

**SERIES: VOF-10 | DESCRIPTION: AC-DC POWER SUPPLY**
**FEATURES**

- up to 10 W continuous power
- compact size
- universal input (85~264 Vac / 120~375 Vdc)
- single output from 3.3~48 V
- no minimum load required
- 3000 V isolation
- over current, over voltage, and short circuit protections
- UL/cUL and TUV 60950-1 safety approvals
- no load power consumption < 0.5 W
- efficiency up to 78%

| MODEL      | output voltage | output current<br>max | output power<br>max | ripple <sup>1</sup><br>and noise<br>max | efficiency |
|------------|----------------|-----------------------|---------------------|---|------------|
|            | (Vdc)          | (A)                   | (W)                 | (mVp-p)                                 | typ (%)    |
| VOF-10-3.3 | 3.3            | 2.4                   | 8                   | 100                                     | 70         |
| VOF-10-5   | 5              | 2.0                   | 10                  | 100                                     | 75         |
| VOF-10-9   | 9              | 1.11                  | 10                  | 120                                     | 75         |
| VOF-10-12  | 12             | 0.83                  | 10                  | 120                                     | 75         |
| VOF-10-15  | 15             | 0.67                  | 10                  | 150                                     | 75         |
| VOF-10-24  | 24             | 0.42                  | 10                  | 240                                     | 78         |
| VOF-10-48  | 48             | 0.21                  | 10                  | 480                                     | 78         |

Notes: 1. Ripple & noise are measured at 20 MHz BW with 47  $\mu$ F ceramic and 100 nF electrolytic capacitors on the output

**PART NUMBER KEY**

## INPUT

| parameter      | conditions/description   | min       | typ | max        | units      |
|----------------|--|-----------|-----|------------|------------|
| voltage        |  | 85<br>120 |     | 264<br>375 | Vac<br>Vdc |
| frequency      |  | 47        |     | 63         | Hz         |
| input current  |  |           |     | 0.6        | A          |
| inrush current | 110 Vac, full load, cold start<br>220 Vac, full load, cold start |           |     | 15<br>30   | A<br>A     |
| input fuse     | built-in, non-user serviceable                                   |           |     |            |            |

## OUTPUT

| parameter                 | conditions/description            | min | typ          | max        | units  |
|---------------------------|-----------------------------------|-----|--------------|------------|--------|
| line regulation           | 3.3 V model<br>all other models   |     | ±0.6<br>±0.5 |            | %<br>% |
| load regulation           | 3.3 V model<br>all other models   |     | ±1.2<br>±1   |            | %<br>% |
| temperature coefficient   |                                   |     | ±0.05        |            | %/°C   |
| hold-up time              | 115 Vac at full load              |     | 16           |            | ms     |
| adjustability             | adjustable with built-in trim pot | -5  |              | 5          | %      |
| switching frequency       |                                   |     | 100          |            | kHz    |
| no load power consumption | all other models<br>48 V model    |     |              | 0.5<br>0.7 | W<br>W |

## PROTECTIONS

| parameter                | conditions/description                                    | min | typ | max | units |
|--------------------------|---|-----|-----|-----|-------|
| over voltage protection  | clamped by TVS  |     |     |     |       |
| over current protection  | automatically recovers                                    |     | 105 |     | %     |
| short circuit protection | protected, long term short circuit may reduce reliability |     |     |     |       |

## SAFETY & COMPLIANCE

| parameter            | conditions/description             | min     | typ   | max  | units |
|----------------------|------------------------------------|---------|-------|------|-------|
| isolation voltage    | at 10 mA for 1 minute              |         | 3,000 |      | Vac   |
| isolation resistance | input to output at 500 Vdc at 25°C | 50      |       |      | MΩ    |
| safety approvals     | TUV EN 60950, UL/cUL 60950-1       |         |       |      |       |
| EMI/EMC              | FCC class B, EN 55022 class B, CE  |         |       |      |       |
| leakage current      |                                    |         |       | 0.25 | mA    |
| RoHS compliant       | yes                                |         |       |      |       |
| MTBF                 | according to MIL-HDBK-217F         | 250,000 |       |      | hours |

## ENVIRONMENTAL

| parameter             | conditions/description | min | typ | max | units |
|-----------------------|------------------------|-----|-----|-----|-------|
| operating temperature | see derating curve     | 0   |     | 60  | °C    |
| storage temperature   |                        | -20 |     | 85  | °C    |
| operating humidity    | non-condensing         | 20  |     | 90  | %     |
| storage humidity      | non-condensing         | 20  |     | 90  | %     |

MECHANICAL

| parameter      | conditions/description                         | min | typ | max | units |
|----------------|--|-----|-----|-----|-------|
| dimensions     | 2.56 x 1.77 x 1.04 (65 x 45 x 26.5 mm)         |     |     |     | inch  |
| cooling method | free air convection (see derating curve below) |     |     |     |       |

CUI offers a two (2) year limited warranty. Complete warranty information is listed on our website.

CUI reserves the right to make changes to the product at any time without notice. Information provided by CUI is believed to be accurate and reliable. However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
