S-89210/89220 Series

MINI ANALOG SERIES
CMOS COMPARATOR

www.sii-ic.com

The mini-analog series is a group of ICs that incorporate a general purpose analog circuit in a small package.
The S-89210/89220 Series is a CMOS type comparator works on a lower voltage and lower current consumption. These features make this product the ideal solution for small battery-powered portable equipment.
This product is a single comparator (with 1 circuit).

■ Features

- Lower operating voltage than the conventional general-purpose: V_{DD} = 1.8 V to 5.5 V
- Low current consumption: I_{DD} = 50 μA Typ. (S-89210 Series), I_{DD} = 10 μA Typ. (S-89220 Series)
- Low input offset voltage: 4.0 mV Max.
- Lead-free, halogen-free*1

***1.** Refer to "■ **Product Name Structure**" for details.

■ Application

- Mobile phones
- Notebook PCs
- Digital cameras
- Digital video cameras

■ Package

- SC-88A

■ Block Diagram

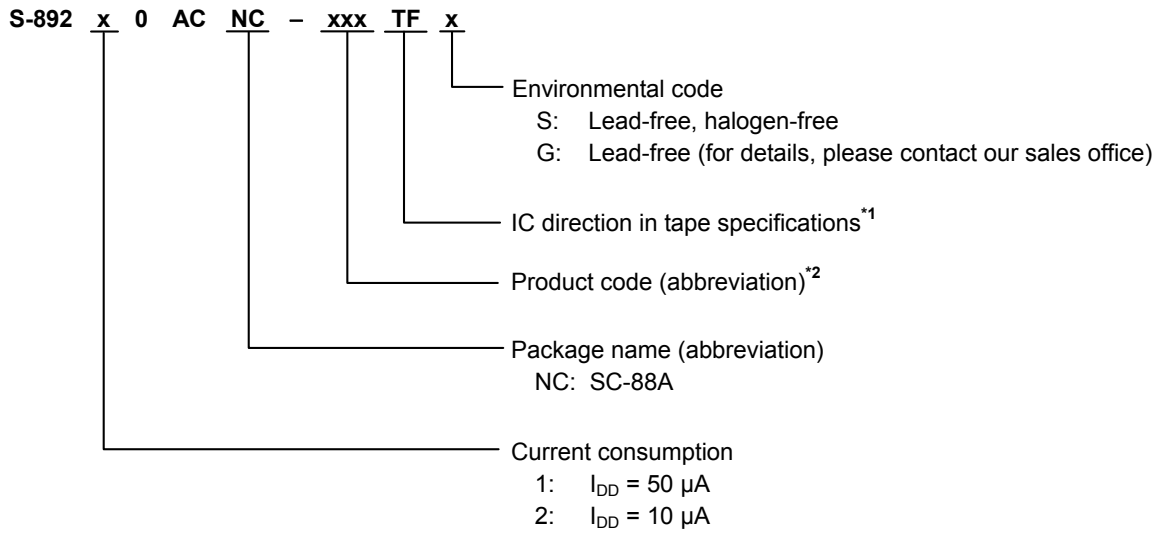
■ Product Name Structure

Users can select the product type for the S-89210/89220 Series. Refer to "**1. Product name**" regarding the contents of product name, "**2. Package**" regarding the package drawings and "**3. Product name list**" regarding the product type.

1. Product name



***1.** Refer to the tape specifications.
***2.** Refer to "**3. Product name list**".

2. Package

Package Name	Drawing Code		
	Package	Tape	Reel
SC-88A	NP005-B-P-SD	NP005-B-C-SD	NP005-B-R-SD

3. Product name list

Table 1

Product name	Current consumption	Rise propagation delay time*1	Fall propagation delay time*1
S-89210ACNC-1C0TFz	50 µA	30 µs	6 µs
S-89220ACNC-1C1TFz	10 µA	150 µs	30 µs

***1.** The value when V_{DD} = 3.0 V

Remark z: G or S

■ Pin Configuration

SC-88A
Top view

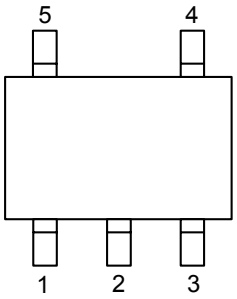


Figure 2

Table 2

Pin No.	Symbol	Description
1	IN(+)	Non-inverted input pin
2	VSS	GND pin
3	IN(–)	Inverted input pin
4	OUT	Output pin
5	VDD	Positive power supply pin

