

Ultra Low Profile 0805 Power Divider 75Ω to 75Ω

Description

The PD0922J7575D2 is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package and is ideal for high volume manufacturing while delivering higher performances than traditional printed and lumped element solutions. It has been designed for the following markets: DVB-S, GSM, DCS, PCS, WCDMA, GPS, 802.11a+g, Bluetooth, and Zigbee USA.

The PD0922J7575D2 is matched to 75Ω and has a height profile of 0.8 mm. A two section Wilkinson design results in increased isolation performance. Two external resistors are required for operation. Components are available on tape and reel for high volume manufacturing pick and place.

All Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of 17 ppm/°C.

Detailed Electrical S	pecifications:	Specifications subj	ect to change without notice.
-----------------------	----------------	---------------------	-------------------------------

		ROOM (25°C)			
Features:	Parameter	Min.	Тур.	Max	Unit
• 950 – 2150 MHz	Frequency	950		2150	MHz
16 dB Isolation (output ports)	Input Port Impedance		75		Ω
 Good Return Loss 0.8mm Height Profile 	Output Port Impedance		75		Ω
 75Ω Outputs/Inputs 	Return Loss	9.5	11		dB
External resistors required	Insertion Loss*		0.8	1.0	dB
Low Insertion Loss	Amplitude Balance		0.4	0.7	dB
Surface Mountable	Phase Balance		2	3	Degrees
 Tape & Reel Non-conductive Surface 	Isolation (Output Ports)	14	16		dB
 RoHS Compliant 	Power Handling			2	Watts
	Operating Temperature	-55		+85	°C

Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

Outline Drawing

Available on Tape and Reel for Pick and Place Manufacturing. USA/Canada: (315) 432-8909 Toll Free: (800) 411-6596 Europe: +44 2392-232392

Typical Broadband Performance: 500 MHz. to 8.0 GHz.

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of 17 ppm/°C.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD0922J7575D2 is a Wilkinson power divider, external 0402 150 Ω and 300 Ω resistors must be mounted in locations R1 and R2 respectively, as shown in the Figure below.

Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
