

## 0.8 $\mu$ A Low Power Consumption Voltage Regulator with ON/OFF Switch

### ■ GENERAL DESCRIPTION

The XC6215 series are highly precise, low noise, positive voltage LDO regulators manufactured using CMOS processes. The series achieves very low supply current, 0.8  $\mu$  A (TYP.) and consists of a reference voltage source, an error amplifier, a current foldback circuit, and a phase compensation circuit plus a driver transistor.

Ultra small packages USP-3, USP-4, USPN-4 and SSOT-24, and small package SOT-25 packages make high density mounting possible. Therefore, the series is ideal for applications where high density mounting is required such as in mobile phones.

Output voltage is selectable in 0.1V increments within a range of 0.9V ~ 5.0V by laser trimming

The series is also compatible with low ESR ceramic capacitors, which give added output stability.

The current limiter's foldback circuit also operates as a short protect for the output current limiter and the output pin.

Furthermore, the CE function allows the output of the regulator to be turned off, resulting in greatly reduced power consumption.

### ■ APPLICATIONS

- Smart phones / Mobile phones
- Portable game consoles
- Digital still cameras / Camcorders
- Digital audio equipments
- Mobile devices / terminals

### ■ FEATURES

- Maximum Output Current** : 200mA (300mA Limit, TYP.)  
@  $V_{OUT}=3.0V$ ,  $V_{IN}=4.0V$
- Dropout Voltage** : 320mV @  $I_{OUT} = 100mA$   
@  $V_{OUT} = 3.0V$
- Operating Input Voltage** : 1.5V ~ 6.0V
- Output Voltage Range** : 0.9V ~ 5.0V (0.1V Increments)
- Highly Accurate** : Set voltage accuracy  $\pm 2\%$   
( $1.5V < V_{OUT}(T) \leq 5.0V$ )  
Set voltage accuracy  $\pm 30mV$   
( $0.9V \leq V_{OUT}(T) \leq 1.5V$ )
- Low Power Consumption** : 0.8  $\mu$  A (TYP.)
- Stand-by Current** : Less than 0.1  $\mu$  A
- Operating Temperature Range** : - 40°C ~ 85°C
- Low ESR Capacitor Compatible** : Ceramic capacitor
- Current Limiter Circuit Built-In**
- Packages** : USP-4  
SSOT-24  
USP-3 (For the XC6215P series only)  
SOT-25  
USPN-4
- Environmentally Friendly** : EU RoHS Compliant, Pb Free

### ■ TYPICAL APPLICATION CIRCUIT

- USP-4, SSOT-24, SOT-25, USPN-4 packages  
(For the USP-3 package, with no CE pin)

### ■ TYPICAL PERFORMANCE CHARACTERISTICS

- Supply Current vs. Input Voltage  
XC6215x302

## PIN CONFIGURATION

\* For mounting intensity and heat dissipation, please refer to recommended mounting pattern and recommended metal mask when soldering the pad of USP-4. Mounting should be electrically isolated or connected to the VSS (No.2) pin.

## PIN ASSIGNMENT

| PIN NUMBER |       |       |         |        | PIN NAME         | FUNCTIONS       |
|------------|-------|-------|---------|--------|------------------|-----------------|
| USPN-4     | USP-3 | USP-4 | SSOT-24 | SOT-25 |                  |                 |
| 4          | 1     | 4     | 4       | 1      | V <sub>IN</sub>  | Power Supply    |
| 2          | 3     | 2     | 2       | 2      | V <sub>SS</sub>  | Ground          |
| 3          | -     | 3     | 1       | 3      | CE               | ON / Off Switch |
| 1          | 2     | 1     | 3       | 5      | V <sub>OUT</sub> | Output          |
| -          | -     | -     | -       | 4      | NC               | No Connection   |

## PRODUCT CLASSIFICATION

### Ordering Information

## ■ TEST CIRCUITS

### ● Circuit ①

### ● Circuit ②

## ■ OPERATIONAL EXPLANATION

### ● XC6215B Series (As for the XC6215P Series, with no CE pin)

#### <Output Voltage Control>

The voltage divided by resistors R1 & R2 is compared with the internal reference voltage by the error amplifier. The P-channel MOSFET, which is connected to the V<sub>OUT</sub> pin, is then driven by the subsequent output signal. The output voltage at the V<sub>OUT</sub> pin is controlled and stabilized by a system of negative feedback. The current limit circuit and short protect circuit operate in relation to the level of output current. Further, the IC's internal circuitry can be operated or shutdown via the CE pin's signal.

#### <Short Protection Circuit>

The XC6215 series' regulator offers circuit protection by means of a built-in foldback circuit. When the load current reaches the current limit level, the fixed current limiter circuit operates and output voltage drops. As a result of this drop in output voltage, the foldback circuit operates, the output voltage drops further and output current decreases. When the output pin is shorted, a current of about 50mA flows.

