Description

The R-78W series offers wired 0.5A switching regulators which are ideally suited to offer a stable voltage supply without the need for a PCB for applications like high power LED lighting, battery powered systems, cooling systems, or fans. Due to the high efficiencies of up to 96% there is no need for a heat sink. The compact modules feature fully protected outputs and draw only 1mA under no load conditions.

PROTECTIONS		
Parameter	Type	Value
Short Circuit Protection (SCP)		continuous, automatic recovery
Reverse Current Protection:		
Controlled IC +V_{IN} -V_{IN} +V_{OUT} -V_{OUT} An internal blocking diode can prevent reverse current flow backwards into the output, as this can damage the converter when it is powered down.
