

High-Intensity Yellow-Green LED in Plastic T-1³/₄ Package

OVLGJ0C3B9

- Narrow beam angle
- High luminous intensity
- Water clear plastic package
- Yellow-Green (575 nm)

The OVLGJ0C3B9 is a high intensity AlInGaP LED mounted in a clear plastic T-1³/₄ package. The device incorporates an integral molded lens that enables a narrow beam angle and provides an even emission pattern. Designed to produce light over a wide range of drive currents, this LED is useful in applications requiring higher on-axis brightness than that achievable with standard lamps.
