

TDEVP001 - Devpeak Net-Touch Web Server Combo Kit

The Net-Touch Web Server Combo Kit from Devpeak enables quick Internet connectivity supporting remote control and monitoring in a few simple steps. Setup is easy and once connected you can access the switches and LEDs on the board via a preprogrammed HTML page. The USB port allows for easy changes such as setting IP address, gateway address/mask, enabling DHCP and IP Gleaning. This all-in-one kit includes LCD display, breakout board with prototype area, sturdy enclosure, USB cable, and power supply.

- Based on PIC18F97J60 and Microchip's TCP/IP firmware stack
- Supports 8 digital outputs, 4 digital inputs, 1 analog input
- Pre-programmed MCU for quick and easy startup
- Compact, sturdy enclosure included
