power is present at the input (coil). This is a Form B device.

**Off-State Voltage** - The maximum transient voltage that an SSR output can withstand without malfunction or damage.

**On-State Voltage (Maximum)** - The peak voltage that appears across the SSR output terminals at full rated load current.

**Phase Control** - Turn-On of a non-zero switching SSR (each half cycle), at a phase angle determined by the control signal source.

**Photocoupler/Isolator** - A combination of light-emitting diode and light-sensitive semiconductor used to transmit information optically while providing electrical isolation. Commonly used isolating element for coupling the control signal to the output in an SSR.

**Power Dissipation** - The maximum average power dissipation (Watts) resulting from the effective voltage drop (power loss) in the SSR output semiconductor.

**Rectifier** - A semiconductor used to convert AC power to DC. It allows current to flow in one direction (forward) and prevents the flow of current in the opposite directions (reverse).

**SCR** - Silicon Controlled Rectifier. Unidirectional semiconductor of the thyristor family with latching properties.

**Snubber** - A resistor-capacitor combination placed across the SSR output terminals to reduce dv/dt and transients in thyristor circuits.

**Solid State Relay (SSR)** - Isolated On-Off switch composed of non-moving electrical parts (primarily semiconductors, transformers and passive components).

**Surge Current** - The maximum allowable SSR momentary current flow for a specific time duration. Typically specified as a peak value for one line cycle for AC.

**Thermal Resistance** - Expressed in degrees Celsius per watt (°C/W). This value defines the temperature gradient in the path between the power generated in the output SSR semiconductor and the final dissipating medium (heat sink/air).

**Thyristor** - A semiconductor bistable device comprising three or more junctions (PNPN, etc). The generic name for a family of gate controlled switches including SCRs and triacs.

**Triac** - Bidirectional semiconductor of the thyristor family. Performance is similar to that of an inverse pair of SCRs, triggered by a single gate electrode.

**Trigger** - To turn on an SCR or triac.

**Turn-Off Voltage (Must Release)** - The voltage applied to the SSR input at or below which the output must be in the Off-State (Normally-Open).

**Turn-On Voltage (Must Operate)** - The voltage applied to the SSR input at or above which the output must be in the on state (Normally-Open).

## European Union RoHS Directive Compliance

European Union (EU) Directive 2002/95/EC (Restriction of Hazardous Materials) places restrictions on certain hazardous substances in electrical and electronic equipment.

### Requirements for concentration limits for certain hazardous substances in electronic information products:

Crydom products do not contain Cadmium, Mercury, Hexavalent Chromium, Poly-brominated Biphenyls (PBB), or Polybrominated Diphenyl Ethers (PBDE) as either intentionally added ingredients or as unintended impurities in concentrations exceeding EU regulatory limits.

The Crydom products listed below comply with the requirements of the Directive, including any relevant exemptions contained therein.

## Questions?

**Americas Tech Support:**  
e-mail: [support@crydom.com](mailto:support@crydom.com)

**EMEA Tech Support:**  
e-mail: [tech-europe@crydom.com](mailto:tech-europe@crydom.com)

## Americas Customer Service Center:

> +1 (877) 502-5500

> 7am-5pm (PST), Monday-Friday

> e-mail: [sales@crydom.com](mailto:sales@crydom.com)

## EMEA Customer Service Center:

> + 44 (0) 1202-606030

> 8:30am-4:45pm (GMT), Monday-Thursday

> 8:30am-3:15pm (GMT), Friday

> e-mail: [sales-europe@crydom.com](mailto:sales-europe@crydom.com)

## Approvals

**CE** - Conformité Européenne (French for European Conformity). The CE marking signifies conformance to the latest European Directives and that the device can be sold in the European Union (EU).

**CSA** - Canadian Standards Association. An independent testing laboratory that establishes commercial and industrial standards, and tests/certifies products in Canada.

**UL, cUL** - Underwriters Laboratory. An independent testing laboratory that establishes commercial and industrial standards, and tests/certifies products in the United States (UL) and Canada (cUL).

**VDE** - Verband Deutscher Elektrotechniker. An independent German testing and certification institute that establishes commercial and industrial standards concerned with the safety of electrical products.

**TUV** - Globally recognized testing, inspection and certification organization.

**crydom**  
Across the Globe

Crydom is an operation of Custom Sensors & Technologies (CST), a business unit of Schneider Electric.
