

< Specifications (Precautions and Prohibitions) >

● **Safety Precautions**

1) The products are designed for application in ordinary electronic equipment (AV equipment, OA equipment, telecommunication equipment, home appliances, amusement equipment, etc.). If the products are to be used in devices requiring extremely high reliability (medical equipment, transport equipment, aircraft/spacecraft, nuclear power controllers, fuel controllers, car equipment including car accessories, safety devices, etc.) and whose malfunction or operational error may endanger human life, please consult with the Company's sales staff in advance. If product malfunctions may result in serious damage, including that to human life, sufficient fail-safe measures must be taken, including the following:

- [a] Installation of protection circuits or other protective devices to improve system safety
- [b] Installation of redundant circuits in the case of single-circuit failure

2) The products are designed for use in a standard environment and not in any special environments. Application of the products in a special environment can deteriorate product performance. Accordingly, verification and confirmation of product performance, prior to use, is recommended if used under the following conditions:

- [a] Use in various types of liquid, including water, oils, chemicals, and organic solvents
- [b] Use outdoors where the products are exposed to direct sunlight, or in dusty places
- [c] Use in places where the products are exposed to sea winds or corrosive gases, including Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>2</sub>, and NO<sub>2</sub>
- [d] Use in places where the products are exposed to static electricity or electromagnetic waves
- [e] Use in proximity to heat-producing components, plastic cords, or other flammable items
- [f] Use involving sealing or coating the products with resin or other coating materials
- [g] Use involving unclean solder or use of water or water-soluble cleaning agents for cleaning after soldering
- [h] Use of the products in places subject to dew condensation

3) The products are not radiation resistant.

4) The Company is not responsible for any problems resulting from use of the products under conditions not recommended herein.

5) The Company should be notified of any product safety issues. Moreover, product safety issues should be periodically monitored by the customer.

● **Precautions Regarding Application Examples and External Circuits**

1) If change is made to the constant of an external circuit, allow a sufficient margin due to variations of the characteristics of the products and external components, including transient characteristics, as well as static characteristics.

2) The application examples, their constants, and other types of information contained herein are applicable only when the products are used in accordance with standard methods. Therefore, if mass production is intended, sufficient consideration to external conditions must be made.

| 1) These Specifications contain information related to the Company’s industrial property. Any use of them other than pertaining to the usage of appropriate products is not permitted. Duplication of these Specifications and its disclosure to a third party without the Company’s permission is prohibited.<br><br>2) Information and data on products, including application examples, contained in these specifications are simply for reference; the Company does not guarantee any industrial property rights, intellectual property rights, or any other rights of a third party regarding this information or data. Accordingly, the Company does not bear any responsibility for:<br>[a] infringement of the intellectual property rights of a third party<br>[b] any problems incurred by the use of the products listed herein.<br><br>3) The Company prohibits the purchaser of its products to exercise or use the intellectual property rights, industrial property rights, or any other rights that either belong to or are controlled by the Company, other than the right to use, sell, or dispose of the products. |                                       |                               |           |
| <b>● <u>Precautions on Use of Products</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                       |                               |           |
| 1) Verification and confirmation of performance characteristics of products, after on-board mounting, is advised.<br><br>2) In particular, if a transient load (a large amount of load applied in a short period of time, such as pulse) is applied, confirmation of performance characteristics after on-board mounting is strongly recommended. Avoid applying power exceeding normal rated power; exceeding the power rating under steady-state loading condition may negatively affect product performance and reliability.<br><br>3) When a highly active halogenous (chlorine, bromine, etc.) flux is used, the remainder of flux may negatively affect product performance and reliability.<br><br>4) In principle, the reflow soldering method must be used; if flow soldering method is preferred, please consult with the Company in advance.                                                                                                                                                                                                                                                                               |                                       |                               |           |
| <b>● <u>Precautions Regarding Product Storage</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                       |                               |           |
| 1) Product performance and soldered connections may deteriorate if the products are stored in the following places:<br>[a] Where the products are exposed to sea winds or corrosive gases, including Cl <sub>2</sub> , H <sub>2</sub> S, NH <sub>3</sub> , SO <sub>2</sub> , and NO <sub>2</sub><br>[b] Where the temperature or humidity exceeds those recommended by the Company<br><br>2) The guaranteed period of solder connections and product performance is within one year from shipment by the Company, provided that the above-mentioned storage conditions have been satisfied.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                       |                               |           |
| <b>● <u>Other Matters</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                       |                               |           |
| 1) Please sign these Specifications and return one copy to the Company.<br>If a copy is not returned within three months after the issued date specified on the front page of these Specifications, the Company will consider the Specifications accepted.<br>2) If any matter related to these Specifications needs to be clarified, discussions shall be held promptly between the two parties concerned to determine the issue.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                       |                               |           |
| ROHM CO., LTD.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | REV. : —                              | SPECIFICATION No. : TENTATIVE |           |

