

SC-MATHSCON

Programmable Mathematics Unit

The SC-MATHSCON Isolating Signal Converter can be user-configured to carry out a wide range of mathematical functions on two isolated input channels. One input is a universal current, voltage, thermocouple or RTD input, and the other can be either voltage or current. Each channel can be multiplied by a factor or linearised and then any of the following functions can be performed on those input channels.

Addition	Output = A + B
Subtraction	Output = A - B
Multiplication	Output = A x B
Division	Output = A / B
Square Root	Output = $\sqrt{A-B}$

High Signal Select
Low Signal Select
Average of the two signals

The unit provides an isolated, scaleable current or voltage output corresponding to the result of the required function.

The power supply requirement is 16 to 32V dc.

- **User Configurable Maths Function**
- **Two Isolated Inputs and One Isolated Output**
- **3-Port Isolation to 1000Vdc**
- **High Accuracy, Low Cost**
- **Ultra Compact, only 17.5mm Wide**
- **1 Universal & 1 Voltage/Current Input**

Notes

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur.

Device is protected against reverse polarity connection.

Accuracy figures based on an ambient temperature of 20 $^\circ\text{C}$.

The Time Constant is dependent on which processing options are been selected.
