Transformers

**Transformers : Power Transformers : PCB Mounting - Encapsulated (1.2 - 12VA) : 1.2VA PCB Mounting Encapsulated Transformer**

A high quality range of low voltage transformers, flame retardant epoxy resin encapsulated in black ABS cases. In addition to enhancing the cosmetic appearance of the transformer, this construction provides superior environmental and mechanical protection making the device less susceptible to damage either in transit or handling through PCB assembly operations. Designed and manufactured to comply with EN60065.

Product

**K30: 1.2VA PCB Mounting Encapsulated Transformer**

1.2VA high quality range of low voltage transformers, flame retardant epoxy resin encapsulated in black ABS cases. Designed and manufactured to comply with EN60065.

230V mains input, with split bobbin construction eliminating the need for an interwinding screen. Regulation typically 12%. Single centre-topped secondary windings rated 1.2VA total.

Secondary Voltage and Current	Part No.
4.5V - 0 - 4.5V 0.13A	K3045E
6V - 0 - 6V 0.10A	K3006E
12V - 0 - 12V 0.05A	K3012E
15V - 0 - 15V 0.04A	K3015E
20V - 0 - 20V 0.03A	K3020E

**25VA PCB Mounting Encapsulated Toroids**

The 25VA range of encapsulated low profile toroids are PCB mountable and are provided with dual primary for 115V and 230V input and matching dual outputs.