■ Absolute Maximum Ratings

Table 3

(Ta = +25°C unless otherwise specified)

Parameter	Symbol	Absolute Maximum Ratings	Unit
Power supply voltage	V_{DD}	V_{SS} – 0.3 to V_{SS} + 10.0	V
Input voltage	V_{IN}	V_{SS} – 0.3 to V_{SS} + 7.0	V
Output voltage	V_{OUT}	V_{SS} – 0.3 to V_{DD} + 0.3	V
Differential input voltage	V_{IND}	±7.0	V
Output pin current	I_{SINK}	13	mA
Power dissipation	P_D	200 (When not mounted on board)	mW
		350*1	mW
Operating ambient temperature	T_{opr}	−40 to +85	°C
Storage temperature	T_{stg}	−55 to +125	°C

***1.** When mounted on board
[Mounted board]
(1) Board size: 114.3 mm × 76.2 mm × t1.6 mm
(2) Board name: JEDEC STANDARD51-7

Caution The absolute maximum ratings are rated values exceeding which the product could suffer physical damage. These values must therefore not be exceeded under any conditions.

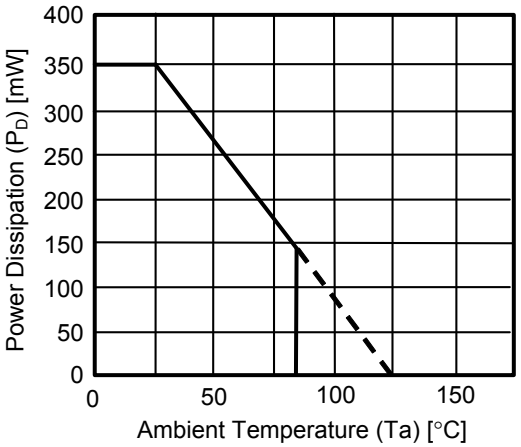

Figure 3 Power Dissipation of Package (When Mounted on Board)

■ Electrical Characteristics

Table 4

(Ta = +25°C unless otherwise specified)

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Unit	Test Circuit
Range of operating power supply voltage	V_{DD}	–	1.8	–	5.5	V	–

1. V_{DD} = 5.0 V

Table 5

DC Electrical Characteristic (V_{DD} = 5.0 V) (Ta = +25°C unless otherwise specified)

Parameter	Symbol	Conditions		Min.	Typ.	Max.	Unit	Test Circuit
Current consumption	I_{DD}	S-89210 Series		–	50	120	µA	5

■ Test Circuit

1. Power supply voltage rejection ratio, input offset voltage

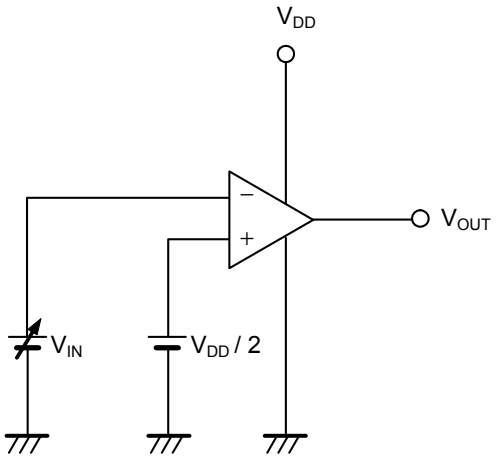

Figure 4

- **Power supply voltage rejection ratio (PSRR)**
  Input offset voltage (V_{IO})
  The input offset voltage (V_{IO}) is defined as V_{IN} – V_{DD} / 2 when V_{OUT} is changed by changing V_{IN} to V_{DD} / 2 level. The power supply voltage rejection ratio (PSRR) can be calculated by following expression, with the value of V_{IO} measured at each V_{DD}.

