

# OSRAM OSTAR - Lighting plus

## Lead (Pb) Free Product - RoHS Compliant

### LE CW S2LN

### Vorläufige Daten / preliminary data

#### Besondere Merkmale

- **Gehäusetyyp:** Kompakte Lichtquelle in Multi-Chip SMT Technologie mit Silikonlinse
- **Besonderheit des Bauteils:** extrem hohe Helligkeit und Leuchtdichte dank Oberflächenemission und hoher Chip-Packungsdichte
- **Typischer Lichtstrom:** 365 lm bei 350 mA (3000 K)
- **Typische Farbtemperatur:** 2700 K; 3000 K; 4000 K; 5000 K
- **Typischer Farbwiedergabeindex:** 80
- **Abstrahlwinkel:** 140°
- **Lötmethode:** Reflow Löten
- **ESD-Festigkeit:** ESD-sicher bis 2 kV nach JESD22-A114-D
- **Erweiterte Korrosionsfestigkeit:** Details siehe Seite 15
- **Feuchtestabilität:** Details siehe Seite 15

#### Anwendungen

- Ladenbeleuchtung
- Spots und Schreibtischbeleuchtung
- Lampenretrofits
- Anwendungen mit Reflektoroptiken
- Downlights

#### Features

- **Package:** compact lightsource in multi chip SMT technology with silicone lens
- **Feature of the device:** outstanding brightness and luminance due to pure surface emission and high chip packing density
- **Typical Luminous Flux:** 365 lm at 350 mA (3000 K)
- **Typ. color temperature:** 2700 K; 3000 K; 4000 K; 5000 K
- **Typ. color rendering index:** 80
- **Viewing angle:** 140°
- **Soldering methods:** reflow soldering
- **ESD-withstand voltage:** up to 2 kV acc. to JESD22-A114-D
- **Superior Corrosion Robustness:** details see page 15
- **Humidity Robustness:** details see page 15

#### Applications

- Shop lighting
- Spot- and tasklights
- Retrofit lamps
- Applications using reflector lamps
- Downlights

**Bestellinformation**

| LE CW S2LN-NXNZ-5L7N | 4000K             | 280 ... 450                                    | 375 (typ.)                                     | Q65111A0586   |
| LE CW S2LN-NXNZ-5H7I | 5000K             | 280 ... 450                                    | 375 (typ.)                                     | Q65111A1217   |

Anm.: Die oben genannten Typbezeichnungen umfassen die bestellbaren Selektionen. Diese bestehen aus wenigen Helligkeitsgruppen (siehe **Seite 9** für nähere Informationen). Es wird nur eine einzige Helligkeitsgruppe pro Gurt geliefert. Z.B.: LE CW S2LN-NXNZ-5R8T bedeutet, dass auf dem Gurt nur eine der Helligkeitsgruppen -NX, -NY oder -NZ enthalten ist.

Um die Liefersicherheit zu gewährleisten, können einzelne Helligkeitsgruppen nicht bestellt werden.

Gleiches gilt für die Farben, bei denen Farbortgruppen gemessen und gruppiert werden. Pro Gurt wird nur eine Farbortgruppe geliefert. Z.B.: LE CW S2LN-NXNZ-5R8T bedeutet, dass auf einem Gurt nur eine der Farbortgruppen -5R bis -8T enthalten ist (siehe **Seite 5** für nähere Information).

Um die Liefersicherheit zu gewährleisten, können einzelne Farbortgruppen nicht bestellt werden.

Note: The above Type Numbers represent the order groups which include only a few brightness groups (see **page 9** for explanation). Only one group will be shipped on each reel (there will be no mixing of two groups on each reel). E.g. LE CW S2LN-NXNZ-5R8T means that only one group -NX, -NY or -NZ will be shippable for any one reel.

In order to ensure availability, single brightness groups will not be orderable.

In a similar manner for colors where chromaticity coordinate groups are measured and binned, single chromaticity coordinate groups will be shipped in any one reel. E.g. LE CW S2LN-NXNZ-5R8T means that only 1 chromaticity coordinate group -5R to -8T will be shippable (see **page 5** for explanation).

In order to ensure availability, single chromaticity coordinate groups will not be orderable.

## Helligkeits-Gruppierungsschema Brightness Groups

| Helligkeitsgruppe<br>Brightness Group | Lichtstrom <sup>2)</sup> Seite 22<br>Luminous Flux <sup>2)</sup> page 22<br>$\Phi_V$ (lm) |
|---------------------------------------|-------------------------------------------------------------------------------------------|
| NX                                    | 280 ... 330                                                                               |
| NY                                    | 330 ... 390                                                                               |
| NZ                                    | 390 ... 450                                                                               |

Anm.: Die Standardlieferform von Serientypen beinhaltet eine Familiengruppe. Diese besteht aus wenigen Helligkeitsgruppen. Einzelne Helligkeitsgruppen sind nicht bestellbar.

