

Safety Interlock Switches

MFS

Magnetic Ferroresonant Stand-Alone Safety Interlock Switch

- Tamper resistant—the combination of magnetic and ferro-resonant signals required to close the safety contacts makes the MFS very tamper resistant
- Stand-alone—use for lower risk applications as a stand-alone safety switch allowing direct switching of relays and contactors up to 2 A at 230 VAC
- MFS-11 provides a visible LED which illuminates green when the actuator is in range and contacts are closed
- MFS-12 provides a dual color LED indicator. The LED illuminates green when the actuator is in range and the contacts are closed. The LED illuminates Red when the actuator is out of range and contacts are open.
- Compact size—mounts easily on 1-in. square tubing
- Use with safety monitoring relays in applications requiring a higher level of safety reliability
- NEMA 4 enclosure enables water washdown cleaning

Conforms to EN1088, EN292, EN60204-1, EN954-1, EN947-5-3, EN60947-5-1, EN50081, EN50082, EN61000-6-2
UL and C-UL listed

Specifications

Electrical	MFS-11	MFS-12
Power Supply:	24 VDC	
Power Consumption:	2 VA	
Max Cable Length:	100 m	
Safety Outputs:	1 N/C or 2 N/C	2 N/C
Auxiliary Contact:		1 N/O
Operating Distance:	ON = 6-9 mm; OFF = 10-12 mm	
Minimum Gap:	2 mm	
Safety Max Switched Current/Voltage:	2 A / 230 VAC; 2 A / 30 VDC	
Aux. Max. Switched Current/Voltage:	2 A / 230 VAC; 2 A / 30 VDC	
Max. Output Fuse:	2 A quick acting	
Mechanical		
Mounting:	2 x M4 screws, supplied	
Case Material:	ABS	
Weight:	198 g (7 oz.)	
Color:	Blue	
Indication:	Green = Guard Closed	Green = Guard Closed Red = Guard Open
Mechanical Life:	10 x 10 ⁶	
Environmental		
Protection:	IP67	
Operating Temperature:	-10 to 55°C (-14 to 131°F)	
Vibration/Shock:	50-100 Hz / 10 g	
Compliance		
Standards:	EN1088, EN292, EN60204-1, EN954-1, EN947-5-3, EN60947-5-1, EN50081, EN50082, EN61000-6-2	
Approvals/Listings:	CE marked for all applicable directives, UL and C-UL	
Safety Category:	Cat. 3 per EN954-1 when used with an appropriate safety monitoring relay	

Specifications are subject to change without notice.

Note: The safety contacts of the Omron STI switches are described as normally closed (N/C)—i.e., with the guard closed, actuator in place, and the machine able to be started.

Operation

Operating Principle

On presenting the actuator to the switch, the high intensity magnetic field, together with a resonant frequency signal, causes the contacts to close. On removing the actuator (opening the door), the safety contacts open, isolating the machine. The required combination of magnetic and ferroresonant signals makes the MFS very tamper resistant.

Contact Arrangements

Connector Configurations

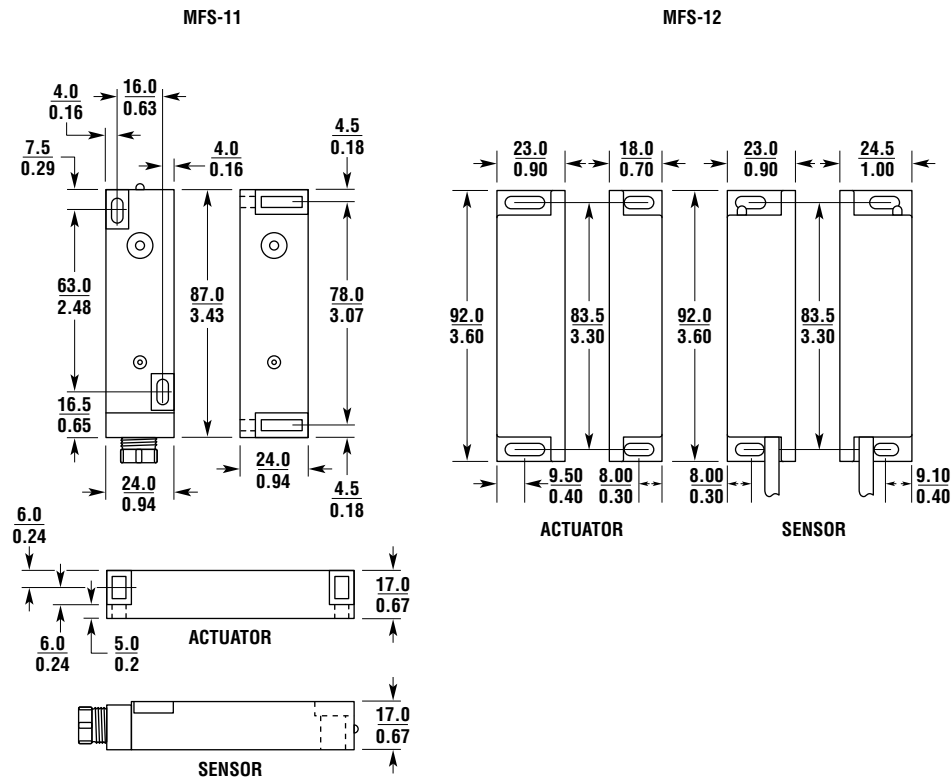

Dimensions

(mm/in.)

Applications

Typical applications are on sliding guard doors or swinging guard doors.