  Test conditions:
  When V_{DD} = 1.8 V: $V_{DD} = V_{DD1}$, $V_{IO} = V_{IO1}$
  When V_{DD} = 5.0 V: $V_{DD} = V_{DD2}$, $V_{IO} = V_{IO2}$

$$PSRR = 20 \log \left(\left| \frac{V_{DD1} - V_{DD2}}{V_{IO1} - V_{IO2}} \right| \right)$$

2. Common-mode input signal rejection ratio, common-mode input voltage range

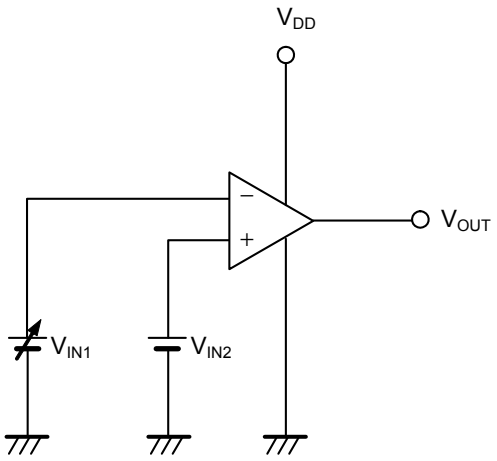

Figure 5

- **Common-mode input signal rejection ratio (CMRR)**
  The common-mode input signal rejection ratio (CMRR) can be calculated by the following expression, with the offset voltage (V_{IO}) set as V_{IN1} – V_{IN2} after V_{OUT} is changed by changing V_{IN1}.

  Test conditions:
  When $V_{IN2} = V_{CMR\ Max.}$: $V_{IN2} = V_{INH}$, $V_{IO} = V_{IO1}$
  When V_{IN2} = V_{DD} / 2: $V_{IN2} = V_{INL}$, $V_{IO} = V_{IO2}$

$$CMRR = 20 \log \left(\left| \frac{V_{INH} - V_{INL}}{V_{IO1} - V_{IO2}} \right| \right)$$

- **Common-mode input voltage range (V_{CMR})**
  Varying V_{IN2}, the range of V_{IN2} that satisfies the common-mode input signal rejection ratio (CMRR) is the common-mode input voltage range (V_{CMR}).

3. Maximum output swing voltage (V_{OH})

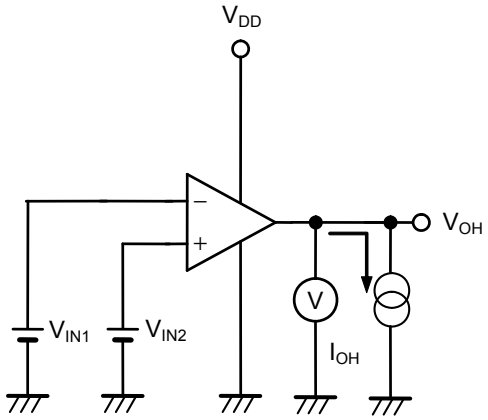

Figure 6

- **Maximum output swing voltage (V_{OH})**

  Test conditions:

  $V_{IN1} = \frac{V_{DD}}{2} - 0.5$ V

  $V_{IN2} = \frac{V_{DD}}{2} + 0.5$ V

  $I_{OH} = 20$ μA

4. Maximum output swing voltage (V_{OL})

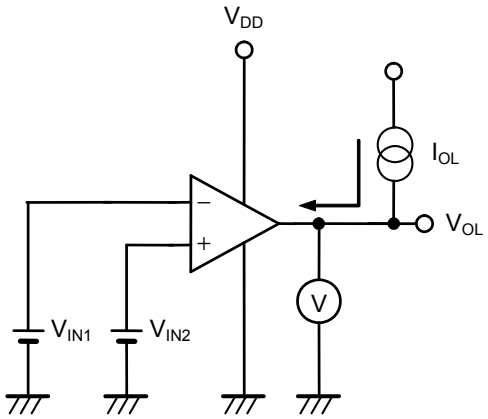

Figure 7

- **Maximum output swing voltage (V_{OL})**

  Test conditions:

