

Solid State Relays SOLITRON POWER - With Integrated Heatsink Types RJ1A, RJ1B

- AC semiconductor contactor
- Zero switching (RJ1A) or instant-on switching (RJ1B)
- Direct copper bonding (DCB) technology
- LED-indication
- Cage clamp terminals
- 2 input ranges: 4-32 VDC and 24-275 VAC/24-48 VDC
- Operational ratings up to 90 AACrms and 600 VAC¹
- Blocking voltage: Up to 1200 V_p
- Opto-isolation > 4000 VACrms
- Over-temperature safety option²
- Integrated fan option
- Option for UL508 listing⁵

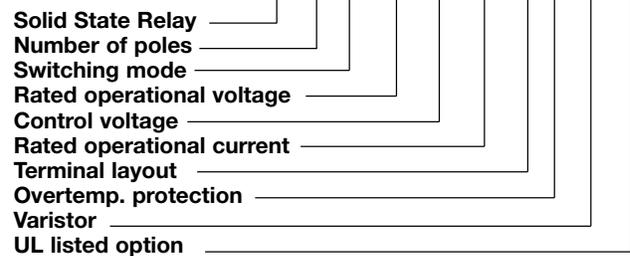

Product Description

The SOLITRON Power is a single-phase Solid State Contactor designed to replace electro-mechanical contactors in industrial heating and motor applications. This product can cope with frequent switching of high current loads. The product is ready to mount on DIN-rail or chassis and comes with integral heatsink. For current rating of 90 AACrms (AC51) convection cooling is used. The terminal layout

allows both contactor (E) and SSR (U) type connection. Cage clamp terminals are used to ensure secure load connection with cable up to 25mm².

An LED indicates the status of the control input. The superior heat-transfer efficiency combined with a robust power management system make this a high reliability product that can meet the most stringent functional requirements.

Notes

- ¹ 690 VACrms rated operational voltage available on request. Example: RJ1A69D70U
- ² "P" suffix: Over-temperature protection (OTP), available with type "E" terminals only
- ³ Instant On versions not available with AC control voltage
- ⁴ With integrated fan and over-temperature protection - fan will automatically switch on when necessary
- ⁵ "M" suffix available only on request. Product ending with "M" is UL listed with NMFT/ NMFT7 requirements for motor loads.
