## NFS40 Medical Series

Single & Triple Output

**Total Power:** 40 - 50W **Input Voltage:** 85 - 264 VAC

120 - 370 VDC # of Outputs: Single, triple

- 5.0 x 3.0 x 1.2 inch package (1U applications)
- Industry standard package
- Overvoltage and short circuit protection
- 40 W with free air convection
- EN55022, EN55011 conducted noise level A
- UL, VDE and CSA safety approvals
- Available RoHS compliant
- 2 year warranty

### Safety

- UL2601
- CSA22.2 No. 125
- IEC601/VDE0750

# **Electrical Specifications**

Output			
Voltage adjustability:	+5 V output on triples Vout on singles	± 5.0% ± 5.0%	
Line regulation: LL to HL, FL	Main output Auxiliary outputs	± 0.2% ± 1.0%	
Load regulation: FL to NL	Main output Auxiliary outputs	± 2.0% ± 5.0%	
Transient response:	+5 V (1.5 - 3 A step)	± 120 mV max. dev. 500 μs recovery	
Temperature coefficient:	All outputs	±0.02%/°C	
Overvoltage protection:	+5 V output	6.25 ± 0.75 Vout	
Output power limit:	Primary power limited	90 W input power limit	
Short circuit protection:	Single outputs Multiple outputs	Continuous Short term	
Input			
Input voltage range:		85 - 264 Vac 120 - 370 Vdc	
Input frequency range:		47 - 440 Hz	
Input surge current:	110 Vac, 60 Hz, cold start 230 Vac, 50 Hz, cold start	10 A 22 A	
Safety ground leakage current:	110 Vac, 60 Hz 230 Vac, 50 Hz	18 μA max. 28 μA max.

#### Notes

- 1 Natural convection cooling, 40 W maximum.
- **2** Forced air, 20 CFM at 1 atmosphere, 50 W maximum.
- 3 Peak output current lasting less than 30 seconds with duty cycle less than 10%. During peak loading, outputs may go outside of total regulation limits. Peak total power must not exceed 60 W.
- 4 50 MHz bandwidth, peak-to-peak, measured differentially.
- 5 Total regulation is defined as the static output regulation at 25 °C, including initial tolerance, load currents within stated limits, and output voltages adjusted to their factory settings. Also, 0.25 <sup>2</sup> I<sub>A</sub> / I<sub>B</sub> <sup>2</sup> 5.0 to maintain stated regulation.
- 6 A minimum load of 0.5 A is required on the +5 V output to obtain full current from the negative output.
- 7 Single output models have floating outputs which may be referenced as either positive or negative.
- 8 Derating curve is application specific for ambient temperatures > 50 °C, for optimum reliability no part of the heatsink should exceed 120 °C and no semiconductor case temperature should exceed 130 °C.
- 9 Caution: Allow a minimum of 1 second after disconnecting the power when making thermal measurements.
- 10 Although the minimum output current of the NFS40-79XXJ is 0 A, a 4 W minimum load is required to achieve design MTBF.
- 11 Three orthogonal axes, sweep at 1 octave/min, 5 minute dwell at four major resonances.
- 12 This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
- 13 The 'j' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant.
- 14 NOTICE: Some models do not support all options. Please contact your local Emerson Network Power representative or use the on-line model number search tool at http://www.PowerConversion.com to find a suitable alternative.

# **Mechanical Drawing**

ALL DIMENSIONS IN INCHES (mm)

#### **Mechanical Notes**

- A In order to meet safety requirements, a non-metallic stand-off is mandatory for one hole as specified in the mechanical drawing above.
- **B** The ground pad of the mounting hole near P1 allows system grounding through a metal stand-off.
- To improve conducted noise, the ground pad of the mounting hole near the output connector should be connected with
  the ground pad of the mounting hole near P1. Use metal stand-offs attached to a common metal chassis. This connection
  also significantly attenuates common mode noise.
- D A standard L-bracket and enclosure kit is available for mounting which contains all screws, connectors and necessary mounting hardware. Order part number NFS40CJ.
