

Aircraft Wheel Inspection Probes

Aircraft wheel inspection probes are used to inspect aircraft wheels for defects.

Manual Inspections

GE has a large selection of aircraft bead seat probes, each of which is designed to fit the contour of each specific type of aircraft wheel. Due to the number of different types of aircraft wheels, please contact us for more information.

Automated Inspections (Absolute)

Part Number	Frequency	Diameter
50PA16/100k	100kHz	6.0 mm (1/4")
50PA16/200k	100kHz	6.0 mm (1/4")
50PA16/500k	100kHz	6.0 mm (1/4")
50PA16/1.5M	100kHz	6.0 mm (1/4")
50PA24/200k	100kHz	9.5 mm (3/8")
50PA24V1/200k *	100kHz	9.5 mm (3/8")

* With thin center shaft for use on large diameter wheels.