1. CONSTRUCTION White surface mount LEDs with reflector packaged featuring blue LED and phosphor technology.
2. USAGE Light source for LCD backlight, Illumination.
3. DIMENSIONS See Figure.1
4. ABSOLUTE MAXIMUM RATINGS (Ta=25°C)
 

|                       |       |                   |
|-----------------------|-------|-------------------|
| Power Dissipation     | P D   | 810mW             |
| Forward Current       | I F   | 180mA ( Notes 1 ) |
| Peak Forward Current  | I F P | 350mA ( Notes 2 ) |
| Reverse Voltage       | V R   | 5V                |
| Operating Temperature | Topr  | −40°C~+100°C      |
| Storage Temperature   | Tstg  | −40°C~+100°C      |

( Notes 1 Mounting conditions must be carefully considered )  
( Notes 2 Duty 1/10, 10ms Max )

5. ELECTRO—CHARACTERISTICS (Ta=25°C)

| DISCRIPTION              | SYMBOL | CONDITION | MIN. | TYP. | MAX. | UNITS |
|--------------------------|--------|-----------|------|------|------|-------|
| Forward Voltage          | VF     | IF=100mA  | —    | 3.8  | —    | V     |
| Luminous Intensity       | IV     | IF=100mA  | —    | 6.4  | —    | cd    |
| Chromaticity Coordinates | x      | IF=100mA  | —    | 0.30 | —    | —     |
|                          | y      | IF=100mA  | —    | 0.30 | —    | —     |

6. LUMINOUS CLASSIFICATION (Ta=25°C, IF=100mA)

| SYMBOL | LUMINOUS CLASSIFICATION RANGE |
|--------|-------------------------------|
| “0”    | 3. 5 ~ 4. 2 cd                |
| “1”    | 4. 2 ~ 5. 1 cd                |
| “2”    | 5. 1 ~ 6. 2 cd                |
| “3”    | 6. 2 ~ 7. 4 cd                |
| “4”    | 7. 4 ~ 8. 9 cd                |

Measurement tolerance : ±10%

Measurement tolerance :  $\pm 0.01$

## 8. PRODUCT WEIGHT

Product weight per piece, approx 0.017gm.

【Figure.1】

( Unit : mm )

( Note ) Tolerance is within  $\pm 0.2\text{mm}$  unless otherwise specified

【Taping : 1】

Packing quantity  
4000pcs / reel

( Unit : mm )

(note) Tolerance is within  $\pm 0.2\text{mm}$  unless otherwise specified.

**【STRUCTURE ・ MATERIAL】**

| No. | APPELLATION  | MATERIAL                 |
|-----|--------------|--------------------------|
| 1   | Frame        | Ag plating over Cu frame |
| 2   | Chip         | InGaN                    |
| 3   | Bonding Wire | Gold                     |
| 4   | Reflector    | Polyamide Resin          |
| 5   | Resin        | Silicon Resin            |

## 【PACKAGING REQUIREMENTS】

### 1. PACKING

- (1) 4,000pcs are packed in one reel.
- (2) One reel is packed in aluminum bag.  
The size of aluminum bag is 240(a) × 250(b)mm.  
The size up to 230(c)mm is to zipper.
- (3) Aluminum bag is sealed by pressured for all directions.