Note: The standard shipping format for serial types includes a family group of only a few individual brightness groups. Individual brightness groups cannot be ordered.

## Gruppenbezeichnung auf Etikett Group Name on Label

Beispiel: NX-5R

Example: NX-5R

| Helligkeitsgruppe<br>Brightness Group | Farbortgruppe<br>Chromaticity coordinate group |
|---------------------------------------|------------------------------------------------|
| NX                                    | 5R                                             |

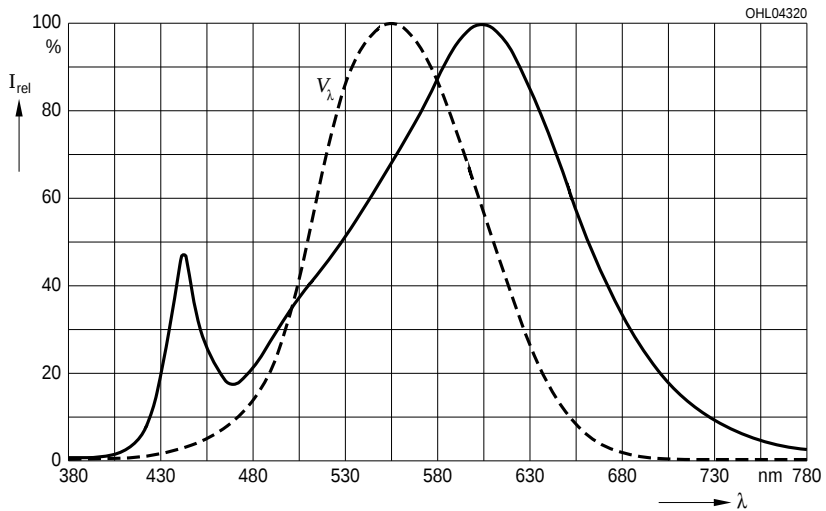

Anm.: In einer Verpackungseinheit ist immer nur eine Gruppe für jede Selektion enthalten.

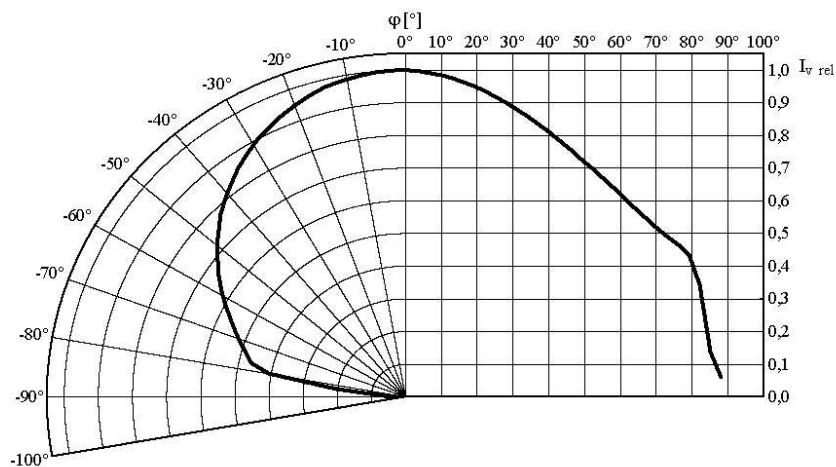

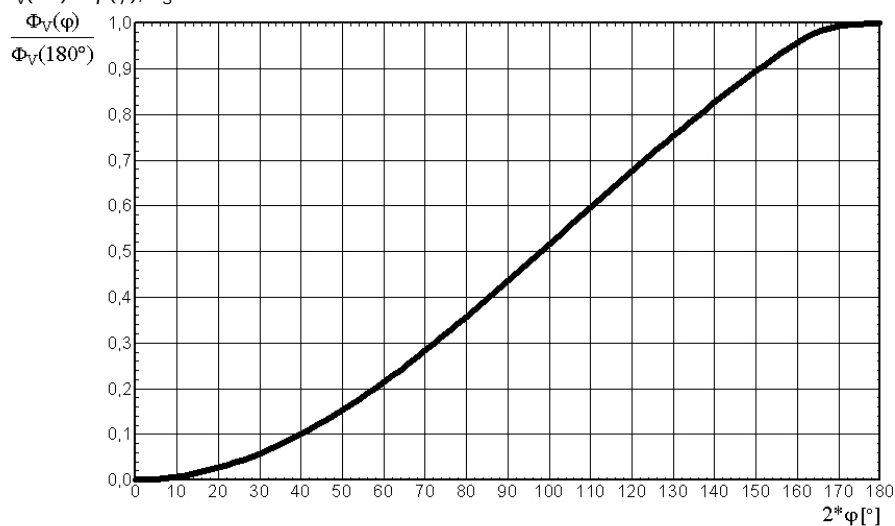

Note: No packing unit ever contains more than one group for each selection.

