STOPPER SETTING

For HS16, TS, & PS Models

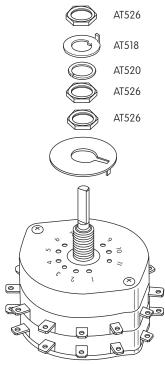

The HS16, TS, and PS switches are supplied with the stopper plate set for the maximum number of positions allowed for that model. Prior to installation, the desired stopper setting should be made:

- Be sure the shaft is turned counterclockwise to the extreme left. If the shaft is not turned counterclockwise to the extreme left, proper setting cannot be achieved.
- Loosen the nut far enough to allow raising the stopper plate for resetting.
- Insert the stopper in the numbered hole for the desired stopper setting. Satisfactory switch functioning cannot be assured if the stopper plate is not properly positioned.
- Tighten the nut firmly against the stopped plate.

Standard Hardware Supplied with HS, TS, and PS:

AT526 Hex Mounting Nut (quantity 3) AT518 Locking Ring (quantity 1) AT520 Split Lockwasher (quantity 1)

Use of mounting supports on PS is optional; screws are not provided.