### 2. MARKING

The following information shall be described on a box label:  
ROHM Type number, Packing quantity, Luminous intensity rank,  
Lot number.

#### 【FORMER LABEL SPECIFICATION】

Note)  Indicates bar code expressed by code 39.

indicates Pb-free Products.

#### 【EXAMPLE OF LOT NO. MARKING】

## 【CAUTIONS IN HANDLING】

This product was developed as a surface mount LED especially suitable for reflow soldering.  
Please take care of following points when using this device.

### 1. DESIGNING OF PCB

As for a recommendable solder pattern, Please refer to Fig-1.

The size and direction of the pad pattern depend on the condition of the PCB,  
so, please investigate about the adjustment thoroughly before designing.

( n.b) Performance/characteristics of device shall considerably differ  
depending on mounting conditions. That is to say, the optimized  
heat-radiation mounting will make best use of device's performance.  
Thus, it is recommended to design the land pattern with use of  
Cu for a great deal of heat-radiation as well as the use of metal  
mounting board. )

(Fig-1)

### 2. SOLDERING

LED products do not contain reinforcement  
materials such as glass fillers.

Therefore, thermal stress by soldering greatly  
influences its reliability.

The temperature conditions for reflow soldering  
should therefore be set up according to the  
characteristic of this product. (See Fig-2)

Number of reflow process shall be max 2 times  
and these processes shall be performed in a row.  
Cooling process to normal temperature shall be required  
between the first and the second soldering process.

(Fig-2)

### 3. WASHING

Please note the following points when washing is required after soldering.

#### 4-1) WASHING SOLVENT

Isopropyl alcohol or other alcohol solvent is recommendable.

#### 4-2) TEMPERATURE

Below 30°C, immersion time ; within 3 minutes.

#### 4-3) ULTRA SONIC WASHING

Below 15W/1 liter of solvent tub or less.

#### 4-4) COOLING

Below 100°C within 3 minutes.

### 4. Heat – radiation design

Plases of luminous intensity under continuous load varies depending on the ambient temperature.

Therefore, it is requested that enough heat – radiation designing be conducted for mounting.

Also, please consider derating features for the setting drive current.

### 5. STORAGE

At reflow soldering, the reliability of this product is often influenced by moisture absorption;  
so that we apply the package with moisture proof for better condition for use. Please also note that,

5-1) Package : Not to be opened before using.

5-2) After unpackaging : LEDs to be kept in our moisture proof package with some desiccant (SILICA GEL).  
LEDs to be baked in case the SILICA GEL indicator loses its blue color.

5-3) Please use LEDs within 168 hours after the package is opened. (Condition at 30°C, max.70%Rh.)

In case they are not used within 168 hours, please put them back into the package.

5-4) BAKING (=Moisture Removal)

Please conduct baking under “reel condition” at 60°C, 12~24 hours (max.20%Rh) after unpackaging.

Please be careful not to give any stress to the reel & the embossed tape while baking, as they are susceptible  
to be deformed during the baking.

## RELATIVE LUMINOUS INTENSITY – FORWARD CURRENT 光度 – 順方向電流特性

## FORWARD CURRENT – FORWARD VOLTAGE 順方向電流 - 順方向電圧特性

## DERATING デイレイティング特性

## DERATING デレイトイング特性

## RELATIVE SPECTRAL EMISSION スペクトル特性

## FORWARD CURRENT - CHROMATICITY 順方向電流 - 色度特性

## RELATIVE LUMINOUS INTENSITY - VIEWING ANGLE 指向特性