  $V_{IN1} = \frac{V_{DD}}{2} + 0.5$ V

  $V_{IN2} = \frac{V_{DD}}{2} - 0.5$ V

  $I_{OL} = 20$ μA

5. Current consumption

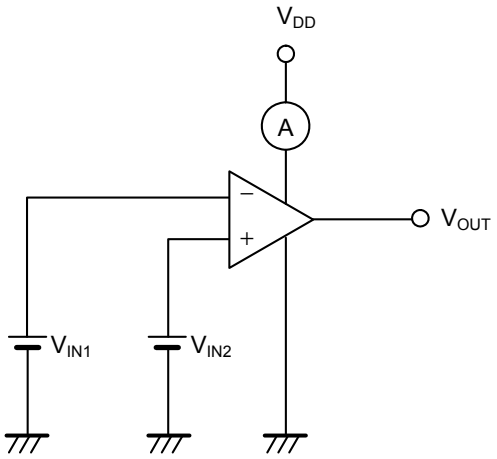

Figure 8

- **Current consumption (I_{DD})**

  Test conditions:
  $V_{IN1} = V_{SS}$
  $V_{IN2} = V_{CMR\ Max.}$

6. Source current

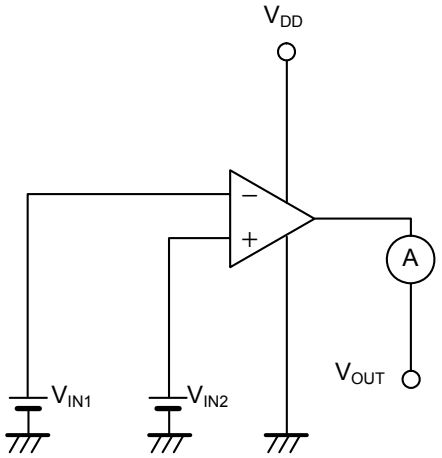

Figure 9

- **Source current (I_{SOURCE})**

  Test conditions:
  V_{OUT} = 0 V
  $V_{IN1} = \frac{V_{DD}}{2} - 0.5$ V
  $V_{IN2} = \frac{V_{DD}}{2} + 0.5$ V

7. Sink current

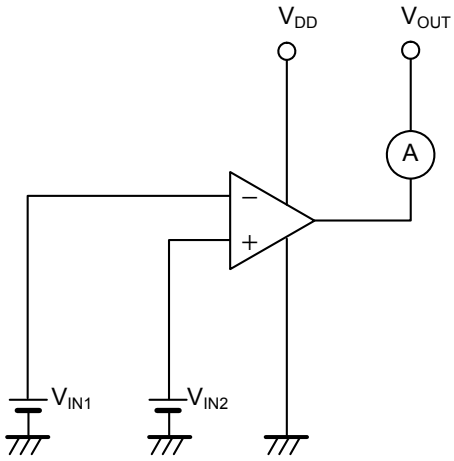

Figure 10

- **Sink current (I_{SINK})**

  Test conditions:
  V_{OUT} = 0.5 V
  $V_{IN1} = \frac{V_{DD}}{2} + 0.5$ V
  $V_{IN2} = \frac{V_{DD}}{2} - 0.5$ V

