Description

The P500 incorporates Kavlico's 4th generation ceramic capacitive sense element with the latest state-of-the-art ASIC. Available in brass or stainless steel housings, this multi-purpose sensor is rugged by design. Highly reliable, the P500 is ideal for measuring a broad range of process media including hydrocarbon based fluids, air, and gases.

The P500 package has a built-in Metri-Pack 150 series sealed electrical connector and is available with popular pressure connection thread options. The sensor is offered with seal materials suitable for diverse applications. Standard pressure ranges are available in PSI or Bar.

Specifically intended for high volume OEM applications, the P500 delivers the optimal solution without compromising performance or reliability.
