Programmers

Introduction:

The universal programmer SuperPro-IS01, allows to program, thanks to its output HE10 connector including a 20 wires ribbon cable, components welded on a card wich has an ICSP connector (IN-System programming). This 20 wires ribbon cable connected to a test clip, also allows to program CMS components previously Welded on a card. This small-sized programmer is also convenient in travel status because it includes a keyboard and a 4x16 characters LCD display for use in stand-alone mode without connecting it to a computer, (Usable with an SD-Card at the back of the housing). It currently supports over 9.000 components from 172 different manufacturers, (see full list in datasheet) and it can support low-voltage components until 1,2V. It includes all ICSP standards protocols as well as I2C, SPI, UART, BDM, MW, JTAG, CAN, RS232. It benefits equally of a protection against short-circuits. Including a ARM9 32bits RISC processor, it can program components very quickly and it can optimise programming algorithms. The software can also define projects for a specific component of the library of components with the following functions : read, erase, virgin test, programming, verifying and definition of the source file to program, all that allowing programming in production mode. It works with WindowsXP/Vista/Windows7/Windows8/Windows10 (32/64 bits).

Features:

Accepts standard file formats: JEDEC, INTEL (Extended) HEX, HOLTEK, EMC(.CDS), INTEL HEX16, Motorola S record, BINARY, Tektronix (linear & segmented), and auto find format.
Manages 16 and 32 bit word split (Set Programming).
Features Test Vector capability and multiarray fuse map editor.
Automaticly identifies the manufacturer and type of E(E)PROMs.
Modify algorithm parameters.
Set addresses intelligently, such as device start address, device end address, from buffer address and so on.
Auto system test. Mass production mode.
Accecpt low-voltage components until 1,2V.
Supports Windows XP / VISTA / Windows 7 / Windows 8.1 / Windows10 (32bit and 64bit) with 100MB of spare capacity.