8. Propagation time, response time

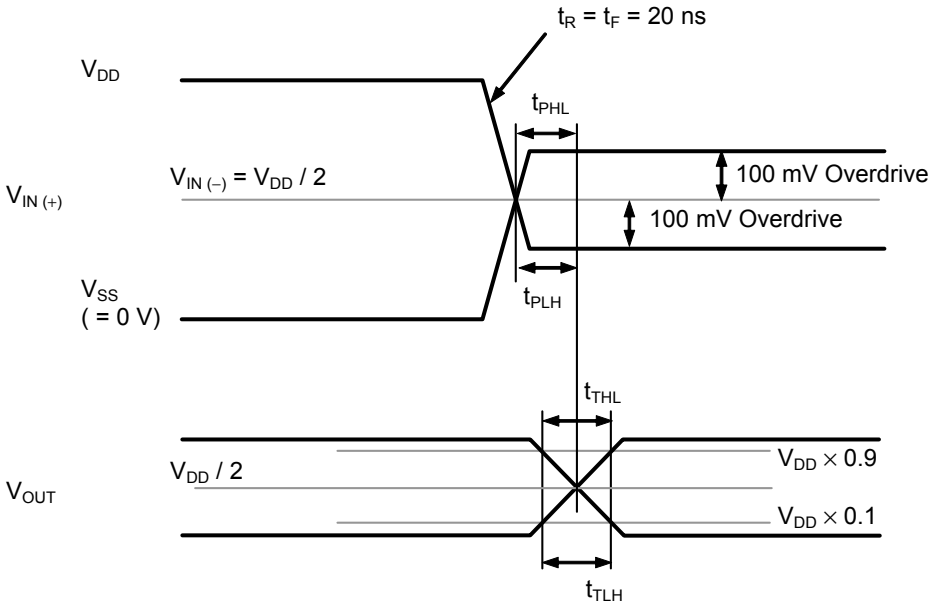

Figure 11

■ Precautions

- Do not apply an electrostatic discharge to this IC that exceeds performance ratings of the built-in electrostatic protection circuit.
- SII Semiconductor Corporation claims no responsibility for any disputes arising out of or in connection with any infringement by products including this IC of patents owned by a third party.
- Use this IC with the output pin current 13 mA or less.

Disclaimers (Handling Precautions)

1. All the information described herein (product data, specifications, figures, tables, programs, algorithms and application circuit examples, etc.) is current as of publishing date of this document and is subject to change without notice.
2. The circuit examples and the usages described herein are for reference only, and do not guarantee the success of any specific mass-production design.
   SII Semiconductor Corporation is not responsible for damages caused by the reasons other than the products or infringement of third-party intellectual property rights and any other rights due to the use of the information described herein.
3. SII Semiconductor Corporation is not responsible for damages caused by the incorrect information described herein.
4. Take care to use the products described herein within their specified ranges. Pay special attention to the absolute maximum ratings, operation voltage range and electrical characteristics, etc.
   SII Semiconductor Corporation is not responsible for damages caused by failures and/or accidents, etc. that occur due to the use of products outside their specified ranges.
5. When using the products described herein, confirm their applications, and the laws and regulations of the region or country where they are used and verify suitability, safety and other factors for the intended use.
6. When exporting the products described herein, comply with the Foreign Exchange and Foreign Trade Act and all other export-related laws, and follow the required procedures.
7. The products described herein must not be used or provided (exported) for the purposes of the development of weapons of mass destruction or military use. SII Semiconductor Corporation is not responsible for any provision (export) to those whose purpose is to develop, manufacture, use or store nuclear, biological or chemical weapons, missiles, or other military use.
8. The products described herein are not designed to be used as part of any device or equipment that may affect the human body, human life, or assets (such as medical equipment, disaster prevention systems, security systems, combustion control systems, infrastructure control systems, vehicle equipment, traffic systems, in-vehicle equipment, aviation equipment, aerospace equipment, and nuclear-related equipment), excluding when specified for in-vehicle use or other uses. Do not use those products without the prior written permission of SII Semiconductor Corporation.
   Especially, the products described herein cannot be used for life support devices, devices implanted in the human body and devices that directly affect human life, etc.
   Prior consultation with our sales office is required when considering the above uses.
   SII Semiconductor Corporation is not responsible for damages caused by unauthorized or unspecified use of our products.
9. Semiconductor products may fail or malfunction with some probability.
   The user of these products should therefore take responsibility to give thorough consideration to safety design including redundancy, fire spread prevention measures, and malfunction prevention to prevent accidents causing injury or death, fires and social damage, etc. that may ensue from the products' failure or malfunction.
   The entire system must be sufficiently evaluated and applied on customer's own responsibility.
10. The products described herein are not designed to be radiation-proof. The necessary radiation measures should be taken in the product design by the customer depending on the intended use.
11. The products described herein do not affect human health under normal use. However, they contain chemical substances and heavy metals and should therefore not be put in the mouth. The fracture surfaces of wafers and chips may be sharp. Take care when handling these with the bare hands to prevent injuries, etc.
12. When disposing of the products described herein, comply with the laws and ordinances of the country or region where they are used.
13. The information described herein contains copyright information and know-how of SII Semiconductor Corporation.
    The information described herein does not convey any license under any intellectual property rights or any other rights belonging to SII Semiconductor Corporation or a third party. Reproduction or copying of the information described herein for the purpose of disclosing it to a third-party without the express permission of SII Semiconductor Corporation is strictly prohibited.
14. For more details on the information described herein, contact our sales office.