## Trockenverpackung und Materialien Dry Packing Process and Materials

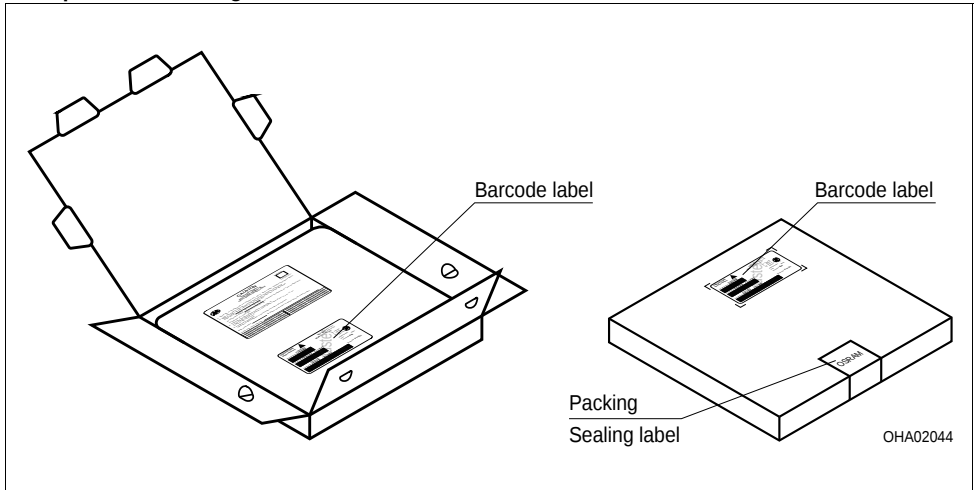

Anm.: Feuchteempfindliche Produkte sind verpackt in einem Trockenbeutel zusammen mit einem Trockenmittel und einer Feuchteindikatorkarte

Bezüglich Trockenverpackung finden Sie weitere Hinweise im Internet und in unserem Short Form Catalog im Kapitel "Gurtung und Verpackung" unter dem Punkt "Trockenverpackung". Hier sind Normenbezüge, unter anderem ein Auszug der JEDEC-Norm, enthalten.

Note: Moisture-sensitive product is packed in a dry bag containing desiccant and a humidity card.

Regarding dry pack you will find further information in the internet and in the Short Form Catalog in chapter "Tape and Reel" under the topic "Dry Pack". Here you will also find the normative references like JEDEC.

Anm.: Wegen der Streichung der LED aus der IEC 60825-1 (2nd edition 2007-03) erfolgt die Bewertung der Augesicherheit nach dem Standard CIE S009/E:2002 ("photobiological safety of lamps and lamp systems") / IEC 62471 (1st edition 2006-07). Im Risikogruppensystem dieser CIE- Norm erfüllen die in diesem Datenblatt angegebenen LED die "moderate risk"- Gruppe (die sich im "sichtbaren" Spektralbereich auf eine Expositionsdauer von 0,25 s bezieht). Unter realen Umständen (für Expositionsdauer, Augenpupille, Betrachtungsabstand) geht damit von diesen Bauelementen keinerlei Augengefährdung aus. Grundsätzlich sollte jedoch erwähnt werden, dass intensive Lichtquellen durch ihre Blendwirkung ein hohes sekundäres Gefahrenpotenzial besitzen. Wie nach dem Blick in andere helle Lichtquellen (z.B. Autoscheinwerfer) auch, können temporär eingeschränktes Sehvermögen und Nachbilder je nach Situation zu Irritationen, Belästigungen, Beeinträchtigungen oder sogar Unfällen führen.

Note: Due to the cancellation of the LED from IEC 608251 (2nd edition 2007-03), the evaluation of eye safety occurs according to the dual IEC/CIE logo standard CIE S009/E:2002 ("photobiological safety of lamps and lamp systems")- IEC 62471 (1st edition 2006-07). Within the risk grouping system of this CIE standard, the LEDs specified in this data sheet fall into the "moderate risk" group (relating to devices in the visible spectrum with an exposure time of 0.25s). Under real circumstances (for exposure time, eye pupils, observation distance), it is assumed that no endangerment to the eye exists from these devices. As a matter of principle, however, it should be mentioned that intense light sources have a high secondary exposure potential due to their blinding effect. As is also true when viewing other bright light sources (e.g. headlights), temporary reduction in visual acuity and afterimages can occur, leading to irritation, annoyance, visual impairment, and even accidents, depending on the situation.

**Attention please!**

The information describes the type of component and shall not be considered as assured characteristics. Terms of delivery and rights to change design reserved. Due to technical requirements components may contain dangerous substances. For information on the types in question please contact our Sales Organization. If printed or downloaded, please find the latest version in the Internet.

