T_{LEAD}	Lead Temperature (Soldering, 20sec.)	+260	°C
T_{store}	Storage Temperature Range	-65 to +150	°C

Note 1. Permanent device damage may occur if absolute maximum ratings are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