#### <CE Pin>

The IC's internal circuitry can be operated or shutdown via the signal from the CE pin with the XC6215B series. In shutdown mode, output at the V<sub>OUT</sub> pin will be pulled down to the V<sub>SS</sub> level via R1 & R2. Note that the XC6215 series' regulator is "High Active/No Pull-Down", operations will become unstable with the CE pin open. We suggest that you use this IC with either a V<sub>IN</sub> voltage or a V<sub>SS</sub> voltage input at the CE pin. If this IC is used with the correct specifications for the CE pin, the operational logic is fixed and the IC will operate normally. However, supply current may increase as a result of through current in the IC's internal circuitry.

## ■ NOTES ON USE

1. Please use this IC within the stated absolute maximum ratings. The IC is liable to malfunction should the ratings be exceeded.
2. Where wiring impedance is high, operations may become unstable due to noise and/or phase lag depending on output current.
3. As for the XC6215 series, internally achieved phase compensation makes a stable operation of the IC possible even when there is no output capacitor (C<sub>L</sub>). In order to stabilize the V<sub>IN</sub>'s voltage level, we recommend that an input capacitor (C<sub>IN</sub>) of about 0.1 to 1.0  $\mu$ F be connected between the V<sub>IN</sub> pin and the V<sub>SS</sub> pin. Moreover, during transient response, so as to prevent an undershoot or overshoot, we recommend that the output capacitor (C<sub>L</sub>) of about 0.1 to 1.0  $\mu$ F be connected between the V<sub>OUT</sub> pin and the V<sub>SS</sub> pin. However, please wire the input capacitor (C<sub>IN</sub>) and the output capacitor (C<sub>L</sub>) as close to the IC as possible.

0 to 9, A to Z repeated. (G, I, J, O, Q, W excluded)  
NOTE: No character inversion used.

## ■ MARKING RULE (Continued)

### ● SOT-25

SOT-25  
(TOP VIEW)

① represents product series

| MARK | PRODUCT SERIES |
|------|----------------|
| E    | XC6215xxxxxx   |

② represents type of regulators and output voltage range

| MARK | TYPE                                                    | OUTPUT VOLTAGE RANGE | PRODUCT SERIES |
|------|---------------------------------------------------------|----------------------|----------------|
| T    | CE pin, High Active with no pull-down resistor built in | 0.9V~3.0V            | XC6215xxxxxx   |
| U    |                                                         | 3.1V~5.0V            |                |

③ represents output voltage

| MARK | OUTPUT VOLTAGE (V) |     |   | MARK | OUTPUT VOLTAGE (V) |     |   |
|------|--------------------|-----|---|------|--------------------|-----|---|
| 0    | -                  | 3.1 | - | F    | 1.6                | 4.6 | - |
| 1    | -                  | 3.2 | - | H    | 1.7                | 4.7 | - |
| 2    | -                  | 3.3 | - | K    | 1.8                | 4.8 | - |
| 3    | -                  | 3.4 | - | L    | 1.9                | 4.9 | - |
| 4    | -                  | 3.5 | - | M    | 2.0                | 5.0 | - |
| 5    | -                  | 3.6 | - | N    | 2.1                | -   | - |
| 6    | -                  | 3.7 | - | P    | 2.2                | -   | - |
| 7    | -                  | 3.8 | - | R    | 2.3                | -   | - |
| 8    | 0.9                | 3.9 | - | S    | 2.4                | -   | - |
| 9    | 1.0                | 4.0 | - | T    | 2.5                | -   | - |
| A    | 1.1                | 4.1 | - | U    | 2.6                | -   | - |
| B    | 1.2                | 4.2 | - | V    | 2.7                | -   | - |
| C    | 1.3                | 4.3 | - | X    | 2.8                | -   | - |
| D    | 1.4                | 4.4 | - | Y    | 2.9                | -   | - |
| E    | 1.5                | 4.5 | - | Z    | 3.0                | -   | - |

### ● USPN-4

USPN-4  
(TOP VIEW)

④⑤ represents production lot number  
0 to 9, A to Z repeated. (G, I, J, O, Q, W excluded)  
NOTE: No character inversion used.

## ● SOT-25 Power Dissipation

Power dissipation data for the SOT-25 is shown in this page.  
The value of power dissipation varies with the mount board conditions.  
Please use this data as one of reference data taken in the described condition.

### 1. Measurement Condition (Reference data)

Condition: Mount on a board  
Ambient: Natural convection  
Soldering: Lead (Pb) free  
Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
Copper (Cu) traces occupy 50% of the board area  
In top and back faces  
Package heat-sink is tied to the copper traces  
(Board of SOT-26 is used.)  
Material: Glass Epoxy (FR-4)  
Thickness: 1.6 mm  
Through-hole: 4 x 0.8 Diameter

Evaluation Board (Unit: mm)

### 2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j \text{ max} = 125^\circ\text{C}$ )

| Ambient Temperature ( $^\circ\text{C}$ ) | Power Dissipation $P_d$ (mW) | Thermal Resistance ( $^\circ\text{C}/\text{W}$ ) |
|------------------------------------------|------------------------------|--------------------------------------------------|
| 25                                       | 600                          | 166.67                                           |
| 85                                       | 240                          |                                                  |

● SSOT-24 Power Dissipation

Power dissipation data for the SSOT-24 is shown in this page.  
The value of power dissipation varies with the mount board conditions.  
Please use this data as one of reference data taken in the described condition.

