OPTIONS

SPECIAL FEATURES

Shafts

Lengths are measured from the mounting surface to the free end of shaft. Shaft slot is aligned with the wiper within $\pm 10^\circ$. Special shafts are available, in accordance with drawings supplied by customers. We recommend customers not to machine shafts, in order to avoid damage. Bending or torsion of terminals should be avoided.

Shaft and panel sealing hardware

The type P12T with AB (old code M) or AJ (old code R) shaft can be provided with an optional "DE" sealing hardware which ensures sealing of both the shaft and the mounting panel. DE sealing hardware can be supplied in a separate bag.

DE shaft and panel sealing hardware

Shaft locking

The shaft locking bushing is available only with P12O potentiometers. Torque applied to locking nuts should not exceed 15 Ncm.

P12OL with spindle locking nut

Tolerance unless otherwise specified ± 0.5
