

## High Speed Translator Buffer to LVDS

### FEATURES

- Differential LVDS output
- Single AC coupled input (min. 100mV swing).
- Input range from 0 to 1.0GHz.
- 2.5V to 3.3V operation.
- Available in 8-Pin SOP or 3x3mm QFN GREEN/RoHS compliant packaging.

### DESCRIPTION

The PL130-09 is a low cost, high performance, high speed, buffer that reproduces any input frequency from 0 to 1.0GHz. It provides a pair of differential LVDS output. Any input signal with at least 100mV swing can be used as reference signal. This chip is ideal for conversion from sine wave, TTL, CMOS, or PECL to LVDS.

| Name     | Pin Number |                        | Type | Description                                                                                                              |
|----------|------------|------------------------|------|--------------------------------------------------------------------------------------------------------------------------|
|          | SOP-8L     | QFN-16L                |      |                                                                                                                          |
| GND      | 1,3,7      | 1,2,4,5,<br>9,13,14,15 | P    | Ground.                                                                                                                  |
| VDD      | 5,8        | 7,10,11,12             | P    | Power supply.                                                                                                            |
| REF_IN   | 2          | 3                      | I    | Reference input signal. The frequency of this signal will be reproduced at the output (after translation to LVDS level). |
| LVDS     | 4          | 6                      | O    | LVDS True output.                                                                                                        |
| LVDS_BAR | 6          | 8                      | O    | LVDS Complementary output.                                                                                               |
| OE       | N/A        | 16                     | I    | Output enable ('1' for enable). Internal pull-up (default is '1').                                                       |

### ELECTRICAL SPECIFICATIONS

#### 1. Absolute Maximum Ratings

| PARAMETERS                        | SYMBOL   | MIN. | MAX.         | UNITS |
|-----------------------------------|----------|------|--------------|-------|
| Supply Voltage                    | $V_{DD}$ |      | 4.6          | V     |
| Input Voltage, dc                 | $V_I$    | -0.5 | $V_{DD}+0.5$ | V     |
| Output Voltage, dc                | $V_O$    | -0.5 | $V_{DD}+0.5$ | V     |
| Storage Temperature               | $T_S$    | -65  | 150          | °C    |
| Ambient Operating Temperature*    | $T_A$    | -40  | 85           | °C    |
| Junction Temperature              | $T_J$    |      | 125          | °C    |
| Lead Temperature (soldering, 10s) |          |      | 260          | °C    |
| ESD Protection, Human Body Model  |          |      | 2            | kV    |

Exposure of the device under conditions beyond the limits specified by Maximum Ratings for extended periods may cause permanent damage to the device and affect product reliability. These conditions represent a stress rating only, and functional operations of the device at these or any other conditions above the operational limits noted in this specification is not implied. \*Operating temperature is guaranteed by design. Parts are tested to commercial grade only.

#### 2. General Electrical Specifications

| PARAMETERS              | SYMBOL   | CONDITIONS          | MIN.         | TYP. | MAX. | UNITS |
|-------------------------|----------|---------------------|--------------|------|------|-------|
| Supply Current, No Load | $I_{DD}$ | Fout = 200MHz, LVDS |              | 25   | 30   | mA    |
| Operating Voltage       | $V_{DD}$ |                     | 2.25         |      | 3.63 | V     |
| Output Clock Duty Cycle |          | @ 1.25V (LVDS)      | ±5% of input |      |      | %     |
| Short Circuit Current   |          |                     |              | ±50  |      | mA    |