**Packing**

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office. By agreement we will take packing material back, if it is sorted. You must bear the costs of transport. For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

**Components used in life-support devices or systems must be expressly authorized for such purpose!** Critical components<sup>7)</sup> page 22 may only be used in life-support devices or systems<sup>8)</sup> page 22 with the express written approval of OSRAM OS.

**Fußnoten:**

- <sup>1)</sup> Helligkeitswerte werden während eines Strompulses einer typischen Dauer von 25 ms, mit einer internen Reproduzierbarkeit von  $\pm 8\%$  und einer erweiterten Messunsicherheit von  $\pm 11\%$  gemessen (gemäß GUM mit Erweiterungsfaktor  $k = 3$ ).
- <sup>2)</sup> Wegen der besonderen Prozessbedingungen bei der Herstellung von LED können typische oder abgeleitete technische Parameter nur aufgrund statistischer Werte wiedergegeben werden. Diese stimmen nicht notwendigerweise mit den Werten jedes einzelnen Produktes überein, dessen Werte sich von typischen und abgeleiteten Werten oder typischen Kennlinien unterscheiden können. Falls erforderlich, z.B. aufgrund technischer Verbesserungen, werden diese typischen Werte ohne weitere Ankündigung geändert.
- <sup>3)</sup> Farbkoordinaten werden während eines Strompulses einer typischen Dauer von 25 ms, mit einer internen Reproduzierbarkeit von  $\pm 0,005$  und einer erweiterten Messunsicherheit von  $\pm 0,01$  gemessen (gemäß GUM mit Erweiterungsfaktor  $k = 3$ ).
- <sup>4)</sup> Vorwärtsspannungen werden während eines Strompulses einer typischen Dauer von 8 ms, mit einer internen Reproduzierbarkeit von  $\pm 0,05$  V und einer erweiterten Messunsicherheit von  $\pm 0,1$  V gemessen (gemäß GUM mit Erweiterungsfaktor  $k=3$ ).
- <sup>5)</sup> Im gestrichelten Bereich der Kennlinien muss mit erhöhten Helligkeitsunterschieden zwischen Leuchtdioden innerhalb einer Verpackungseinheit gerechnet werden.
- <sup>6)</sup> Maße werden wie folgt angegeben: mm (inch).
- <sup>7)</sup> Ein kritisches Bauteil ist ein Bauteil, das in lebenserhaltenden Apparaten oder Systemen eingesetzt wird und dessen Defekt voraussichtlich zu einer Fehlfunktion dieses lebenserhaltenden Apparates oder Systems führen wird oder die Sicherheit oder Effektivität dieses Apparates oder Systems beeinträchtigt.
- <sup>8)</sup> Lebenserhaltende Apparate oder Systeme sind für (a) die Implantierung in den menschlichen Körper oder  
(b) für die Lebenserhaltung bestimmt.  
Falls sie versagen, kann davon ausgegangen werden, dass die Gesundheit und das Leben des Patienten in Gefahr ist.

**Remarks:**

- <sup>1)</sup> Brightness values are measured during a current pulse of typical 25 ms, with an internal reproducibility of  $\pm 8\%$  and an expanded uncertainty of  $\pm 11\%$  (acc. to GUM with an coverage factor of  $k = 3$ ).
- <sup>2)</sup> Due to the special conditions of the manufacturing processes of LED, the typical data or calculated correlations of technical parameters can only reflect statistical figures. These do not necessarily correspond to the actual parameters of each single product, which could differ from the typical data and calculated correlations or the typical characteristic line.  
If requested, e.g. because of technical improvements, these typ. data will be changed without any further notice.
- <sup>3)</sup> Chromaticity coordinates are measured during a current pulse of typical 25 ms, with an internal reproducibility of  $\pm 0,005$  and an expanded uncertainty of  $\pm 0,01$  (acc. to GUM with an coverage factor of  $k = 3$ ).
- <sup>4)</sup> The forward voltage is measured during a current pulse of typical 8 ms, with an internal reproducibility of  $\pm 0,05$  V and an expanded uncertainty of  $\pm 0,1$  V (acc. to GUM with an coverage factor of  $k=3$ ).
- <sup>5)</sup> In the range where the line of the graph is broken, you must expect higher brightness differences between single LEDs within one packing unit.
- <sup>6)</sup> Dimensions are specified as follows: mm (inch).
- <sup>7)</sup> A critical component is a component used in a life-support device or system whose failure can reasonably be expected to cause the failure of that life-support device or system, or to affect its safety or the effectiveness of that device or system.
- <sup>8)</sup> Life support devices or systems are intended  
(a) to be implanted in the human body,  
or  
(b) to support and/or maintain and sustain human life. If they fail, it is reasonable to assume that the health and the life of the user may be endangered.
