Description

HAS dc-dc converters provide up to 30 watts of output power in an industry-standard package and footprint. With a maximum case temperature of 100 °C, the HAS is well suited for the most demanding telecom, networking, and industrial applications. The HAS features 1500 VDC isolation, short circuit, and overtemperature protection, as well as six-sided shielding. The HAS series is available with optional enable and voltage trim pins. Please see the HAD Series for dual-output applications.
