2.5mm Pitch Connector for Discrete Wire Connection

HNC Series

■Features

1. Full Lock Mechanism

The connector is equipped with the full lock mechanism so as not be removed, unless locks are reset on both sides. This mechanism is activated effectively to prevent extraction by cable hooking or other causes.

2. Thin Type Connector

Mounting height when the connector is used at the right angle : 4.8mm

3. Mechanism to Prevent Mis-insertion

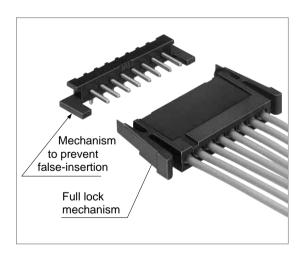

This thin type connector is equipped with the mechanism to prevent misinsertion.

4. Tin Plating and Gold Plating Variation

Two kinds of tin plating and gold plating types are available, and can be chosen according to application. The tin plating is also set to a light operating touch.

■Applications

Various business equipment, financial terminals

Q Durahility (Mating/up mating)	Contact registeres: 20m ohms may	Tin plating : 30 cycles		
6. Durability (Maurig/uri-maurig)	Contact resistance: 20m ohms max.	Gold plating : 50 cycles		
O Posistance to Soldering heat	No deformation of components affecting performance	Flow: 250°C for 5 seconds		
Resistance to Soldering heat	No deformation of components affecting performance.	Manual soldering: 300°C for 2 seconds		

Note 1: The rated current will be changed according to cable sizes for use. The header rating only t is 3A.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 4: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.
