

Features and Benefits

The DataGate Plus jack is designed to maintain clean secure connections. The RJ-45 jack features a patented 'spring-loaded shutter' which protects it from dust and contaminants as well as provides tactile feedback—the spring-loaded shutter pops out an improperly seated patch cord—all with single-handed plug-in and removal. DataGate Plus jacks utilize patented IDC V-shaped contacts that flex not fatigue when terminated. The DataGate Plus jack is engineered for use across a broad range of Molex Premise Networks products.

- Patented Spring-Loaded Shutter:
 - prevents incomplete mating
 - protects from dust and contaminants
- Patented IDC V-shaped contacts that flex not fatigue when terminated
- Features pointed IDC towers to speed termination and enhance cable retention
- Dual color-coding allows for 568 A/B wiring configuration
- Can be terminated using industry standard punch-down tools
- RJ-11 compatible
- Molded category identification on jack face as well as optional port identification icons
- USOC Wiring Sequences Available
