TUBES

Aluminum tubes provide structural integrity and act as conduit for equipment wiring. Tubes attach to system components with 6 setscrews on each end of the tube. Setscrews are provided with system couplings, not the tubes. Setscrews allow for easy adjustment and leveling of the system. Setscrews are provided with thread sealer providing secure connections. Available in 6 standard lengths ranging from 250 mm (9.84) to 1500 mm (59.05). Tubes 750 mm (29.53) and longer include drilling template to assist with drilling and tapping the holes when tube is cut to length.

Note to Specifier:

The Following Images show how you can combine the SYSPEND 281-MAX and SYSPEND 180-MAX systems using the Reduction Elbow. The Length of the system will need to come from the SYSPEND 281-MAX and the connection to the enclosure will be the SYSPEND 180-MAX. The following charts will include the number of tubes necessary for each system as well as the couplings.

Please note that all of the possible length options for tubes are given for your reference and only select the total number of parts listed in the table Qty. column.