1. Measurement Condition (Reference data)

Condition: Mount on a board  
Ambient: Natural convection  
Soldering: Lead (Pb) free  
Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
Copper (Cu) traces occupy 50% of the board area  
In top and back faces  
Package heat-sink is tied to the copper traces  
Material: Glass Epoxy (FR-4)  
Thickness: 1.6 mm  
Through-hole: 4 x 0.8 Diameter

Evaluation Board (Unit: mm)

2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j \text{ max} = 125^\circ\text{C}$ )

| Ambient Temperature ( $^\circ\text{C}$ ) | Power Dissipation $P_d$ (mW) | Thermal Resistance ( $^\circ\text{C/W}$ ) |
|------------------------------------------|------------------------------|-------------------------------------------|
| 25                                       | 500                          | 200.00                                    |
| 85                                       | 200                          |                                           |

## ● USP-4 Power Dissipation

Power dissipation data for the USP-4 is shown in this page.  
The value of power dissipation varies with the mount board conditions.  
Please use this data as one of reference data taken in the described condition.

### 1. Measurement Condition (Reference data)

Condition: Mount on a board  
Ambient: Natural convection  
Soldering: Lead (Pb) free  
Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
Copper (Cu) traces occupy 50% of the board area  
In top and back faces  
Package heat-sink is tied to the copper traces  
Material: Glass Epoxy (FR-4)  
Thickness: 1.6 mm  
Through-hole: 4 x 0.8 Diameter

Evaluation Board (Unit: mm)

### 2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j \text{ max} = 125^\circ\text{C}$ )

| Ambient Temperature ( $^\circ\text{C}$ ) | Power Dissipation $P_d$ (mW) | Thermal Resistance ( $^\circ\text{C/W}$ ) |
|------------------------------------------|------------------------------|-------------------------------------------|
| 25                                       | 1000                         | 100.00                                    |
| 85                                       | 400                          |                                           |

● **USPN-4 Power Dissipation**

Power dissipation data for the USPN-4 is shown in this page.  
The value of power dissipation varies with the mount board conditions.  
Please use this data as one of reference data taken in the described condition.

1. Measurement Condition (Reference data)

Condition: Mount on a board  
Ambient: Natural convection  
Soldering: Lead (Pb) free  
Board: Dimensions 40 x 40 mm (1600 mm<sup>2</sup> in one side)  
Copper (Cu) traces occupy 50% of the front and 50% of the back.  
The copper area is divided into four block, one block is 12.5% of total.  
The USPN-4 package has four terminals.  
Each terminal connects one copper block in the front and one in the back.  
Material: Glass Epoxy (FR-4)  
Thickness: 1.6 mm  
Through-hole: 4 x 0.8 Diameter

Evaluation Board (Unit: mm)

2. Power Dissipation vs. Ambient temperature

Board Mount ( $T_j \text{ max} = 125^\circ\text{C}$ )

| Ambient Temperature ( $^\circ\text{C}$ ) | Power Dissipation $P_d$ (mW) | Thermal Resistance ( $^\circ\text{C/W}$ ) |
|------------------------------------------|------------------------------|-------------------------------------------|
| 25                                       | 600                          | 166.67                                    |
| 85                                       | 240                          |                                           |

1. The product and product specifications contained herein are subject to change without notice to improve performance characteristics. Consult us, or our representatives before use, to confirm that the information in this datasheet is up to date.
2. The information in this datasheet is intended to illustrate the operation and characteristics of our products. We neither make warranties or representations with respect to the accuracy or completeness of the information contained in this datasheet nor grant any license to any intellectual property rights of ours or any third party concerning with the information in this datasheet.
3. Applicable export control laws and regulations should be complied and the procedures required by such laws and regulations should also be followed, when the product or any information contained in this datasheet is exported.
4. The product is neither intended nor warranted for use in equipment of systems which require extremely high levels of quality and/or reliability and/or a malfunction or failure which may cause loss of human life, bodily injury, serious property damage including but not limited to devices or equipment used in 1) nuclear facilities, 2) aerospace industry, 3) medical facilities, 4) automobile industry and other transportation industry and 5) safety devices and safety equipment to control combustions and explosions. Do not use the product for the above use unless agreed by us in writing in advance.
5. Although we make continuous efforts to improve the quality and reliability of our products; nevertheless Semiconductors are likely to fail with a certain probability. So in order to prevent personal injury and/or property damage resulting from such failure, customers are required to incorporate adequate safety measures in their designs, such as system fail safes, redundancy and fire prevention features.
6. Our products are not designed to be Radiation-resistant.
7. Please use the product listed in this datasheet within the specified ranges.
8. We assume no responsibility for damage or loss due to abnormal use.
9. All rights reserved. No part of this datasheet may be copied or reproduced unless agreed by Torex Semiconductor Ltd in writing in advance.
