

## Module with ruggedized pull-handle mechanism

Part no.: 21850-071

### Features:

- Module conforms to AdvancedMC standard
- Modules conform to:
  - PICMG(R) AMC.0 R2.0
  - Ruggedized: MicroTCA.1, MicroTCA.4
- Mounts in MicroTCA chassis or AdvancedMC carrier (e.g. cutaway, conventional or hybrid carrier)
- Front panels stainless steel
- Additional securing of components in MicroTCA system; with patented screw locking

Add to basket

### Technical information:

Description	H	h	h1
Double full-size, 6 HP	170 mm	148,8 mm	135,8 (mm)

### Delivery comprises: (kit)

Item	Qty	Description
1	1	U-shaped front panel, stainless steel; with screw locking

Pull-handle mechanism with additional screw locking

Steel, stainless  
Screw retention

MicroTCA.1 specification: The MicroTCA.1 specification prescribes that the PCB of an AdvancedMC module should be fully inserted into a connector of the MicroTCA backplane. This means that the PCB stands on the base of the connector. For tolerance reasons a split can therefore occur between the front panel of the AdvancedMC module and the MicroTCA board cage of between 0.00 and 1.60 mm. The patented screw locking makes it possible to fix the AdvancedMC module in its respective position (0.00 mm to 1.60 mm). Fixing is achieved by turning the screw via an expanding dowel that is situated in the interior of the screw fixing and that 'freezes' the position of the AdvancedMC modules when tightened.

		welded on, Torx T10
2	1	Board support, die-cast zinc, nickel-plated
3a	1	Light Pipe, top, PC, UL 94 V-0
3b	1	Light Pipe, bottom, PC, UL 94 V-0
4	1	Pull-handle mechanism with microswitch activation and board bracket
5+6	1	Pull-handle, PC, UL 94 V-0, black
7	1	Lateral EMC gasketing, core: foam, sleeve: textile cladding with CuNi coating
8	1	Lower EMC gasketing, core: foam, sleeve: textile cladding with CuNi coating
9	1	Assembly kit
