SMART MODULAR TECHNOLOGIES

INDUSTRY EXPERIENCE DESIGN EXPERTISE

SMART is a leading independent designer, manufacturer and supplier of electronic subsystems to OEMs engaged in the computer, industrial, networking, telecommunications, aerospace and defense markets. Taking innovations from the design stage through manufacturing and delivery, SMART has developed a comprehensive memory product line that includes DRAM, SRAM, and Flash memory in various form factors. SMART's presence in the U.S., Europe, Asia, and Latin America enables it to provide its customers with proven expertise in international logistics, asset management, and supply-chain management worldwide.

SMART supports a wide variety of industry-standard and custom DRAM Memory Modules. The DRAM technologies that are supported range from leading-edge DDR4 to legacy FPM and EDO. The module form factors include standard height and very low profile DIMMs, SO-DIMMs, and Mini-DIMMs in registered, unbuffered, and ECC configurations.

DDR4 NVDIMM

- FULL PERSISTENT MEMORY
- NONVOLATILE CACHE BACKUP FOR RAID STORAGE SYSTEMS
- <10GB/S TRANSFER

SMART's DDR4 NVDIMMs combine nonvolatile memory functionality with the latest DDR4 DRAM technology to provide a persistent memory solution all while improving application performance and data integrity in server and storage environments.

SMART's DDR4-2133 NVDIMMs feature proprietary SafeStor™ technology, the engine which initiates backup and restore operations upon command from the host controller. SMART's NVDIMMs operate as a JEDEC standard DDR4 RDIMM during normal operation.

CUSTOM PRODUCTS

SMART has a long history of partnering with customers to satisfy their specific design needs. With extensive industry and design expertise and global manufacturing capabilities, SMART offers a unique combination of advantages that can support customers' unique designs from conception to manufacturing and test. This allows SMART to efficiently and reliably tailor products to meet particular customer needs. For more information, please email customers@smartm.com.

SERVICES

SMART built its reputation by providing proven technology and quality products to the most demanding OEMs around the world. SMART backs these products with outstanding services and expertise in design, manufacturing, test, and logistical support. OEMs can be confident that SMART products will perform to the highest degree of reliability and compatibility, as well as meet all system requirements and OEM specifications. More information on SMART can be obtained at www.smartm.com.

Key Competitive Advantages

- Inventory management of volatile commodity parts
- Established strategic alliances with major semiconductor manufacturers
- Broad custom design and packaging capabilities
- Value-added engineering
- Custom testing capabilities
- Comprehensive pre- and post-sale technical support
- Conformal coating, stacking and component underfill for enhanced ruggedization

SMART Modular Technologies excels in designing, manufacturing, testing, and rapidly delivering both standard and custom modular technologies to OEMs around the world.

Design

SMART views design as the customer's path to market advantage. By working in partnership with its customers, SMART is able to deliver the most technically advanced products available.

Test

SMART's test procedures are designed to enable customers to be confident in dock-to-stock operation. Formalized, precise operational controls, SPC, and strong quality audit procedures allow SMART's OEM customers to eliminate incoming test with confidence. SMART's Enterprise Grade test option provides unmatched reliability.

Manufacturing

SMART offers localized, cost-efficient manufacturing services from consigned to turnkey manufacturing, all backed by 100% test using the industry's most advanced testing equipment.

Logistics

SMART sets itself apart from the competition through logistic services tailored to meet specific customers' needs. Services offered include procurement, inventory control, retail and bulk packaging, and drop-ship delivery.
