#### **Features**

- Efficiency up to 95%, Non isolated, no need for heatsinks
- Pin-out compatible with LM78XX Linears
- Low profile( L\*W\*H=11.5\*8.5\*17.5mm)
- Wide input range.(4.75V ~ 18V)
- Short circuit protection, Thermal shutdown
- Non-standard outputs available as specials between 1.5V ~ 6.5V
- Low ripple and noise
- "L" Version with 90° pins

#### Description

The R-78Bxx-1.5 Series high efficiency switching regulators are ideally suited to replace 78xx linear regulators and are pin compatible. The efficiency of up to 95% means that very little energy is wasted as heat so there is no need for any heat sinks with their additional space and mounting costs. The L-Version with 90° pins allows direct replacement for laid-flat regulators where component height is at a premium. Low ripple and noise figures and a short circuit input current of typically only 10mA round off the specifications of this versatile converter series.

# Selection Guide Part Number\* Input Range Output Voltage Output Current Voltage Min. Vin Win. Vin (%) SIP3 (V) (V) (V) (A) (%) R-78B1.5-1.5 4.75 – 18 1.5 1.5 83

Ripple Vs Load (Vin=Max)

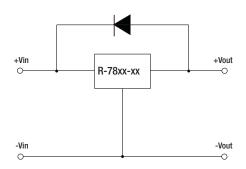

#### **Optional Protection Circuit**

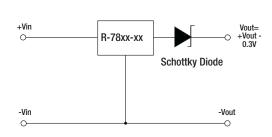

Add a blocking diode to Vout if current can flow backwards into the output, as this can damage the converter when it is powered down.

The diode can either be fitted across the device if the source is low impedance or fitted in series with the output (recommended).

## INNOLINE DC/DC-Converter

## R-78Bxx-1.5 (L) Series

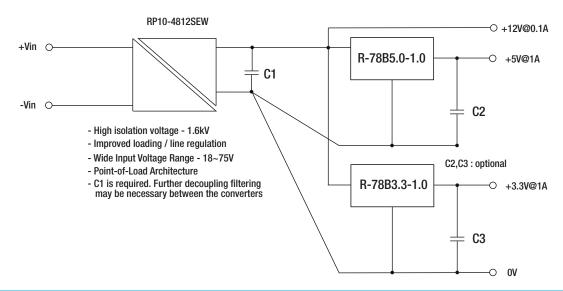

#### **Application Examples**

High efficiency multiple output

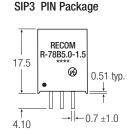

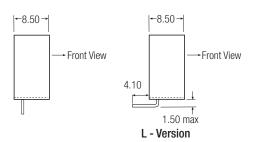

- Wide input range suits both 12V and 7.2V battery packs
- 5.2kV isolated short circuit protected outputs for analogue circuits, e.g. medical grade interface
- High efficiency +5V/1A protected output for digital circuits
- Further decoupling filtering may be necessary between the converters

Isolated, wide Input range, Distributed Power Architecture (Point of Load)
